How do your state's trend lines compare to other countries?

View global COVID-19 data and trends in that context.

View and Download COVID-19 Data Surveillance Public Use Data.

Data will update as soon as they are reviewed and verified, otherwise before 8 pm ET. However, daily updates might be delayed due to delays in reported data.

Data Sources, References & Notes The case classifications for COVID-19 is nationally notifiable disease, are described in an jointly established surveillance case definition, and are reported by jurisdictions. Hospitalized and ever hospitalized for COVID-19 hospitalizations as of August 5, 2020 . However, there is some variation in how jurisdictions implement these case classifications. More information on the COVID-19 surveillance case definition and how it is used, see Council of State and Territorial Epidemiologists.

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of probable cases reported by jurisdictions in Texas, Alaska, Illinois, Wisconsin, Utah, and Arkansas. Aggregate counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, and the District of Columbia. Aggregate counts do not include probable cases and deaths, unless specifically noted. Aggregate counts do not include cases and deaths among U.S. citizens, residents, and embassy personnel who are repatriated to the United States. Total cases and deaths for the state excluding data for NYC. COVID-19 case and death data are available in CDC are derived with an NCHS aggregate state level data. CDC calculation of the number of new cases and deaths by taking the difference in cumulative counts reported by the state from the day before. Historical data are not typically updated unless necessary to correct for a reporting error. Cumulative counts are updated daily, however, there may be delays in the data reflected in the data reported by CDC, and not necessarily the date the case or death was reported to the state.

The figure and corresponding data table can be modified to show COVID-19 cases and death trends for up to six states or territories. When data for total COVID-19 cases or deaths are selected, the number of days since 10 average daily cases are reported. When daily deaths are selected to COVID-19 are displayed, the index day is when 5 average daily deaths were first recorded. For both of these measures, the day 1 trend begins on the day when the 7-day average of new cases or deaths crosses the threshold. To make it easier to smooth expected variations in daily counts since the index date.

When cumulative cases or deaths of COVID-19 are displayed on the index date is when 100 total cases or deaths were first recorded. The trend line shows the cumulative cases or deaths by number of days since the index date.

When daily cases or death rates per 100,000 are displayed, the index date is when 0.1 total cases or 0.1 average daily cases or deaths per 100,000 people are first recorded. The trend line shows the total cases per 100,000 people or average daily cases or deaths per 100,000 people by the number of days since the index date.

When cumulative case or death rate per 100,000 are displayed, the index date is when 0.3 total cases per 100,000 people were first recorded. The trend line shows the total cases per 100,000 using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates by the number of days since the index date.

*2019 population estimates are used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Puerto, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case numbers are calculated through a confirmation process with state jurisdictions. COVID-19 case numbers reported on other websites may differ from what is posted on CDC. COVID Data Tracker Data Sources for Total Confirmed and Probable Cases and COVID Data Tracker updates, which may differ by up to 24 hours. COVID-19 cases from previous dates may be retrospectively updated to reflect the most accurate case status based on the most recent information available. Cumulative case counts and death counts may increase or decrease as data are received from states and territories and reviewed and aligned as applicable. The probable cases used for finding and confirming COVID-19 cases displayed by other sites may differ.
