# COVID Data Tracker

Maps, charts, and data provided by CDC, updates Mondays and Thursdays by 8 p.m. ET

## Wastewater Surveillance

### COVID-19: Wastewater Surveillance

Wastewater surveillance for COVID-19 is a rapidly developing field. State, tribal, local, and territorial health departments participating in the National Wastewater Surveillance System (NWSS) submit testing data to CDC. CDC then standardizes and interprets these data and presents them in the COVID Data Tracker. How these data are used to inform public health action is frequently data are reported to CDC and to health department.

Wastewater data are meant to be used with other COVID-19 surveillance data to better understand the spread of the virus in communities. Learn more about wastewater data by exploring each of the charts and maps. To see a map of which SARS-CoV-2 variant is the most dominant at each wastewater sampling site, see Variant Proportions in Wastewater Surveillance.

**Monitoring Wastewater Surveillance Data**

Wastewater surveillance for COVID-19 is a rapidly developing field. State, tribal, local, and territorial health departments participating in the National Wastewater Surveillance System (NWSS) submit testing data to CDC. CDC then standardizes and interprets these data and presents them in the COVID Data Tracker. How these data are used to inform public health action is frequently data are reported to CDC and to health department.

Wastewater data are meant to be used with other COVID-19 surveillance data to better understand the spread of the virus in communities. Learn more about wastewater data by exploring each of the charts and maps. To see a map of which SARS-CoV-2 variant is the most dominant at each wastewater sampling site, see Variant Proportions in Wastewater Surveillance.

More information about the data and download the data.

Maps, charts, and data provided by CDC, updates Thursdays by 8pm ET. This represents all participating wastewater sampling sites in the NWSS. Wastewater surveillance data are aggregated at the jurisdiction level. Each jurisdiction's wastewater data may contain one or more sampling sites, which can represent all or part of a "sewershed" which is the area contributing wastewater to a sampling location. For all jurisdictions represented in the National Wastewater Surveillance System, virtually, and wastewater samples are collected from sewer systems so communities that are connected to sewer systems are included in the wastewater surveillance data. Wastewater data is NWSS are not representative of all wastewater data in the United States, which includes data from a small population size or having facility specific sampling.

## Wastewater Metric Chart

This chart shows how much virus levels have changed (increased and decreased) over time at wastewater sites across the United States. It shows the percent of sites in each percent change category over time. Learn more about the data and how it is used to inform public health action.

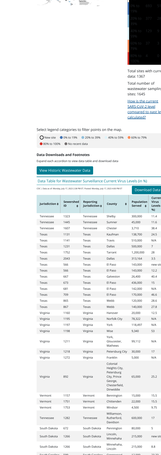
The percent change metric shows whether virus levels have increased or decreased at sites over the last 15 days:

- Blue categories (Large decrease (-100%), Decrease (-99% to -10%)): Virus levels decreased at these sites in the last 15 days.
- Yellow category (Stable (-9% to 9%)): Virus levels stayed about the same at these sites in the last 15 days.
- Orange and red categories (Increase (10% to 99%), Large increase (100% or more)): Virus levels increased at these sites in the last 15 days.

Point size shows the overall amount of virus that were in each category over time since January 1, 2021. If more area on the chart is shaded light or dark blue, it means virus levels were decreasing at more sites in the last 15 days. If more area on the chart is shaded red or orange, it means virus levels were increasing at more sites in the last 15 days. Changes in the last 15 days metric may be affected by how many wastewater samples were collected, collecting wastewater samples, the block time shows the number of sampling sites with available data for each date.

Note: This chart does not show overall levels of SARS-CoV-2 in wastewater.

### Percent of sites in each percent change category over time, United States*



*The darker bar on the right side of the figure highlights the most recent 2 weeks, which may be subject to reporting delays. The actual number of sites reporting during these 2 weeks will likely increase as historical data are added.

## Wastewater Metric Map

State or territory: Select state or territory ▾
County: Select county/ies by state ▾
Reset Selections

Time Period: Jun 26, 2023 – Jul 10, 2023

Weekly:
- Percent change in virus levels in wastewater by site
- Percent change in the last 15 days
- Percent of wastewater samples with detectable virus

Other:
- Sites with no recent data
- Sites that started sampling after 12/1/21

**Current virus levels in wastewater by site**

This map shows whether SARS-CoV-2 levels at a site are currently higher or lower than past historical levels at the same site. We assess current levels using the last 15 days of data. Sites with current levels at the highest four tertiles are at the site. Public Dashboard. Sites with increasing levels of the virus in wastewater over time and use these data to help make public health decisions.

**Note:** Sites began collecting data at different times. Sites that began collecting data more recently may not have enough data to compare to the data collected reporting data on or before Public Dashboard 1, 2021. The data history for these new sites is not long enough to reflect the same surges as the other sites.

Select tagged categories to filter points on the map.

Weekly: Show all | Big Up 15% | 25-99% | 10% to 25% | 10% to 75% | 75% to 100%
Other: Show all | Sites with no recent data

New sampling sites are being added over time as health departments begin sampling and reporting wastewater surveillance data. Some communities not represented on this dashboard may be conducting wastewater surveillance. If you would like to know if wastewater surveillance is happening in your community, contact your health department or local government. At this time, CDC does not release the names of the wastewater treatment plants or zip codes where sampling sites are located. However, information on the counties served by the wastewater sampling sites is provided.
