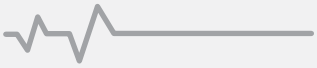
*CDC's Fight Against*

# GLOBAL TUBERCULOSIS

**2** BILLION
PEOPLE INFECTED WITH TB
(1/3 OF WORLD POPULATION)

**10.4** MILLION
SICK WITH ACTIVE TB

**480,000**
NEW CASES OF
MULTIDRUG-RESISTANT TB
(MDR TB)



**1.8** MILLION
DEATHS

**EVERY YEAR**

**PREVENTABLE, TREATABLE, CURABLE**

**49** MILLION
LIVES **SAVED** (2000-2015)

*(Source: WHO, 2016)*

## CDC'S IMPACT

*CDC is working with partners to identify new approaches to improve TB prevention and care worldwide.*

- **Developing new strategies** to find and cure TB, MDR-TB and TB/HIV.
- **Informed the global roadmap** to find, cure and prevent TB in children.
- **Strengthening surveillance systems** to identify and target hot spots.
- **Developing interventions** to end TB transmission in health facilities.
- **Transforming the World's Approach** to diagnosing TB among those with HIV.
- **Establishing best practices** for treatment of drug-resistant TB.
