Data Table for Cases in Last 7 Days by State/Territory

CDC | Updated: Jan 6 2021 1:16PM

[Download Data](#)

State/Territory	Cases in Last 7 Days
California	265,113
Texas	127,175
Florida	97,715
New York*	63,885
Georgia	60,464
Arizona	60,252
Ohio	52,433
Pennsylvania	51,566
North Carolina	51,117
Tennessee	45,060
Illinois	43,713
New York City*	34,663
Massachusetts	33,210
Virginia	32,955
Indiana	32,801
New Jersey	32,014
Alabama	27,789
South Carolina	27,471
Oklahoma	23,992
Michigan	22,803
Louisiana	22,163
Arkansas	19,642
Utah	19,625
Missouri	19,494
Kentucky	19,344
Maryland	19,215
Wisconsin	18,834
Colorado	18,485
Washington	17,921
Nevada	15,331
Kansas	15,255
Mississippi	15,180
Connecticut	15,001
Minnesota	14,151
West Virginia	10,389
Iowa	10,059
New Mexico	8,624
Oregon	8,261
Nebraska	7,252
Rhode Island	7,063
Idaho	6,319
New Hampshire	5,295
Delaware	4,911
Puerto Rico	3,724
Maine	3,591
Montana	2,952
South Dakota	2,918
Alaska	2,425
Wyoming	1,646
District of Columbia	1,631
North Dakota	1,631
Hawaii	974
Vermont	836
Virgin Islands	73
Guam	51
American Samoa	0
Federated States of Micronesia	0
Northern Mariana Islands	0
Palau	0
Republic of Marshall Islands	0

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an updated interim COVID-19 position statement and case definition issued by the Council of State and Territorial Epidemiologists on August 5, 2020 (<https://www.cdc.gov/nndss/conditions/coronavirus-disease-2019-covid-19/case-definition/2020/08/05/>) However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at CDC's COVID-19 FAQ webpage (<https://www.cdc.gov/coronavirus/2019-ncov/covid-data/faq-surveillance.html>).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates (<https://www2.census.gov/programs-surveys/popest/tables/2010-2019/national/totals/na-est2019-01.xlsx>). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates.

*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
