Data Table for Cases in Last 7 Days by State/Territory

CDC | Updated: Jan 8 2021 6:19PM [Download Data](#)

State/Territory	Cases in Last 7 Days
California	273,232
Texas	135,569
Florida	103,846
New York*	66,638
Arizona	64,386
Georgia	57,178
North Carolina	53,201
Pennsylvania	52,762
Ohio	52,688
Tennessee	47,435
Illinois	44,656
New York City*	37,775
New Jersey	37,022
Indiana	35,014
Massachusetts	33,743
Virginia	33,150
South Carolina	30,605
Alabama	28,004
Michigan	27,126
Kentucky	26,168
Oklahoma	24,295
Louisiana	22,779
Arkansas	20,778
Utah	20,705
Wisconsin	20,070
Missouri	19,856
Maryland	19,387
Colorado	18,826
Washington	17,260
Connecticut	17,050
Nevada	16,064
Mississippi	15,279
Kansas	14,385
Minnesota	14,268
Iowa	11,084
West Virginia	10,668
New Mexico	8,955
Rhode Island	8,642
Oregon	7,176
Nebraska	6,793
Idaho	6,096
New Hampshire	5,233
Puerto Rico	5,013
Delaware	4,885
Maine	4,206
Montana	3,195
South Dakota	2,968
Alaska	2,199
District of Columbia	1,767
Wyoming	1,759
North Dakota	1,668
Hawaii	1,107
Vermont	991
Virgin Islands	94
Guam	91
Northern Mariana Islands	3
American Samoa	0
Federated States of Micronesia	0
Palau	0
Republic of Marshall Islands	0

How does COVID-19 Spread?

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an [an updated interim COVID-19 position statement and case definition](#) issued by the Council of State and Territorial Epidemiologists on August 5, 2020. However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at [CDC's COVID-19 FAQ webpage](#).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia. The displayed counts also include probable COVID-19 cases and deaths. Counts for NYC and State of New York are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019* [American Community Survey 1-year estimates](#). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates.

*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
