Data Table for Deaths in Last 7 days by State/Territory

CDC | Updated: Jan 8 2021 6:19PM [Download Data](#)

State/Territory	Deaths in Last 7 Days
California	2,659
Texas	1,501
Pennsylvania	1,201
Illinois	963
Arizona	877
New York*	859
Michigan	855
Florida	808
New Jersey	604
Tennessee	585
Indiana	560
Ohio	500
Massachusetts	477
North Carolina	465
South Carolina	365
Missouri	363
Georgia	296
Connecticut	292
Colorado	288
Kansas	286
Mississippi	285
Maryland	274
New York City*	266
Minnesota	258
Alabama	253
Arkansas	250
Louisiana	240
Wisconsin	235
Virginia	231
Kentucky	220
Nevada	214
New Mexico	203
West Virginia	180
Oklahoma	178
Washington	175
Iowa	174
Nebraska	160
Rhode Island	133
Oregon	91
Utah	90
Idaho	81
Maine	80
Montana	77
Puerto Rico	71
New Hampshire	69
South Dakota	56
Wyoming	51
North Dakota	43
District of Columbia	22
Delaware	19
Vermont	19
Alaska	17
Hawaii	11
Guam	3
Virgin Islands	1
American Samoa	0
Federated States of Micronesia	0
Northern Mariana Islands	0
Palau	0
Republic of Marshall Islands	0

### How does COVID-19 Spread?

Learn [more](#)

[View and Download COVID-19 Case Surveillance Public Use Data](#)

**Data Sources, References & Notes:** The case classifications for COVID-19, a nationally notifiable disease, are described in an [an updated interim COVID-19 position statement and case definition](#) issued by the Council of State and Territorial Epidemiologists on August 5, 2020. However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at [CDC's COVID-19 FAQ webpage](#).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia. The jurisdictional counts also include probable COVID-19 cases and deaths. Counts for NYC and the District of Columbia are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days are calculated as the 7-day moving average of new cases (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019\* [American Community Survey 1-year estimates](#). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019\* American Community Survey 1-year estimates.

\*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
