United States COVID-19 Cases and Deaths by State

Reported to the CDC since January 21, 2020

TOTAL CASES

21,853,491

+314,093 New Cases

CASES IN LAST 7 DAYS

1,740,950

TOTAL DEATHS

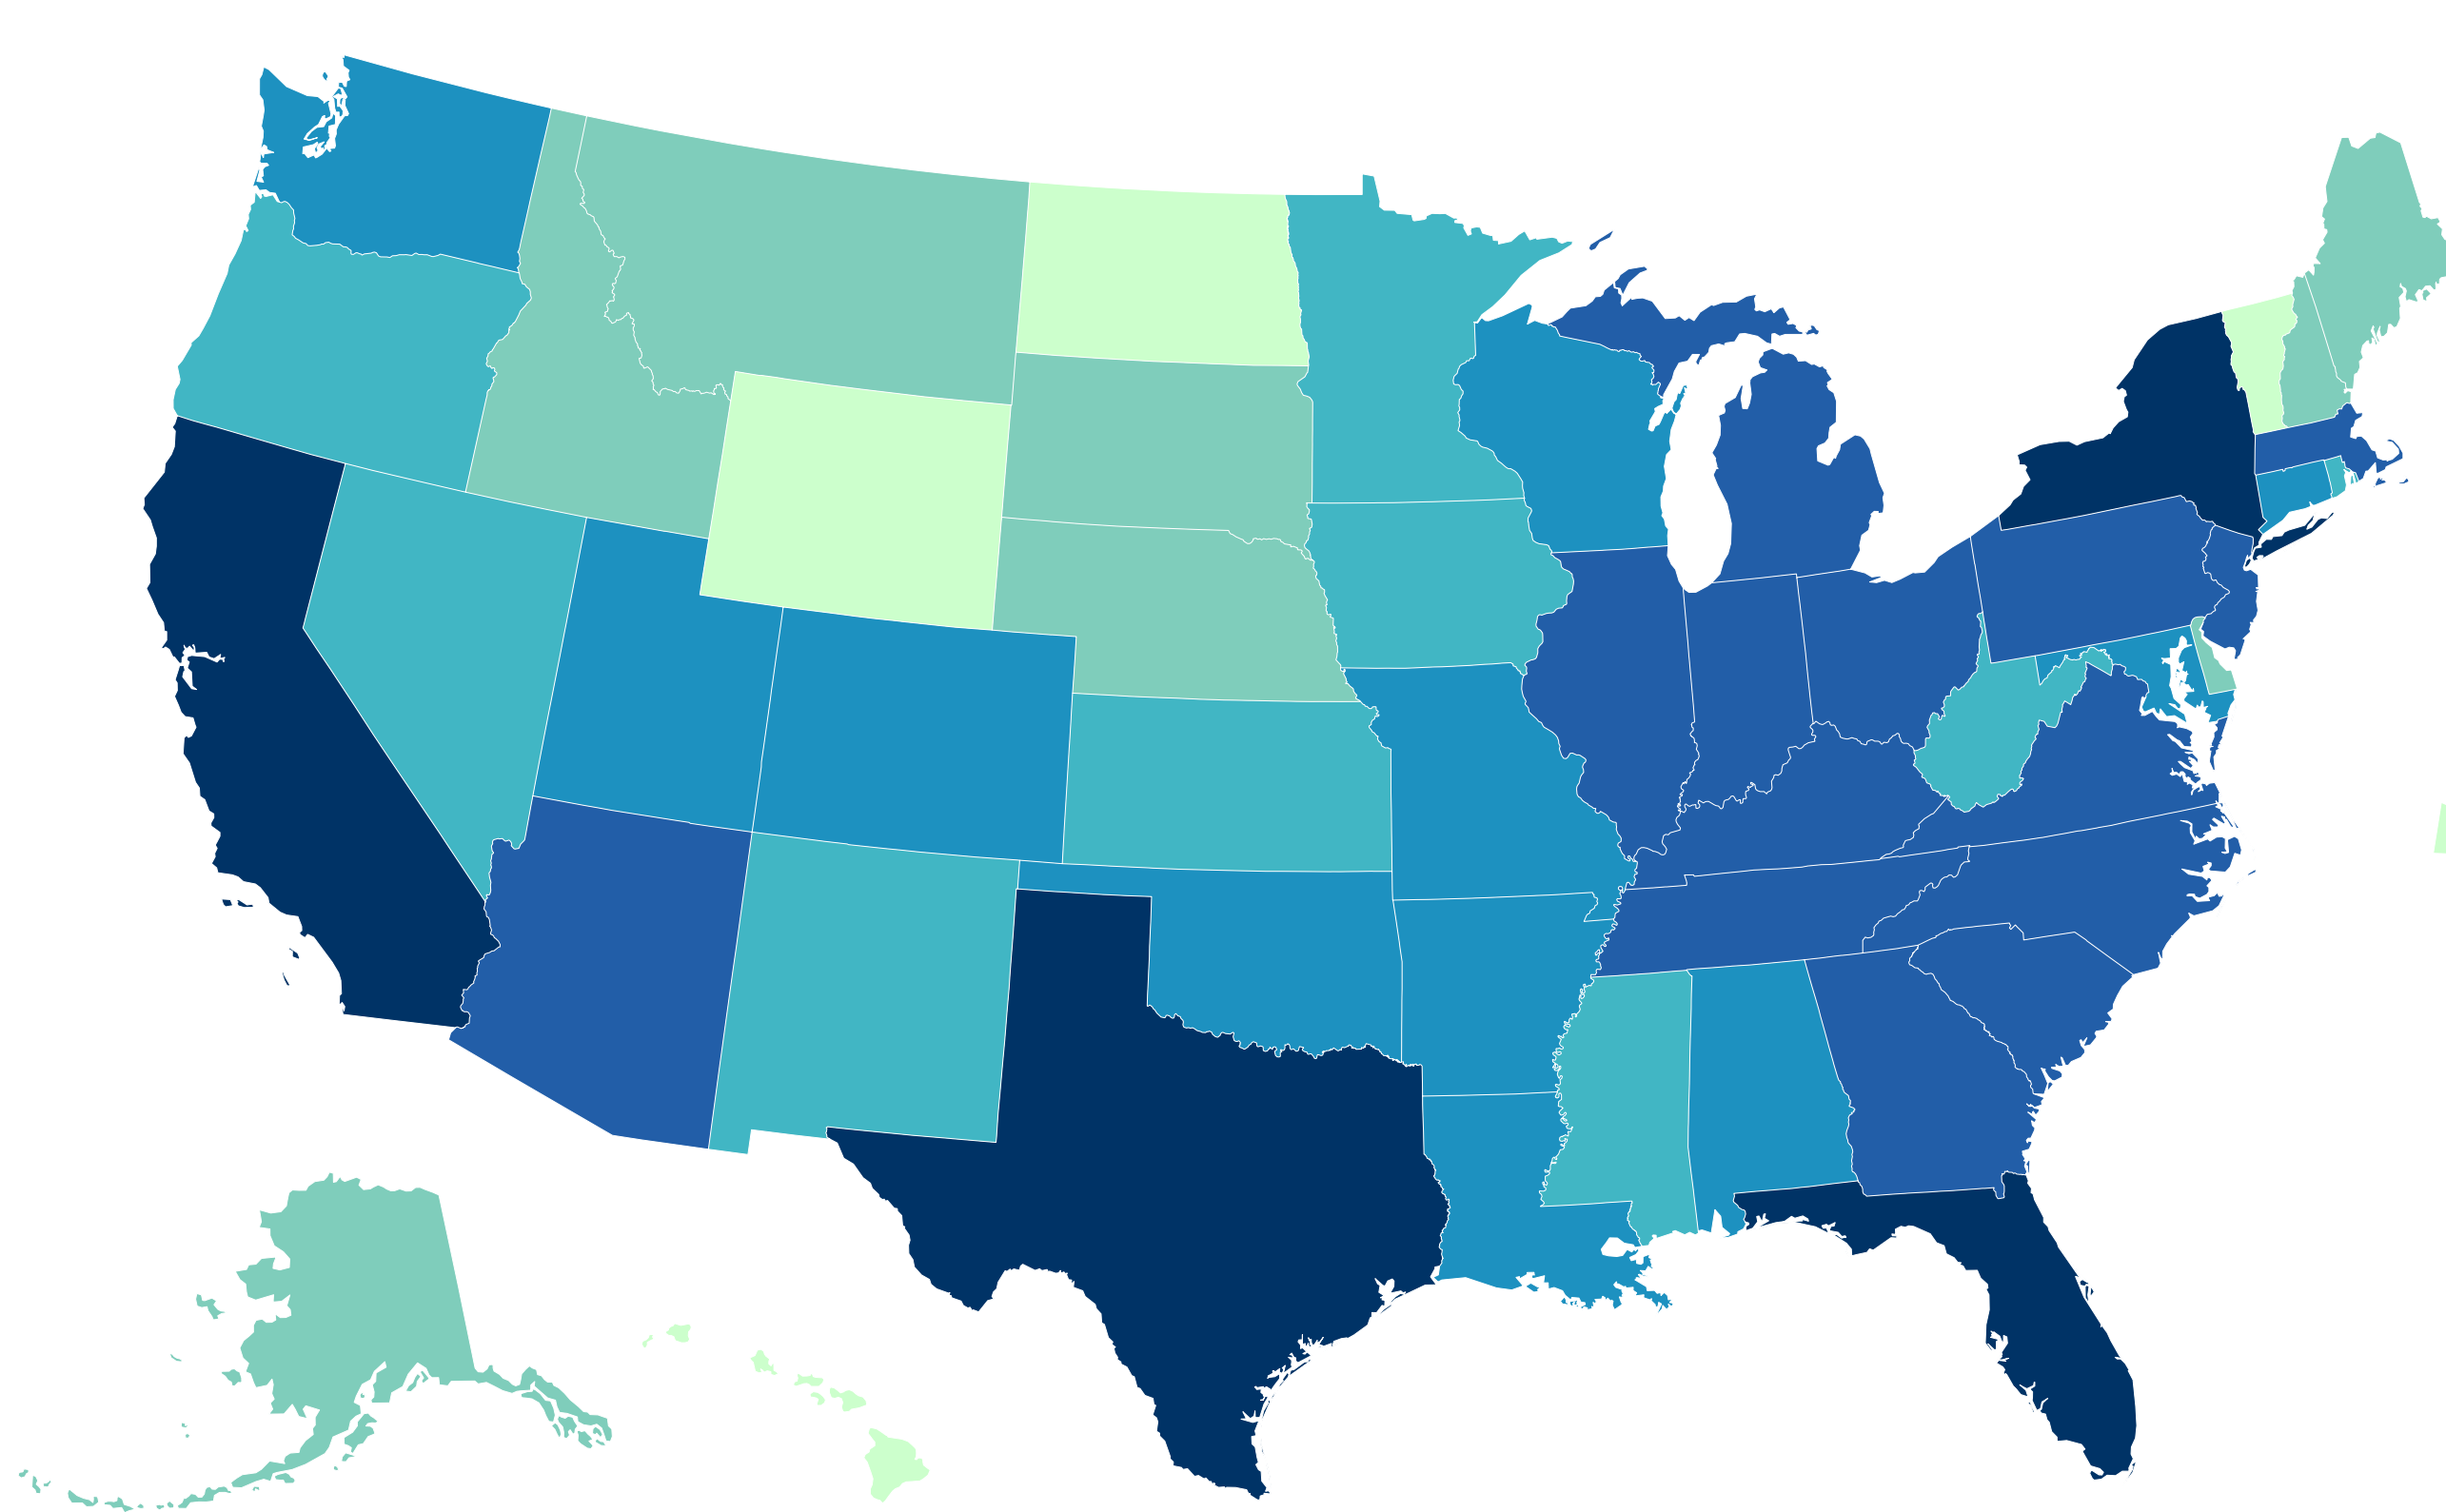

367,652

+3,623 New Deaths

CDC | Updated: Jan 9 2021 1:46PM

Data Table for Cases in Last 7 Days by State/Territory

CDC | Updated: Jan 9 2021 1:46PM

[Download Data](#)

State/Territory	Cases in Last 7 Days
California	276,073
Texas	142,778
Florida	122,982
New York*	67,982
Arizona	65,984
North Carolina	63,229
Ohio	62,223
Georgia	59,337
Pennsylvania	55,226
New Jersey	55,144
Illinois	53,933
Tennessee	53,804
Massachusetts	41,378
New York City*	38,935
South Carolina	36,669
Virginia	34,960
Indiana	34,821
Michigan	31,034
Kentucky	30,905
Alabama	28,540
Oklahoma	28,221
Louisiana	26,156
Wisconsin	22,095
Washington	21,855
Utah	21,388
Connecticut	20,286
Maryland	20,193
Missouri	19,459
Arkansas	19,418
Colorado	18,949
Minnesota	16,642
Nevada	16,615
Mississippi	16,593
Kansas	14,577
Iowa	11,344
West Virginia	10,078
Rhode Island	9,665
New Mexico	9,314
Oregon	8,938
Idaho	7,181
Nebraska	6,898
Delaware	6,411
New Hampshire	6,124
Puerto Rico	4,698
Montana	4,013
Maine	3,776
South Dakota	3,416
Alaska	2,602
Wyoming	2,238
District of Columbia	1,855
North Dakota	1,667
Hawaii	1,114
Vermont	1,029
Virgin Islands	107
Guam	91
Northern Mariana Islands	3
Federated States of Micronesia	1
American Samoa	0

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an [an updated interim COVID-19 position statement and case definition](#) issued by the Council of State and Territorial Epidemiologists on August 5, 2020. However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at [CDC's COVID-19 FAQ webpage](#).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include probable COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include confirmed COVID-19 cases and deaths. Counts for New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019* [American Community Survey 1-year estimates](#). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates.

*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
