### Data Table for Deaths in Last 7 days by State/Territory

CDC | Updated: Jan 10 2021 1:01PM

Download Data

State/Territory	Deaths in Last 7 Days
California	2,876
Texas	1,824
Pennsylvania	1,428
Illinois	993
Arizona	975
Florida	914
New York*	896
Michigan	839
Tennessee	734
New Jersey	667
Ohio	582
Massachusetts	562
Indiana	556
North Carolina	533
Georgia	497
Alabama	427
Missouri	401
South Carolina	373
Louisiana	345
New York City*	320
Wisconsin	311
Nevada	299
Mississippi	296
Minnesota	295
Arkansas	281
Colorado	278
Maryland	278
Kansas	269
Virginia	259
Washington	240
Connecticut	225
Oklahoma	216
New Mexico	198
West Virginia	197
Iowa	181
Kentucky	178
Nebraska	146
Rhode Island	139
Oregon	111
Utah	96
New Hampshire	93
Puerto Rico	85
Montana	83
Idaho	80
Maine	73
South Dakota	69
Wyoming	51
North Dakota	42
Delaware	39
District of Columbia	21
Hawaii	18
Vermont	17
Alaska	9

[View and Download](#) COVID-19 Case Surveillance Public Use Data

**Data Sources, References & Notes:** The case classifications for COVID-19, a nationally notifiable disease, are described in an [an updated interim COVID-19 position statement and case definition](#) issued by the Council of State and Territorial Epidemiologists on August 5, 2020 .. However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at [CDC's COVID-19 FAQ webpage](#).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019\* [American Community Survey 1-year estimates](#). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019\* American Community Survey 1-year estimates.

\*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
