Pregnant Women

Monitoring the impact of COVID-19 during pregnancy can protect pregnant women and their babies.

Data on COVID-19 during Pregnancy: Severity of Maternal Illness

Pregnant women¹ with COVID-19, United States, January 22, 2020 - January 11, 2021

TOTAL CASES¹ TOTAL DEATHS 55,154

Data were collected from 55,154 women, and age was available for 55,154 (100%) women. 18k

Pregnant women with COVID-19 by age, United States, January 22, 2020 - January 11, 2021

18k

Pregnant women with COVID-19 by race/ethnicity, United States, January 22, 2020 - January 11, 2021

Data were collected from 55,154 women, but race/ethnicity was only available for 39,090 (70.9%) women.

Data were collected from 55,154 women, but hospitalization data were only available for 45,032 (81.6%).

Pregnant Women with COVID-19 who were hospitalized, United States, January 22, 2020 – January 11,

9,778 Pregnant women with COVID-19 admitted to the ICU, who required invasive ventilation, or who required ECMO, United States, January 22, 2020 - January 11, 2021 Data were collected from 55,154 women, but ICU admission data were only available for 10,672 (19.3%) women, invasive ventilation data were only available for 8,076 (14.6%) women, and ECMO data were only available for 8,417 (15.3%).

HOSPITALIZED CASES³

100 50 0 Required ECMO⁴ Admitted to the ICU⁴ Required Invasive Ventilation **Hospitalization Status** ¹Cases with age <9 years and >54 years are excluded. Cases with unknown age are included. ²Other race includes non-Hispanic American Indian or Alaska Native or non-Hispanic Native Hawaiian or Other Pacific Islander ³ Data were not available to distinguish hospitalization for COVID-19–related indications, such as worsening respiratory status, from hospital admission for pregnancy-related indications, such as delivery.

⁴Abbreviation: ICU, intensive care unit; ECMO, extracorporeal membrane oxygenation, an advanced life support technique used for patients with life-threatening heart and/or lung problems. **Download Chart** Data Table for COVID-19 during Pregnancy Download Data 🕹 CDC | Updated: January 11, 2021 **Category** Value Total Cases 55154 **Total Deaths** 66 Total Cases with Known Age 55154 Total Cases with Unknown Age 0 Percent Cases with Known Age 100 Cases less than 15 years 121 Cases 15 to 19 years 2843 Cases 20 to 24 years 11532 Cases 25 to 29 years 16739 Cases 30 to 34 years 14115 Cases 35 to 39 years 7134 Cases 40 to 44 years 1942 Cases 45 to 49 years 434 Cases 50 to 54 years 294 Total Cases with Known Race/Ethnicity 39090 Percent Cases with Known Race/Ethnicity 70.9 Total Cases Hispanic or Latino 12626 Total Cases Asian, Non-Hispanic 1395 Total Cases Black, Non-Hispanic 6149 Total Cases White, Non-Hispanic 16031

Want to learn more about COVID-19 risk for pregnant women and those who

About the Data: Data will update as soon as they are reviewed and verified, oftentimes before 8 pm ET. However, daily updates might be delayed due to delays in

There are currently 56 U.S.-affiliated jurisdictions reporting cases of COVID-19. This includes 50 states, District of Columbia, Guam, New York City, the Northern Mariana Islands, Puerto Rico, and the U.S Virgin Islands. Because only about a third of case report forms include information on pregnancy status, these numbers likely do not

View and Download COVID-19 Case Surveillance Public Use Data

include all pregnant women with COVID-19 in the United States and must be interpreted with caution. The completeness of this variable continues to improve each week. Increases in the total number of cases of COVID-19 among pregnant women are largely due to the updating of pregnancy status among already reported cases.

Case numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall case numbers are validated through a confirmation process with each jurisdiction. Differences between reporting jurisdictions and CDC's website may occur because of the timing of reporting and website updates. The process used for finding and confirming cases displayed by other sites may differ. Case counts may fluctuate from week to week due to data quality and cleaning

processes. As of October 2020, CDC will exclude reports of cases of COVID-19 among pregnant women who are younger than age 9 and older than age 54 in the weekly reporting. Based on review of data quality, cases reported as pregnant with ages less than 9 or greater than 54 are less likely to be true pregnancies, and more likely to be data errors. Cases with unknown age are still included. For more information on how CDC collects COVID-19 surveillance data, see FAQ COVID-19 Data and Surveillance

For surveillance data on birth and infant outcomes from the Surveillance for Emerging Threats to Mothers and Babies Network (SET-NET) see COVID-19 during Pregnancy: Birth and Infant Outcomes
