

Coronavirus Disease 2019 (COVID-19)

CDC COVID Data Tracker

Maps, charts, and data provided by the CDC, updated daily by 8 pm ET †

- Case Trends, Vaccinations, County View, Laboratory, Global Cases and Deaths, Community Impact, Unique Populations, COVID-19 Home

- PCR Testing, National Commercial Lab Survey, 10-Site Commercial Lab Survey

United States Laboratory Testing

TOTAL TESTS REPORTED 286,492,008

TOTAL POSITIVE TESTS 26,492,883

TOTAL % POSITIVE 9.25%

National totals as of: Jan 24 2021

CDC | Updated: Jan 26 2021 12:16PM

- View: Tests Performed, Percent Positive; Time period: Last 7 Days, Last 30 Days, All Time; Metric: Rate per 100,000, Count

Cumulative COVID-19 Viral (RT-PCR) Laboratory Tests Performed per 100k by State/Territory

Territories

- GU, PR, VI

Cumulative Tests Performed per 100,000

- 10,970.68 - 44,071.2; 55,428.14 - 67,211.12; 68,954.08 - 81,454.32; 84,138.1 - 101,334.93; 108,080.87 - 138,157.9; 144,604.24 - 211,432.38

†Data will update as soon as they are reviewed and verified, oftentimes before 8 pm ET. However, daily updates might be delayed due to delays in reported data.

Disclaimer: The data represent viral COVID-19 laboratory test (reverse transcription polymerase chain reaction) results from laboratories in the United States, including commercial and reference laboratories, public health laboratories, hospital laboratories, and other testing locations. The data represent testing totals—not individual patients—and exclude antibody and antigen tests. The data are provisional and subject to change. National total test counts reflect data from the previous day and may not match the sum of the data presented for all jurisdictions. Data reported for each state and territory may be delayed several days in order to mitigate discrepancies in daily test counts due to variation in jurisdiction reporting. The data may also not include results from all testing sites within a jurisdiction (e.g., point-of-care test sites) and therefore reflect the majority, but not all, COVID-19 tests in the United States. The data are reported to state and jurisdictional health departments in accordance with applicable state or local law and in accordance with the Coronavirus Aid, Relief, and Economic Security (CARES) Act (CARES Act Section 18115). The data for each state are sourced from either data submitted directly by the state health department via COVID-19 electronic laboratory reporting (CELR), or a combination of commercial, public health, and in-house hospital laboratories. CELR data are used for states that either submit line-level data or submit aggregate counts that do not include antigen or antibody tests. The data are available for public use on HealthData.Gov.
