## Data on COVID-19 during Pregnancy: Severity of Maternal Illness

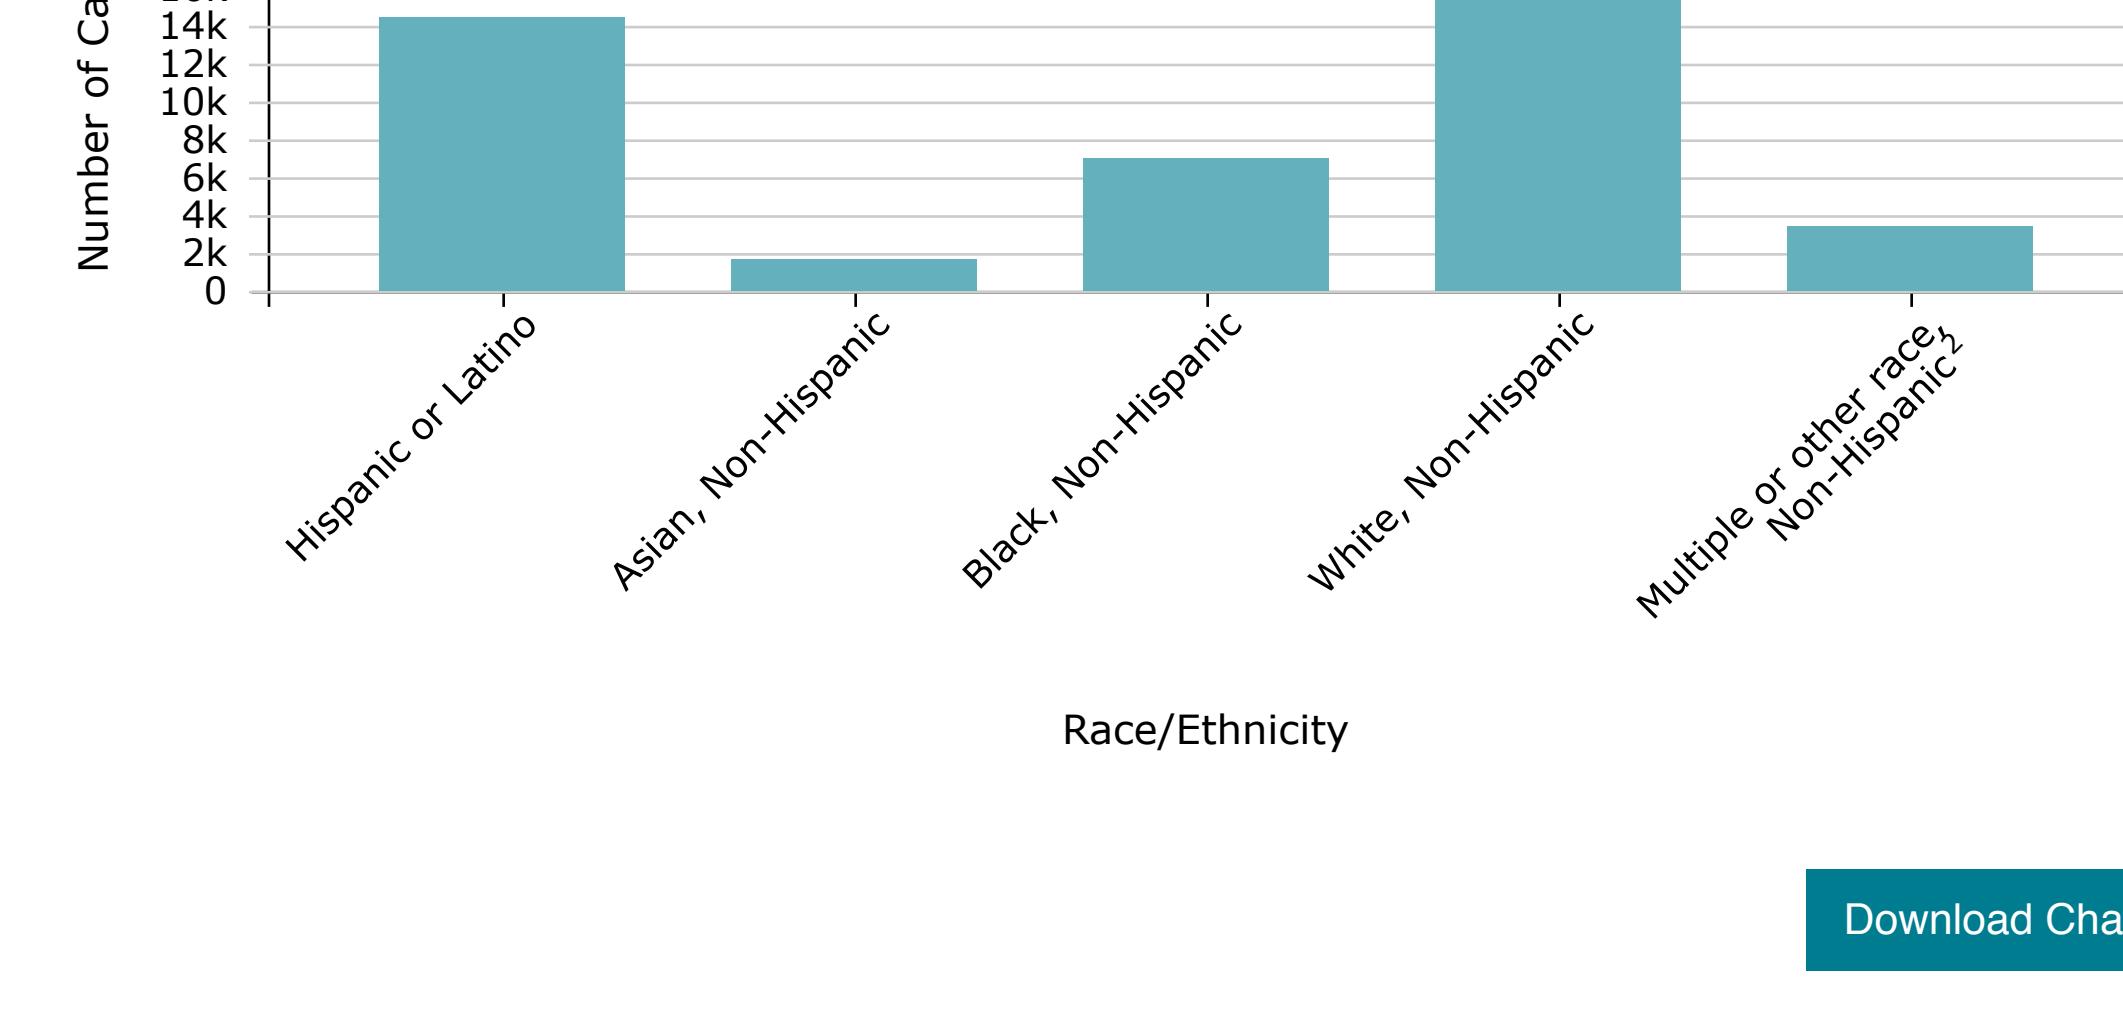

Monitoring the impact of COVID-19 during pregnancy can protect pregnant women and their babies; Maps, charts, and data provided by the CDC

Pregnant women<sup>1</sup> with COVID-19, United States, January 22, 2020 - February 1, 2021

**TOTAL CASES<sup>1</sup>****64,075****TOTAL DEATHS****74**

Pregnant women with COVID-19 by age, United States, January 22, 2020 - February 1, 2021

Data were collected from 64,075 women, and age was available for 64,075 (100%) women.

[Download Chart](#)

Pregnant women with COVID-19 by race/ethnicity, United States, January 22, 2020 - February 1, 2021

Data were collected from 64,075 women, but race/ethnicity was only available for 45,662 (71.3%) women.

[Download Chart](#)

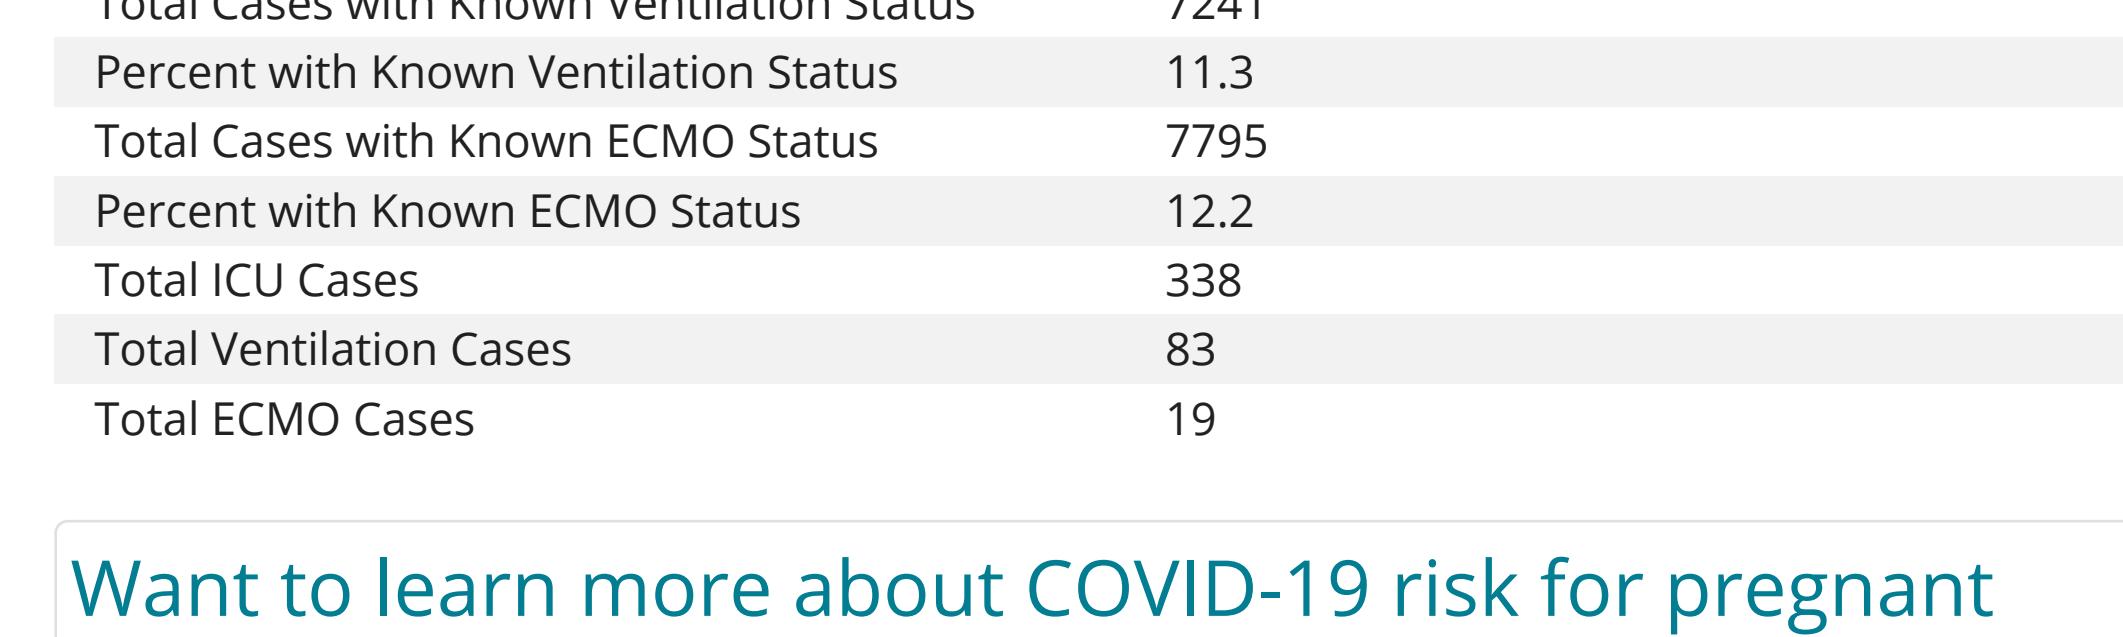

Pregnant Women with COVID-19 who were hospitalized, United States, January 22, 2020 - February 1, 2021

Data were collected from 64,075 women, but hospitalization data were only available for 51,931 (81%) women.

**HOSPITALIZED CASES<sup>3</sup>****10,852**

Pregnant women with COVID-19 admitted to the ICU, who required invasive ventilation, or who required ECMO, United States, January 22, 2020 - February 1, 2021

Data were collected from 64,075 women, but ICU admission data were only available for 10,411 (16.2%) women, invasive ventilation data were only available for 7,241 (11.3%) women, and ECMO data were only available for 7,795 (12.2%).

<sup>1</sup>Cases with age <9 years and >54 years are excluded. Cases with unknown age are included.

<sup>2</sup>Other race includes non-Hispanic American Indian or Alaska Native or non-Hispanic Native Hawaiian or Other Pacific Islander

<sup>3</sup>Data were not available to distinguish hospitalization for COVID-19-related indications, such as worsening respiratory status, from hospital admission for pregnancy-related indications, such as delivery.

<sup>4</sup>Abbreviation: ICU, intensive care unit; ECMO, extracorporeal membrane oxygenation, an advanced life support technique used for patients with life-threatening heart and/or lung problems.

About the Data: This page is updated weekly. The cases reported are only confirmed cases with laboratory evidence of SARS-CoV-2 infection. There are currently 56 U.S.-affiliated jurisdictions reporting cases of COVID-19. This includes 50 states, District of Columbia, Guam, New York City, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Because of a third of case report forms include information on pregnancy status, these numbers likely do not include all pregnant women with COVID-19 in the United States and must be interpreted with caution. The completeness of this data continues to improve each week. Increases in the total number of cases with COVID-19 among pregnant women are largely due to the updating of pregnancy status among already reported cases. Case numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall case numbers and CDC's website through a confirmation process with each jurisdiction. Differences between CDC's overall case numbers and CDC's website may occur because of the timing of reporting and website updates. The process used for finding and confirming cases displayed by other sites may differ. Case counts may fluctuate from week to week due to data quality and cleaning processes. Cases with unknown age are included. Cases with age <9 years and >54 years are excluded. Cases with unknown race are included. Other race includes non-Hispanic American Indian or Alaska Native or non-Hispanic Native Hawaiian or Other Pacific Islander. Data were not available to distinguish hospitalization for COVID-19-related indications, such as worsening respiratory status, from hospital admission for pregnancy-related indications, such as delivery. Abbreviation: ICU, intensive care unit; ECMO, extracorporeal membrane oxygenation, an advanced life support technique used for patients with life-threatening heart and/or lung problems.
