### Data Table for Total Cases by State/Territory

CDC | Updated: Feb 4 2021 5:20PM [Download Data](#)

State/Territory	Total Cases	Confirmed	Probable
California	3,281,271	0	0
Texas	2,433,110	0	0
Florida	1,712,326	0	0
Illinois	1,134,231	1,134,231	0
Georgia	922,364	759,228	163,136
Ohio	906,727	788,126	118,601
Pennsylvania	853,616	741,617	111,999
New York*	822,958	0	0
North Carolina	776,307	687,750	88,557
Arizona	767,379	718,486	48,893
Tennessee	733,216	620,684	112,532
New Jersey	705,807	631,309	74,498
Indiana	631,331	0	0
New York City*	625,021	534,279	90,742
Michigan	615,860	563,893	51,967
Wisconsin	595,756	545,437	50,319
Virginia	516,398	412,548	103,850
Massachusetts	514,460	504,564	9,896
Alabama	465,056	365,818	99,238
Minnesota	463,766	0	0
Missouri	463,119	0	0
South Carolina	450,794	402,361	48,433
Louisiana	406,235	0	0
Oklahoma	400,526	313,143	87,383
Colorado	399,267	379,175	20,092
Kentucky	369,519	288,244	81,275
Maryland	359,037	0	0
Utah	350,000	350,000	0
Iowa	321,836	0	0
Washington	316,294	0	0
Arkansas	300,430	0	0
Nevada	280,707	0	0
Kansas	278,915	228,530	50,385
Mississippi	278,532	175,202	103,330
Connecticut	257,004	241,353	15,651
Nebraska	192,547	0	0
New Mexico	175,652	0	0
Idaho	164,163	133,631	30,532
Oregon	144,605	142,885	1,720
West Virginia	122,470	98,180	24,290
Rhode Island	116,704	0	0
South Dakota	108,639	0	0
North Dakota	98,034	93,546	4,488
Puerto Rico	94,984	88,060	6,924
Montana	94,810	94,810	0
Delaware	78,982	75,074	3,908
New Hampshire	66,721	0	0
Alaska	52,956	0	0
Wyoming	52,288	44,604	7,684
Maine	40,533	32,537	7,996
District of Columbia	37,199	0	0
Hawaii	25,343	0	0
Vermont	12,329	0	0
Guam	7,622	0	0
Virgin Islands	2,440	0	0
Northern Mariana Islands	133	133	0
Republic of Marshall Islands	4	4	0
American Samoa	3	0	0
Federated States of Micronesia	1	1	0
Palau	0	0	0

<sup>†</sup>Data will update as soon as they are reviewed and verified, oftentimes before 8 pm ET. However, daily updates might be delayed due to delays in reported data.

**Data Sources, References & Notes:** The case classifications for COVID-19, a nationally notifiable disease, are described in an [an updated interim COVID-19 position statement and case definition](#) issued by the Council of State and Territorial Epidemiologists on August 5, 2020. However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at [CDC's COVID-19 FAQ webpage](#).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A. For aggregate state level data, CDC calculates the number of new cases or deaths each day by calculating the difference in cumulative counts reported by the state from the day before. Historical data are not typically updated unless requested by the state. Therefore, the number of historical cases and deaths presented on CDC's website reflect the date the data was reported to CDC and not necessarily the date the case or death was recorded in the state.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau's [2019\\* American Community Survey 1-year estimates](#). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019\* American Community Survey 1-year estimates.

\*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
