ing of the National Vaccine program on 12/14/2020 (n=4007) are not included in a cumulative count of total of doses administered in the CDC COVID Tracker.

People receiving 1 or more doses represent the total number of people who have received at least one dose of vaccine. People receiving 2 doses represent the number of people who have also received a second dose of vaccine. \*\*The number of people receiving 1 or more doses and the number of people receiving 2 doses were determined based on information reported to CDC by state, territorial, and local public health agencies and federal entities on the date of administration date, recipient ID, and date of submission. Because the method used to determine dose numbers needs to be applied across multiple jurisdictions with different reporting practices, CDC's dose number estimates might differ from those reported by jurisdictions and federal entities. A dose number was determined for nearly all reported doses administered but, because there are some missing data for dose number, the sum of people receiving 1 or more doses and people receiving 2 doses will not exactly equal the total doses administered. Moreover, second dose numbers reported within the first three weeks of the

Cumulative counts represent the total number of reported doses administered, the total number of people receiving 1 or more doses, and the total number of people receiving 2 doses by date of vaccine administration from the start of the vaccination program up to the current date.

Daily counts represent the number of reported doses administered, the number of people receiving 1 or more doses, and the number of people receiving 2 doses by date of vaccine administration. This represents the actual date a person received the vaccine.

Daily change reported represents the daily change in the cumulative counts reported to CDC for the total number of doses administered in the United States. The
