United States COVID-19 Cases and Deaths by State

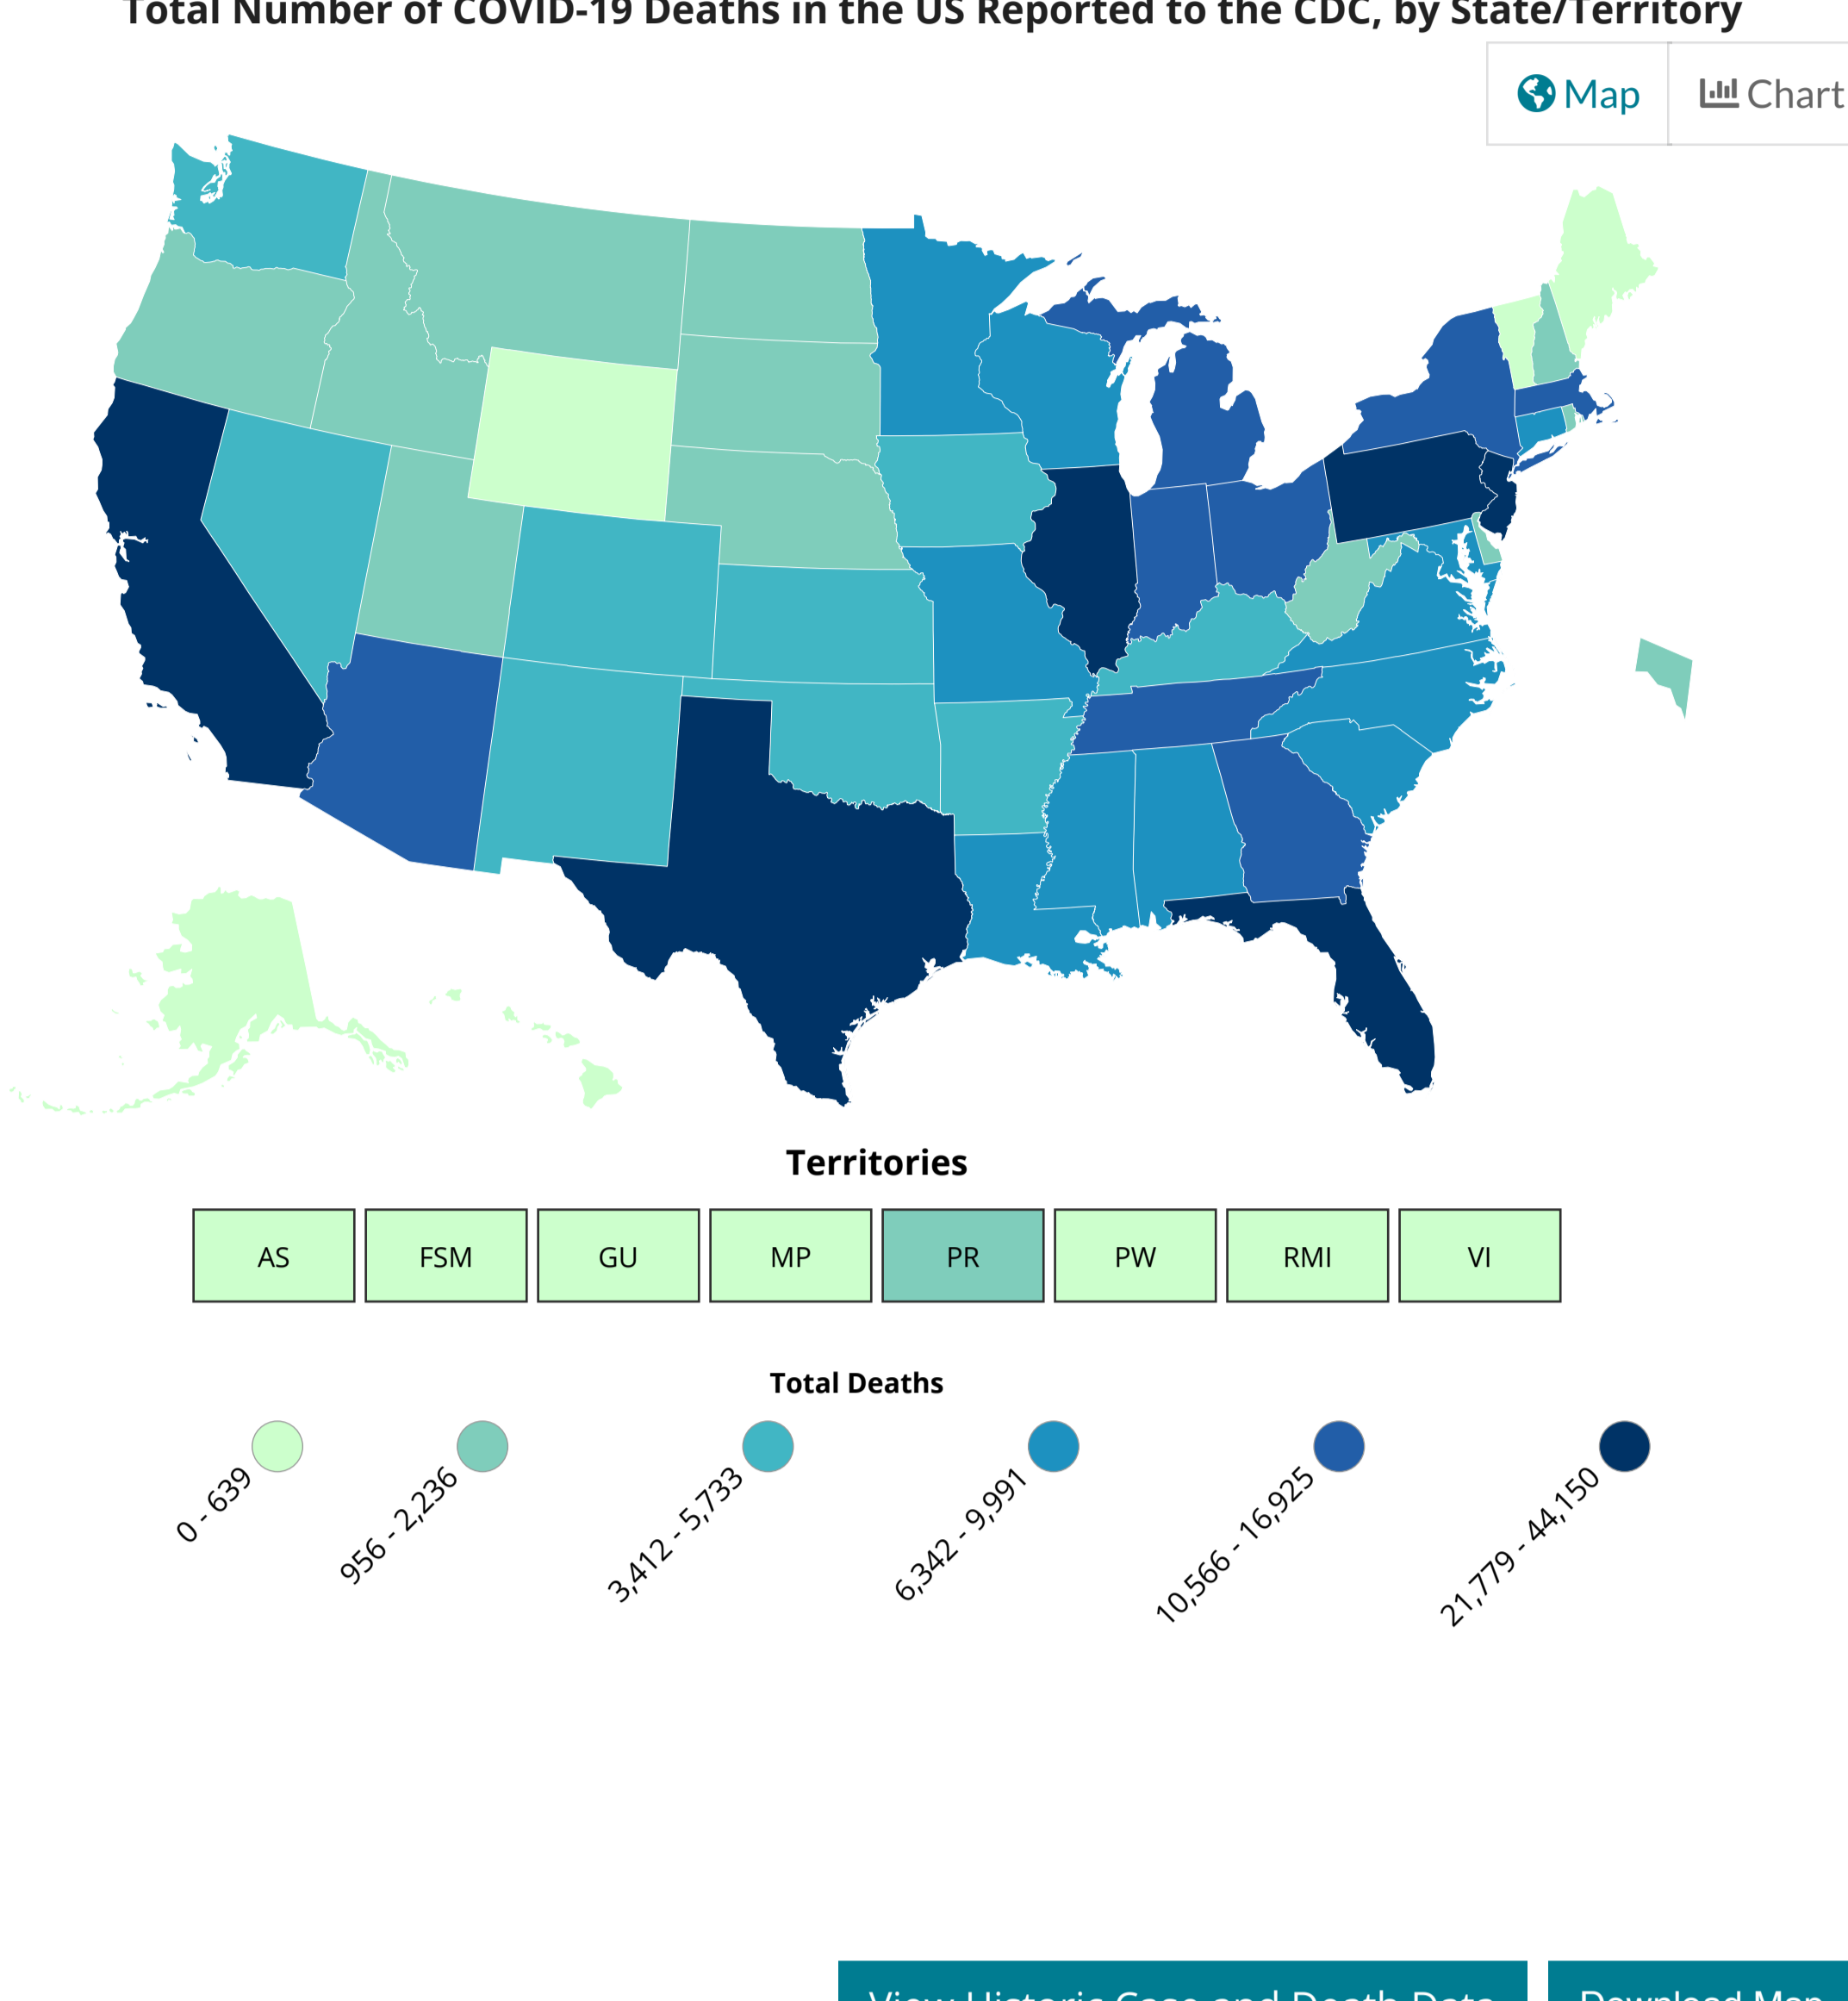

Maps, charts, and data provided by the CDC, updated daily by 8 pm ET†

View: Cases Deaths
Time period: Last 7 Days Since Jan 21, 2020
Metric: Count Rate per 100,000

This shows the total number of deaths since the pandemic started.

Total Number of COVID-19 Deaths in the US Reported to the CDC, by State/Territory

Data Table for Total Deaths by State/Territory

CDC | Updated: Feb 9 2021 1:41PM [Download Data](#)

State/Territory	Total Deaths	Confirmed	Probable
California	44,150	N/A	N/A
Texas	38,700	N/A	N/A
New York City*	27,857	22,820	5,037
Florida	27,816	N/A	N/A
Pennsylvania	22,471	N/A	N/A
New Jersey	22,011	19,824	2,187
Illinois	21,779	19,668	2,111
New York*	16,925	N/A	N/A
Michigan	15,863	14,905	958
Georgia	15,130	13,361	1,769
Massachusetts	14,961	14,753	208
Arizona	14,055	12,487	1,568
Indiana	11,875	11,459	416
Ohio	11,695	10,384	1,311
Tennessee	10,566	8,536	2,030
North Carolina	9,991	8,958	1,033
Louisiana	9,142	8,541	601
Alabama	8,523	6,753	1,770
South Carolina	7,690	6,881	809
Maryland	7,413	7,234	179
Connecticut	7,282	5,966	1,316
Missouri	7,149	N/A	N/A
Virginia	6,898	5,932	966
Wisconsin	6,614	6,055	559
Minnesota	6,370	6,041	329
Mississippi	6,342	4,522	1,820
Colorado	5,733	5,020	713
Iowa	5,110	N/A	N/A
Arkansas	5,106	N/A	N/A
Nevada	4,522	N/A	N/A
Washington	4,451	N/A	N/A
Kansas	4,197	N/A	N/A
Kentucky	4,091	3,720	371
Oklahoma	3,879	3,434	445
New Mexico	3,412	N/A	N/A
Rhode Island	2,236	N/A	N/A
West Virginia	2,131	N/A	N/A
Oregon	2,024	2,009	15
Nebraska	1,978	N/A	N/A
Puerto Rico	1,893	1,599	294
South Dakota	1,809	1,463	346
Idaho	1,776	1,562	214
Utah	1,738	1,685	53
North Dakota	1,427	N/A	N/A
Montana	1,314	1,314	0
Delaware	1,208	1,091	117
New Hampshire	1,106	N/A	N/A
District of Columbia	956	N/A	N/A
Maine	639	626	13
Wyoming	624	624	0
Hawaii	415	N/A	N/A
Alaska	277	N/A	N/A
Vermont	183	N/A	N/A
Guam	130	N/A	N/A
Virgin Islands	24	N/A	N/A
Northern Mariana Islands	2	2	0
American Samoa	0	N/A	N/A
Federated States of Micronesia	0	N/A	N/A
Palau	0	N/A	N/A
Republic of Marshall Islands	0	N/A	N/A

† Data will update as soon as they are reviewed and verified, oftentimes before 8 pm ET. However, daily updates might be delayed due to delays in reported data.

On 4 February 2021, a state reported 1,507 new deaths. CDC is working with the state to assess the time period from which these data cover. This may temporarily impact death counts, rates and averages.

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an [an updated interim COVID-19 position statement and case definition](#) issued by the Council of State and Territorial Epidemiologists on August 5, 2020. However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at [CDC's COVID-19 FAQ webpage](#).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding NYC. COVID-19 case and death counts that are not available to CDC are denoted by N/A. For aggregate state level data, CDC calculates the number of new cases or deaths each day by calculating the difference in cumulative counts reported by the state from the day before. Historical data are not typically updated unless requested by the state. Therefore, the number of historical cases and deaths presented on CDC's website reflect the date the data was reported to CDC and not necessarily the date the case or death was recorded in the state.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). Totals per 100,000 people in the last 7 days are calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the U.S. Census Bureau, 2019* [American Community Survey 1-year estimates](#). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the U.S. Census Bureau, 2019* American Community Survey 1-year estimates.

*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This significantly affects the 7-day rolling average of new cases in both Texas and the U.S. during this time period and correspondingly affects the 7-day rolling average of new cases.
