○ People Receiving 2 Doses

**Daily Count of People Receiving 1 or More Doses Reported to the CDC by Date Administered**

The chart displays the daily count of people receiving 1 or more COVID-19 doses reported to the CDC by date administered. The y-axis represents the count in millions (M), ranging from 0 to 1.3M. The x-axis represents the date, spanning from late 2020 to mid-2021. The data shows a sharp increase in daily counts starting in late 2020, peaking in early 2021, and then fluctuating at high levels through mid-2021.

| Date       | Count (Millions) |
|------------|------------------|
| 2020-12-15 | 0.0              |
| 2020-12-20 | 0.0              |

[View and Download](#) COVID-19 Case Surveillance Public Use Data

Data shown include the total number of doses administered and people receiving doses of vaccine for the United States. We also show these for the [Federal](#)

Pharmacy Partnership for Long-Term Care (LTC) Program, which is a subset of the United States total. The data are shown in three ways: 1) the cumulative total of doses or people receiving vaccinations by administration date, 2) the daily count of total doses or people receiving vaccinations by administration date, and 3) the daily change in cumulative total doses administered by the date data are reported on CDC COVID Data Tracker.

Only change in

Bars shown in the darker blue shade represent the most recent five days of reporting where the number of vaccine administrations might be impacted the most due to delays in reporting. All reported numbers might change over time as historical data are reported to the CDC.

Doses reported as administered before the official beginning of the national vaccine program on 12/14/2020 (N=4,867) are not included in the figures but are included in the data table as "N/A" and included in the cumulative count of total of doses administered in the CDC COVID Tracker.

Definitions:

Total doses administered are counts of individual COVID-19 vaccine doses administered as reported to CDC by state, territorial, and local public health agencies and federal entities since December 14, 2020.

People receiving 1 or more doses represent the total number of people who have received at least one dose of vaccine. People receiving 2 doses represent the number of people who have also received a second dose of vaccine. \*\*The number of people receiving 1 or more doses and the number of people receiving 2 doses were determined based on information reported by CDC by age, geographic, and health status group, and by federal, state, and local health department.

dosages were determined based on information reported to CDC by state, territorial, and local public health agencies and federal entities on dose number, administration date, recipient ID, and date of submission. Because the method used to determine dose numbers needs to be applied across multiple jurisdictions with different reporting practices, CDC's dose number estimates might differ from those reported by jurisdictions and federal entities. A dose number was

determined for nearly all reported doses administered but, because there are some missing data for dose number, the sum of people receiving 1 or more doses and people receiving 2 doses will not exactly equal the total doses administered. Moreover, second dose numbers reported within the first three weeks of the
