Data on COVID-19 during Pregnancy: Severity of Maternal Illness

Monitoring the impact of COVID-19 during pregnancy can protect pregnant women and their babies; Maps, charts, and data provided by the CDC

Pregnant women¹ with COVID-19, United States, January 22, 2020 - February 15, 2021

Pregnant women with COVID-19 by age, United States, January 22, 2020 - February 15, 2021

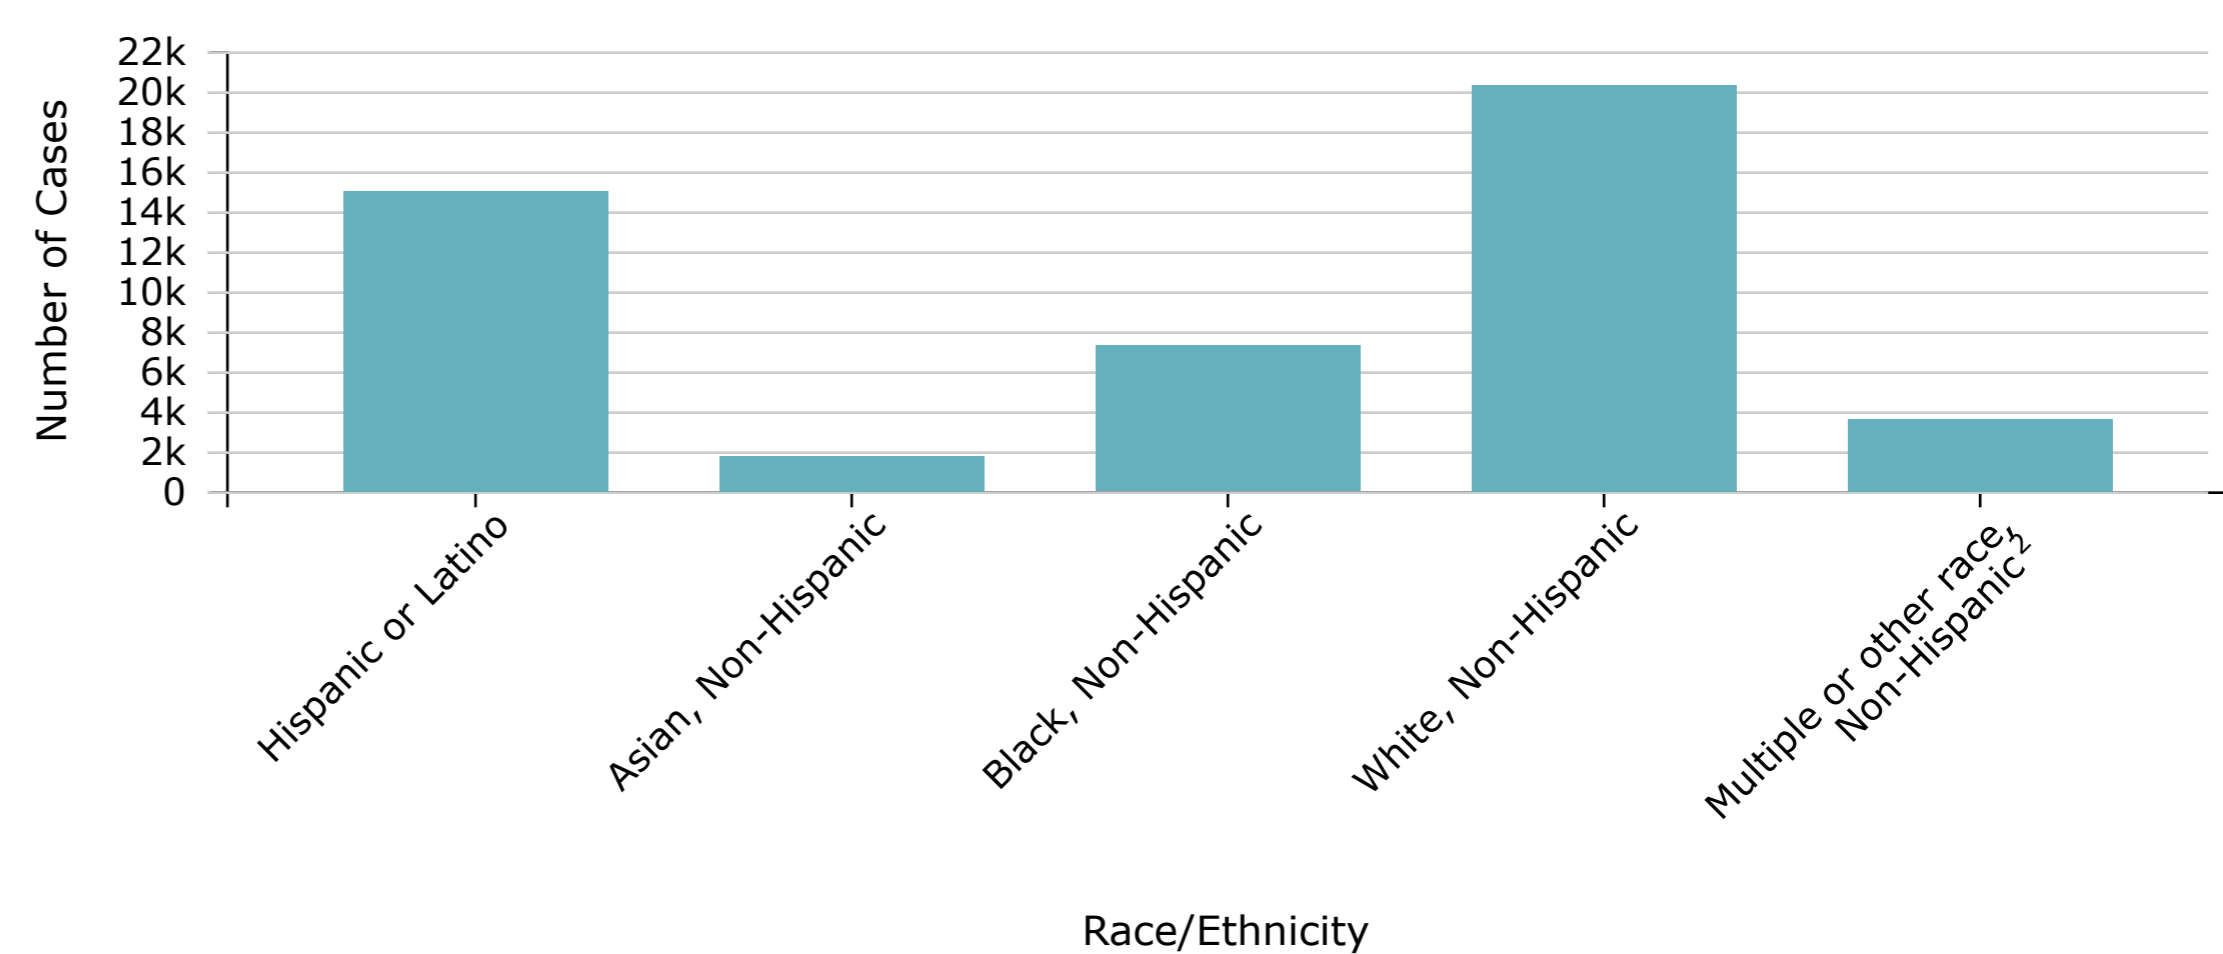

Data were collected from 67,356 women, and age was available for 67,356 (100%) women.

Download Chart

Pregnant women with COVID-19 by race/ethnicity, United States, January 22, 2020 - February 15, 2021

Data were collected from 67,356 women, but race/ethnicity was only available for 48,000 (71.3%) women.

Download Chart

Pregnant Women with COVID-19 who were hospitalized, United States, January 22, 2020 - February 15, 2021

Data were collected from 67,356 women, but hospitalization data were only available for 54,520 (80.9%).

Pregnant women with COVID-19 admitted to the ICU, who required invasive ventilation, or who required ECMO, United States, January 22, 2020 - February 15, 2021

Data were collected from 67,356 women, but ICU admission data were only available for 10,789 (16%) women, invasive ventilation data were only available for 7,408 (11%) women, and ECMO data were only available for 8,016 (11.9%).

Data Table for COVID-19 during Pregnancy

CDC | Updated: February 15, 2021

Download Data

Category	Value
Total Cases	67356
Total Deaths	76
Total Cases with Known Age	67356
Total Cases with Unknown Age	0
Percent Cases with Known Age	100
Cases less than 15 years	152
Cases 15 to 19 years	3382
Cases 20 to 24 years	13976
Cases 25 to 29 years	20347
Cases 30 to 34 years	17395
Cases 35 to 39 years	8791
Cases 40 to 44 years	2385
Cases 45 to 49 years	531
Cases 50 to 54 years	397
Total Cases with Known Race/Ethnicity	48000
Percent Cases with Known Race/Ethnicity	71.3
Total Cases Hispanic or Latino	15019
Total Cases Asian, Non-Hispanic	1753
Total Cases Black, Non-Hispanic	7285
Total Cases White, Non-Hispanic	20332
Total Cases Multiple, Non-Hispanic	3611
Total Hospitalized Cases	11445
Total Cases Known Hospitalization Status	54520
Percent with Known Hospitalization Status	80.9
Total Cases with Known ICU Status	10789
Percent with Known ICU Status	16
Total Cases with Known Ventilation Status	7408
Percent with Known Ventilation Status	11
Total Cases with Known ECMO Status	8016
Percent with Known ECMO Status	11.9
Total ICU Cases	346
Total Ventilation Cases	84
Total ECMO Cases	19

About the Data: This page is updated weekly. The cases reported are only confirmed cases with laboratory evidence of SARS-CoV-2 infection.

There are currently 56 U.S.-affiliated jurisdictions reporting cases of COVID-19. This includes 50 states, District of Columbia, Guam, New York City, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Because only about a third of case report forms include information on pregnancy status, these numbers likely do not include all pregnant women with COVID-19 in the United States and must be interpreted with caution. The completeness of this variable continues to improve each week. Increases in the total number of cases of COVID-19 among pregnant women are largely due to the updating of pregnancy status among already reported cases. Case numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall case numbers are validated through a confirmation process with each jurisdiction. Differences between reporting jurisdictions and CDC's website may occur because of the timing of reporting and website updates. The process used for finding and confirming cases displayed by other sites may differ. Case counts may fluctuate from week to week due to data quality and cleaning processes.

As of October 2020, CDC will exclude reporting of cases of COVID-19 among pregnant women who are younger than age 9 and older than age 54 in the weekly reporting. Based on review of data quality, cases reported as pregnant with ages less than 9 or greater than 54 are less likely to be true pregnancies, and more likely to be data errors. Cases with unknown age are still included.

For more information on how CDC collects COVID-19 surveillance data, see [FAQ COVID-19 Data and Surveillance](#)

For surveillance data on birth and infant outcomes from the Surveillance for Emerging Threats to Mothers and Babies Network (SET-NET) see [COVID-19 during Pregnancy: Birth and Infant Outcomes](#)
