

# Public Health 101: History and Structure

**Note:** This slide set is in the public domain and may be customized as needed by the user for informational or educational purposes. Permission from the Centers for Disease Control and Prevention is not required, but citation of the source is appreciated.

# Topics

---

## Introduction to Public Health

1. Public Health Definition
2. History of Public Health
3. A Public Health Approach
4. Stakeholder Roles in Public Health

# Learning Objectives

---

- Define and describe the purpose of public health
- Identify prominent events in the history of public health
- Describe stakeholders in the field of public health
- Describe the structure of public health

# Public Health Defined

---

Photo: IF Fisher and EL Fisk

*“The science and art of preventing disease, prolonging life, and promoting health through the organized efforts and informed choices of society, organizations, public and private communities, and individuals.”*

—CEA Winslow

# The Mission of Public Health

---

*“Fulfilling society’s interest in assuring conditions in which people can be healthy.”*

—Institute of Medicine

*“Public health aims to provide maximum benefit for the largest number of people.”*

—World Health Organization

# The History of Public Health

# Sanitation and Environmental Health

---

500 BCE

Greeks and Romans practice community sanitation measures

1840s

The Public Health Act of 1848 was established in the United Kingdom

1970

The Environmental Protection Agency was founded

# Pandemics

---

## Influenza

500 million infected  
worldwide in 1918

## Polio

Vaccine introduced  
in 1955; eradication  
initiative launched in  
1988

## HIV

34 million living with  
HIV worldwide; 20%  
decline in new  
infections since 2001

# Preparedness for Disaster Response

---

## Biologic Warfare

Plague used as a weapon of war during the Siege of Kaffa

## September 2001

Public health surveillance conducted after the 9/11 attacks

## Hurricane Katrina

Emergency services, public health surveillance, and disease treatment provided

# Prevention Through Policy

## Book of Leviticus

The world's first written health code

## Tobacco Laws

Laws banning smoking in public places

## Obesity

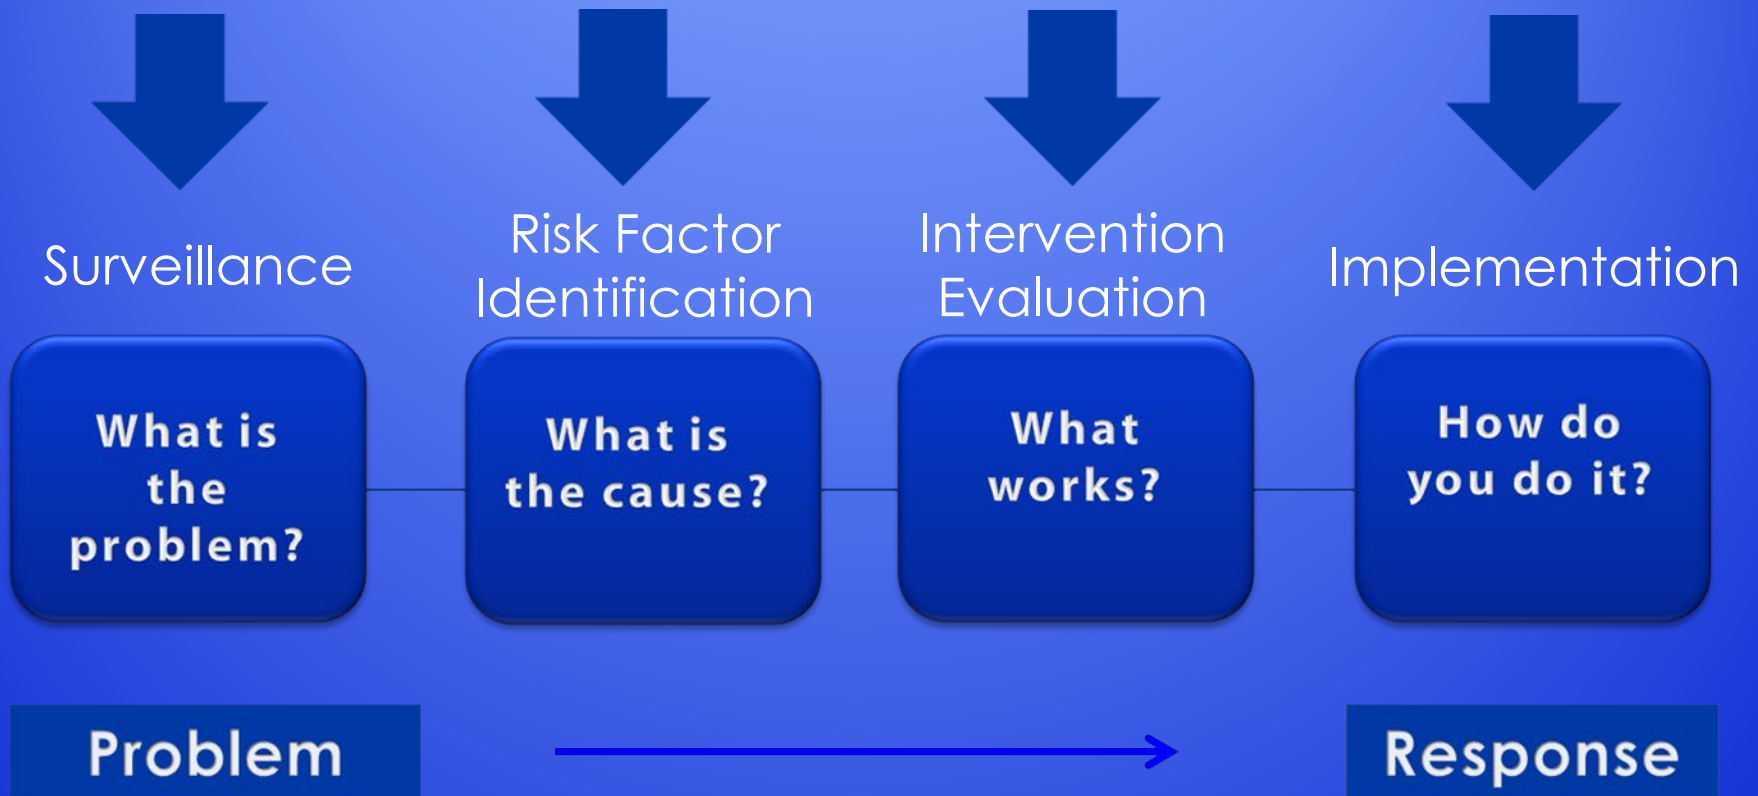

Food labeling and promotion of physical activity

# A Public Health Approach

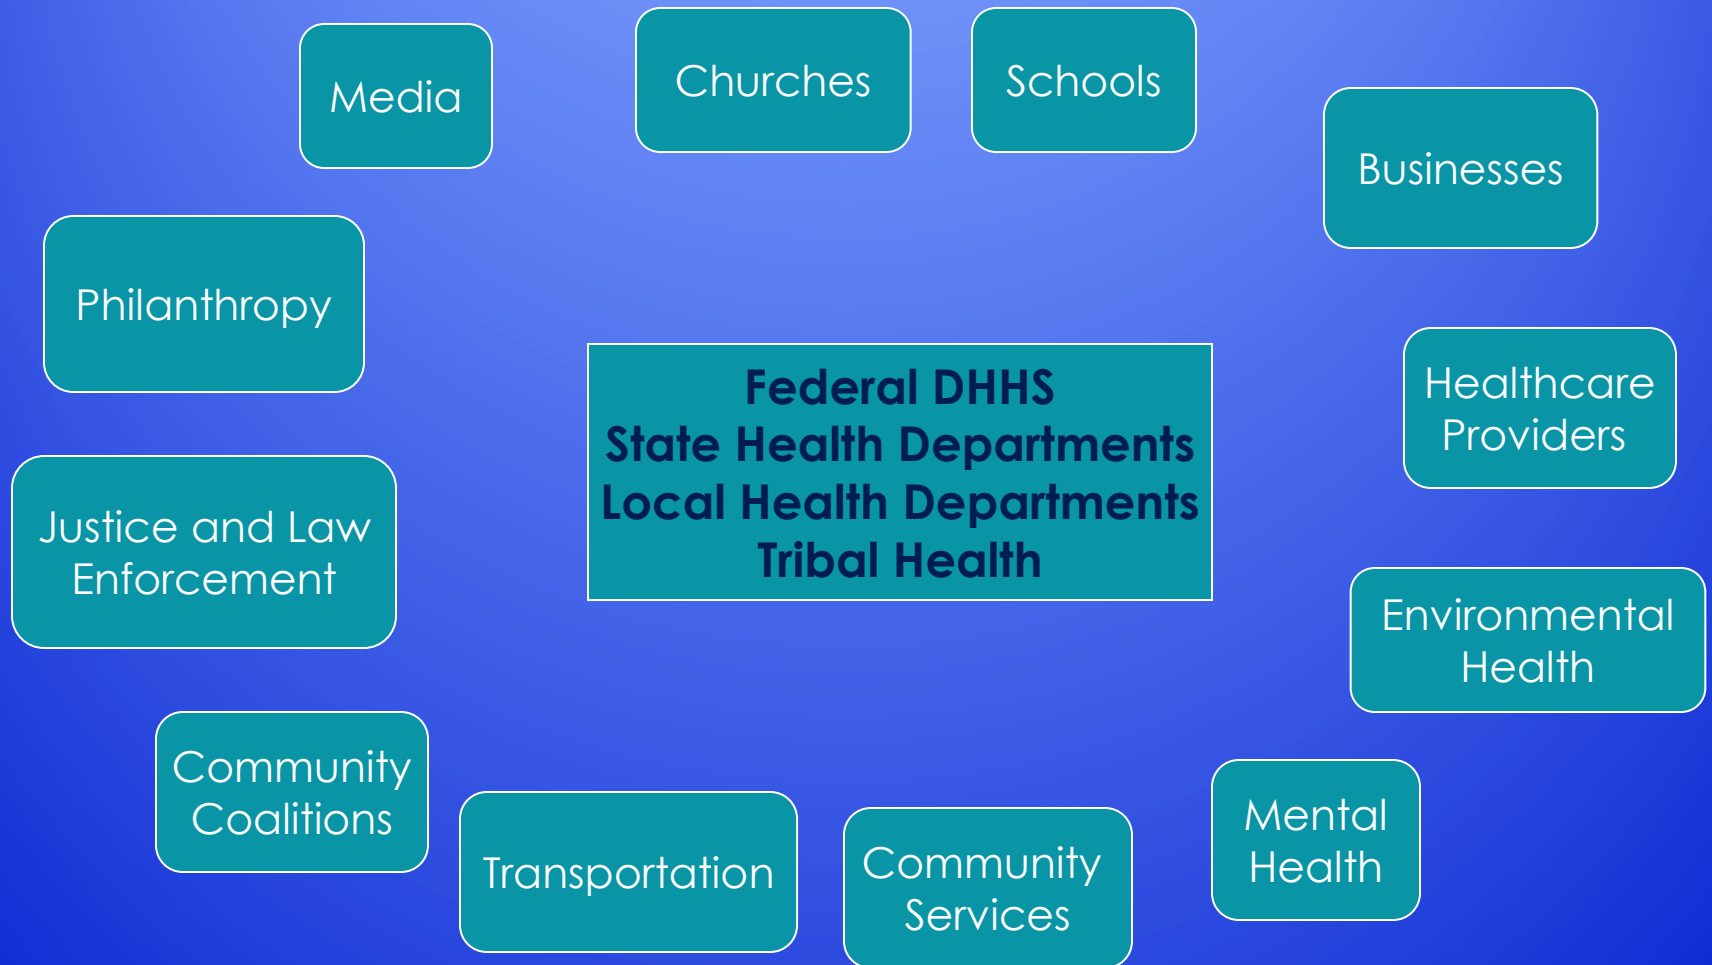

# A Public Health Approach

---

# A system of partnerships that includes, but is not limited to . . .

# Cholera — A Public Health Approach

---

Photo: TJ Kirn, MJ Lafferty, CMP Sandoe, and R Taylor,  
Dartmouth Medical School

Cholera, a fatal intestinal disease, was rampant during the early 1800s in London, causing death to tens of thousands of people in the area. Cholera was commonly thought to be caused by bad air from rotting organic matter.

# John Snow, Physician

---

Photo: London School of Hygiene  
and Tropical Medicine

John Snow is best known for his work tracing the source of the cholera outbreak and is considered the father of modern epidemiology.

# Epidemiology — What is the Problem?

Cluster of Cholera Cases, London — 1854

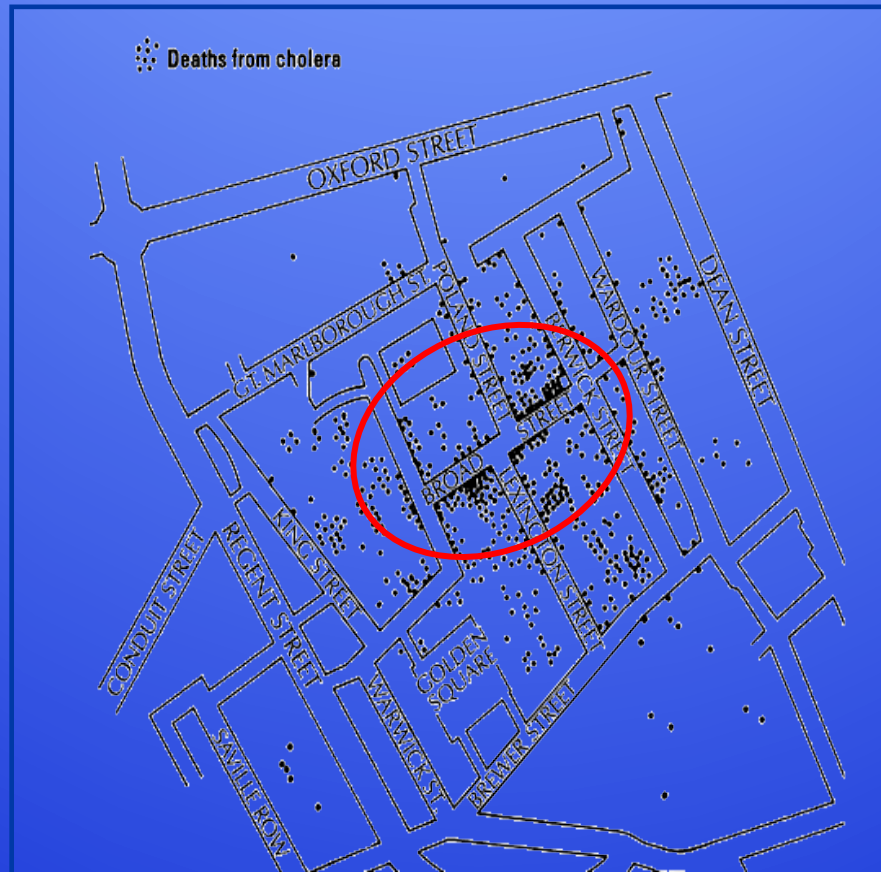

Image: The Geographical Journal

# Risk Factor Identification — What Is the Cause?

## Cluster of Cholera Cases and Pump Site Locations

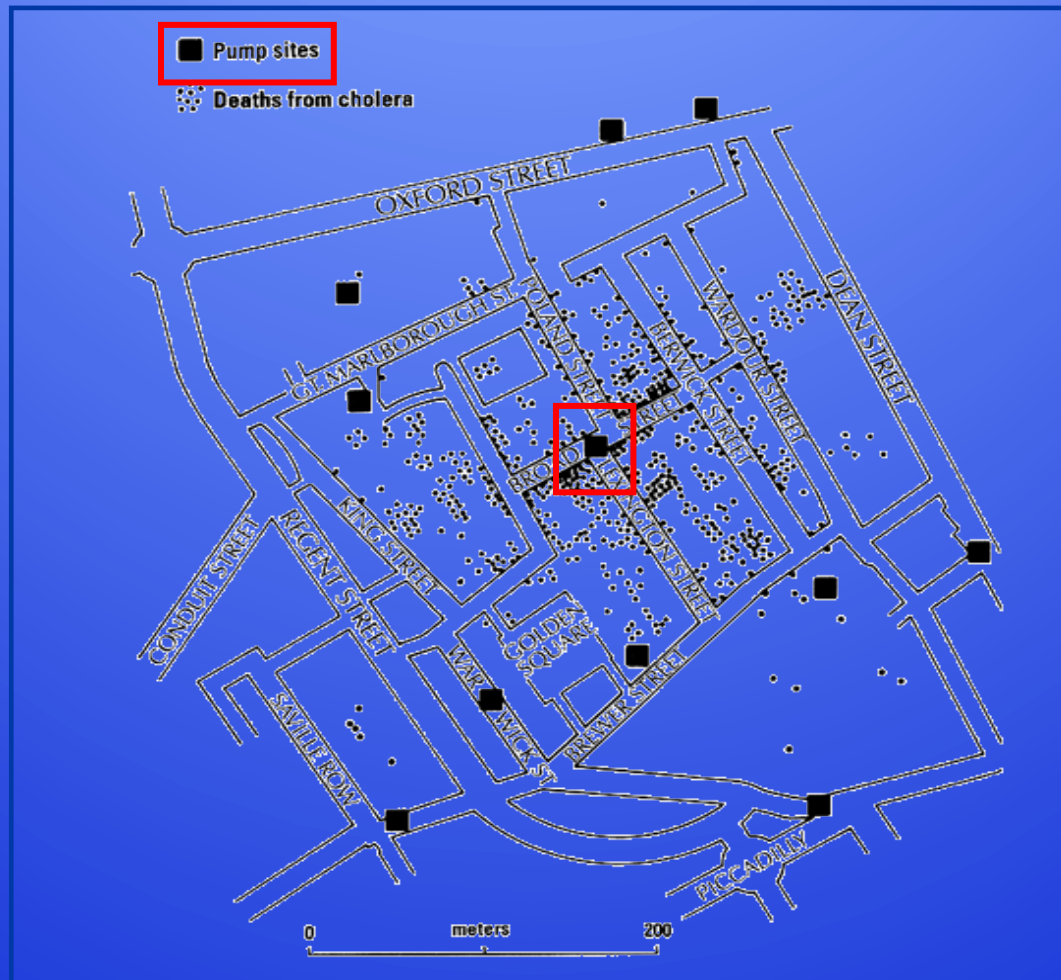

Image: The Geographical Journal

# Intervention Evaluation — What Works?

---

Through continuous research, Snow understood what interventions were required to

- stop exposure to the contaminated water supply on a larger scale, and
- stop exposure to the entire supply of contaminated water in the area

# Implementation — How Do You Do It?

---

Photo: Justin Cormack

John Snow's research convinced the British government that the source of cholera was water contaminated with sewage

# Structure of Public Health in the United States

Office for State, Tribal, Local and Territorial Support

Centers for Disease Control and Prevention

# Governmental Public Health

## State and Local Health Departments

Retain the primary responsibility for health under the US Constitution

\* Number based on 2010 National Profile of Local Health Departments (NACCHO, 2011)

\*\* Numbers cited from *ASTHO, Profile of State Public Health, Volume Two, 2011*

# **Federal Public Health**

## **Roles and Responsibilities**

# Federal Public Health Responsibilities

- Ensure all levels of government have the capabilities to provide essential public health services
- Act when health threats may span more than one state, a region, or the entire nation
- Act where the solutions may be beyond the jurisdiction of individual states
- Act to assist the states when they lack the expertise or resources to effectively respond in a public health emergency (e.g., a disaster, bioterrorism, or an emerging disease)
- Facilitate the formulation of public health goals (in collaboration with state and local governments and other relevant stakeholders)

Source: Trust for America's Health. *Public Health Leadership Initiative: An Action Plan for Healthy People in Healthy Communities in the 21st Century*. Washington, DC. 2006.

# Other Roles of Federal Public Health

Federal government plays a crucial role in

- Providing leadership, through regulatory powers, in setting health
  - Goals
  - Policies
  - Standards
- Contributing operational and financial resources
- Financing research and higher education
- Supporting the development of scientific and technological tools needed to improve the effectiveness of public health infrastructure at all levels

# **State Health Departments Roles and Responsibilities**

# State Roles

- Screening for diseases and conditions
- Treatment for diseases
- Technical assistance and training
- State laboratory services
- Epidemiology and surveillance

# **Local Health Departments Roles and Responsibilities**

## Six Required Services of Wisconsin LHDs:

1. Communicable disease surveillance, prevention and control
2. Generalized public health nursing program
3. Services to promote health
4. Services to prevent other diseases
5. Abatement or removal of human health hazards
6. Services to prevent the future incidence of occupational disease, environmental disease and human health hazard exposure

# State and Local Health Department Governance Classification System

- **Mixed**—Some local health departments are led by state government, and some are led by local government. No one arrangement predominates in the state.
- **State/Centralized**—All local health departments are units of state government, which makes most fiscal decisions.
- **Shared**—All local health departments are governed by both state and local authorities.
- **Local/Decentralized**—Local health departments are units led by local governments, which make most fiscal decisions.

# Wisconsin Local Governance

- Constitutional Home Rule
  - Allows municipalities to determine their local affairs and government
- Statutory Home Rule
  - Except as otherwise provided by law, management and control of the municipality's property, finances, highways, navigable waters, and the public services

# Public Health in American Indian and Alaska Native Tribes

# Tribal Public Health

- **Tribal Health Department**—a corporation or organization operated under the jurisdiction of a federally recognized tribe, or association of federally recognized tribes, and is funded by the tribe(s) and/or contract service(s) from the Indian Health Service (IHS).
- **Tribal Health Organizations**—include Tribal Health Departments, Indian Health Service Units, Area Indian Health Boards and Urban Indian Health Centers (a much broader group, and relates to a variety of entities that might provide health services in a tribal setting).

**QUESTIONS?**
