## Demographic Characteristics of People Receiving COVID-19 Vaccinations in the United States

Overall US COVID-19 Vaccine Distribution and Administration; Maps, charts, and data provided by the CDC, updated daily by 8 pm ET<sup>†</sup>

The Centers for Disease Control and Prevention (CDC) is working with states to provide more information on the demographic characteristics of vaccinated people.

These demographic data only represent the geographic areas that contributed data and might differ by populations prioritized within each state or jurisdiction's vaccination phase. Every geographic area has a different racial and ethnic composition, and not all are in the same vaccination phase. These data are thus not generalizable to the entire US population.

Percentages displayed in the charts below represent the percent of people vaccinated for whom the demographic variable of interest is known.

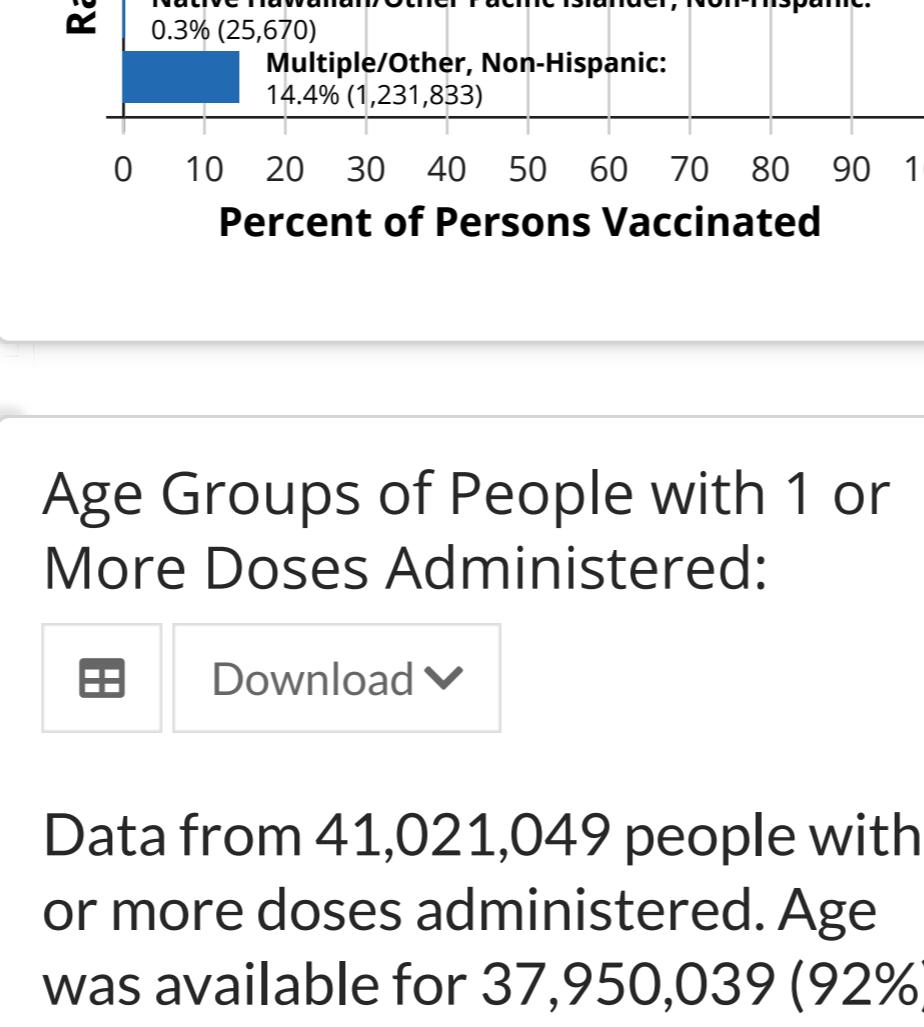

CDC | Updated: Feb 18 2021 12:45PM

## Race/Ethnicity of People with 1 or More Doses Administered:

[Download](#)

Data from 41,021,049 people with 1 or more doses administered.

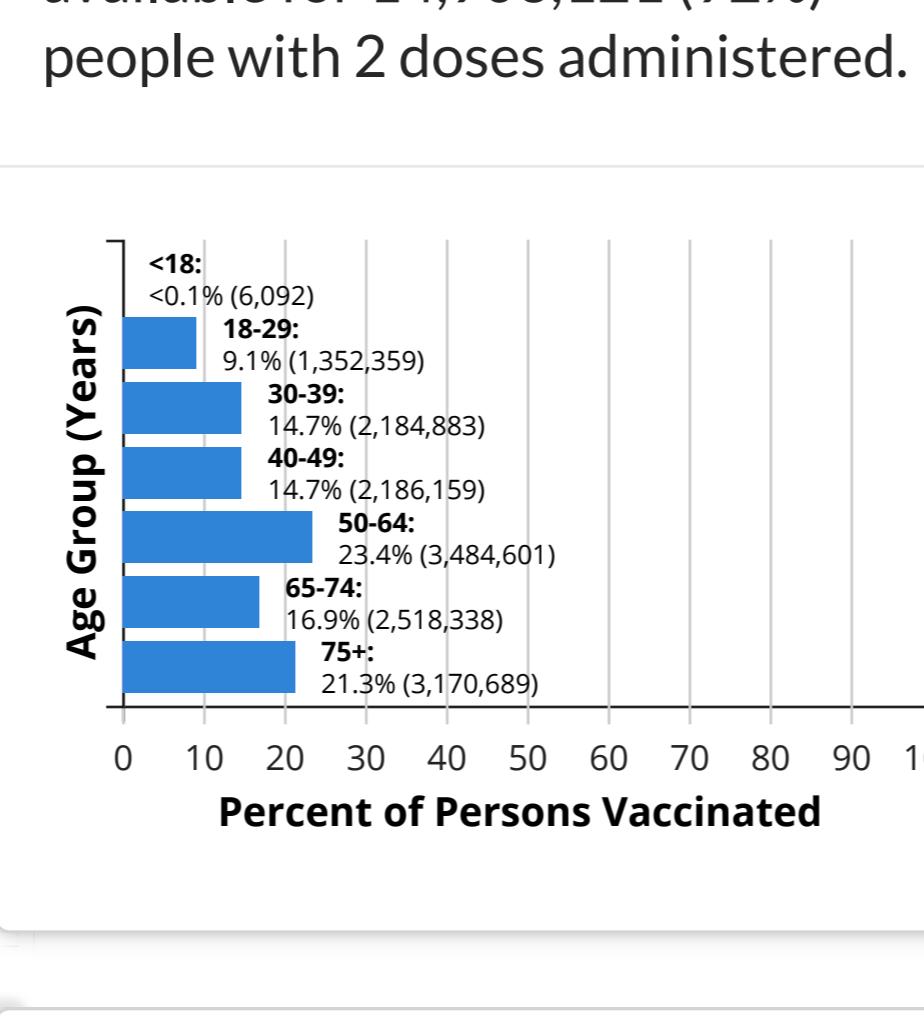

Race/Ethnicity was available for 22,379,400 (54.6%) people with 1 or more doses administered.

## Race/Ethnicity of People with 2 Doses Administered:

[Download](#)

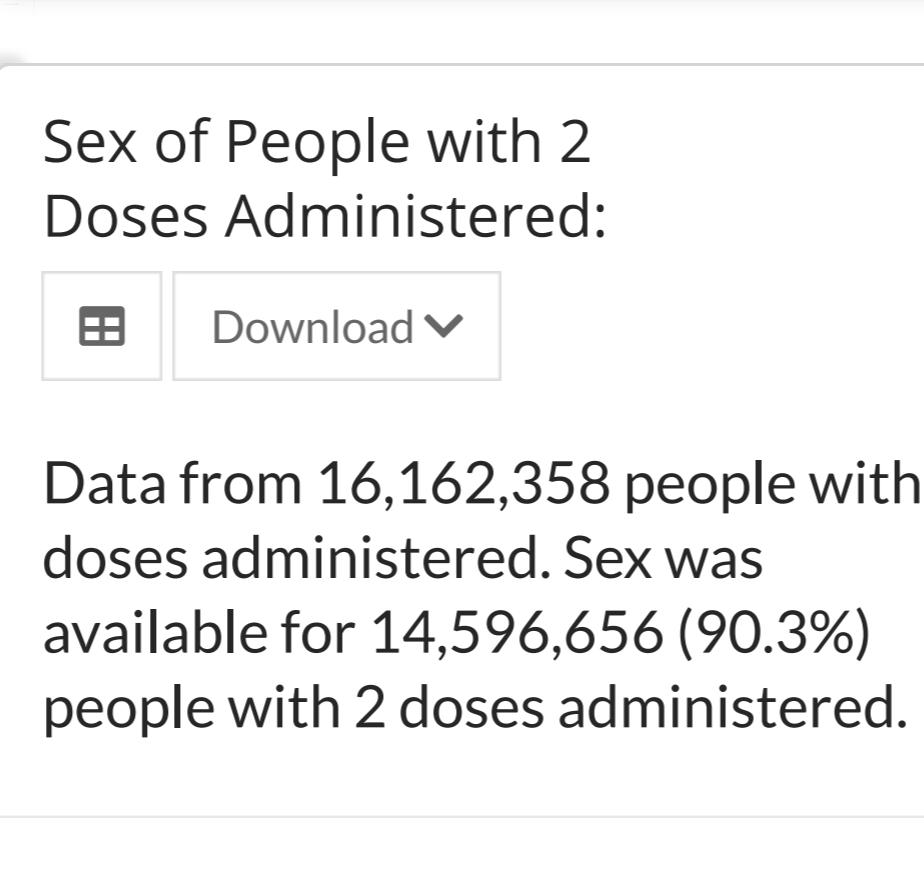

Data from 16,162,358 people with 2 doses administered. Race/Ethnicity was available for 8,543,986 (52.9%) people with 2 doses administered.

## Age Groups of People with 1 or More Doses Administered:

[Download](#)

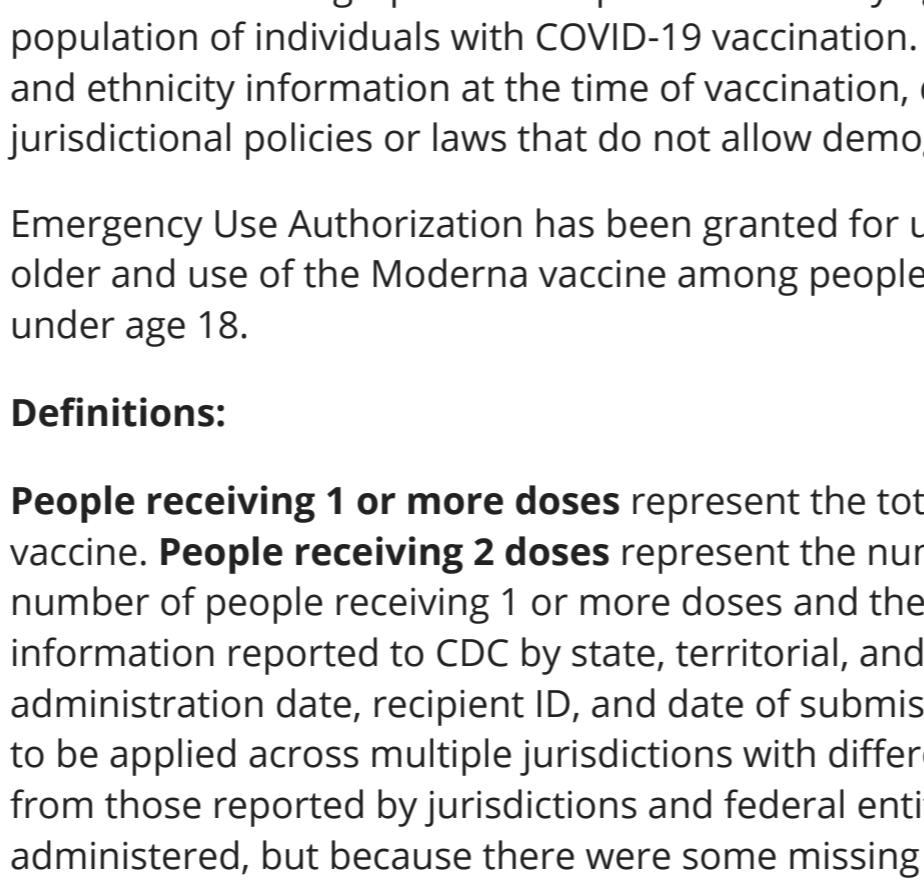

Data from 41,021,049 people with 1 or more doses administered. Age was available for 37,950,039 (92%) people with 1 or more doses administered.

## Age Groups of People with 2 Doses Administered:

[Download](#)

Data from 16,162,358 people with 2 doses administered. Age was available for 14,903,121 (92%) people with 2 doses administered.

## Sex of People with 1 or More Doses Administered:

[Download](#)

Data from 41,021,049 people with 1 or more doses administered. Sex was available for 37,319,388 (91%) people with 1 or more doses administered.

## Sex of People with 2 Doses Administered:

[Download](#)

Data from 16,162,358 people with 2 doses administered. Sex was available for 14,596,656 (90.3%) people with 2 doses administered.

## Definitions:

**People Receiving 1 or more doses** represent the total number of people who have received at least 1 dose, or the number of people receiving 1 or more doses and local public health agencies and federal entities on dose number, administration date, recipient ID, and date of submission. Because the method used to determine dose numbers needs to be applied across multiple jurisdictions and federal entities, a dose number for nearly all reported doses administered, but because there were some missing data for dose number, the sum of people receiving 1 or more doses and people receiving 2 doses will not exactly match the total number of doses administered. People receiving 1 or more doses are attributed to the jurisdiction in which the vaccine was administered.

**People Receiving 1 or more doses** represent the total number of people who have received at least 1 dose, or the number of people receiving 1 or more doses and local public health agencies and federal entities on dose number, administration date, recipient ID, and date of submission.
