United States COVID-19 Cases and Deaths by State

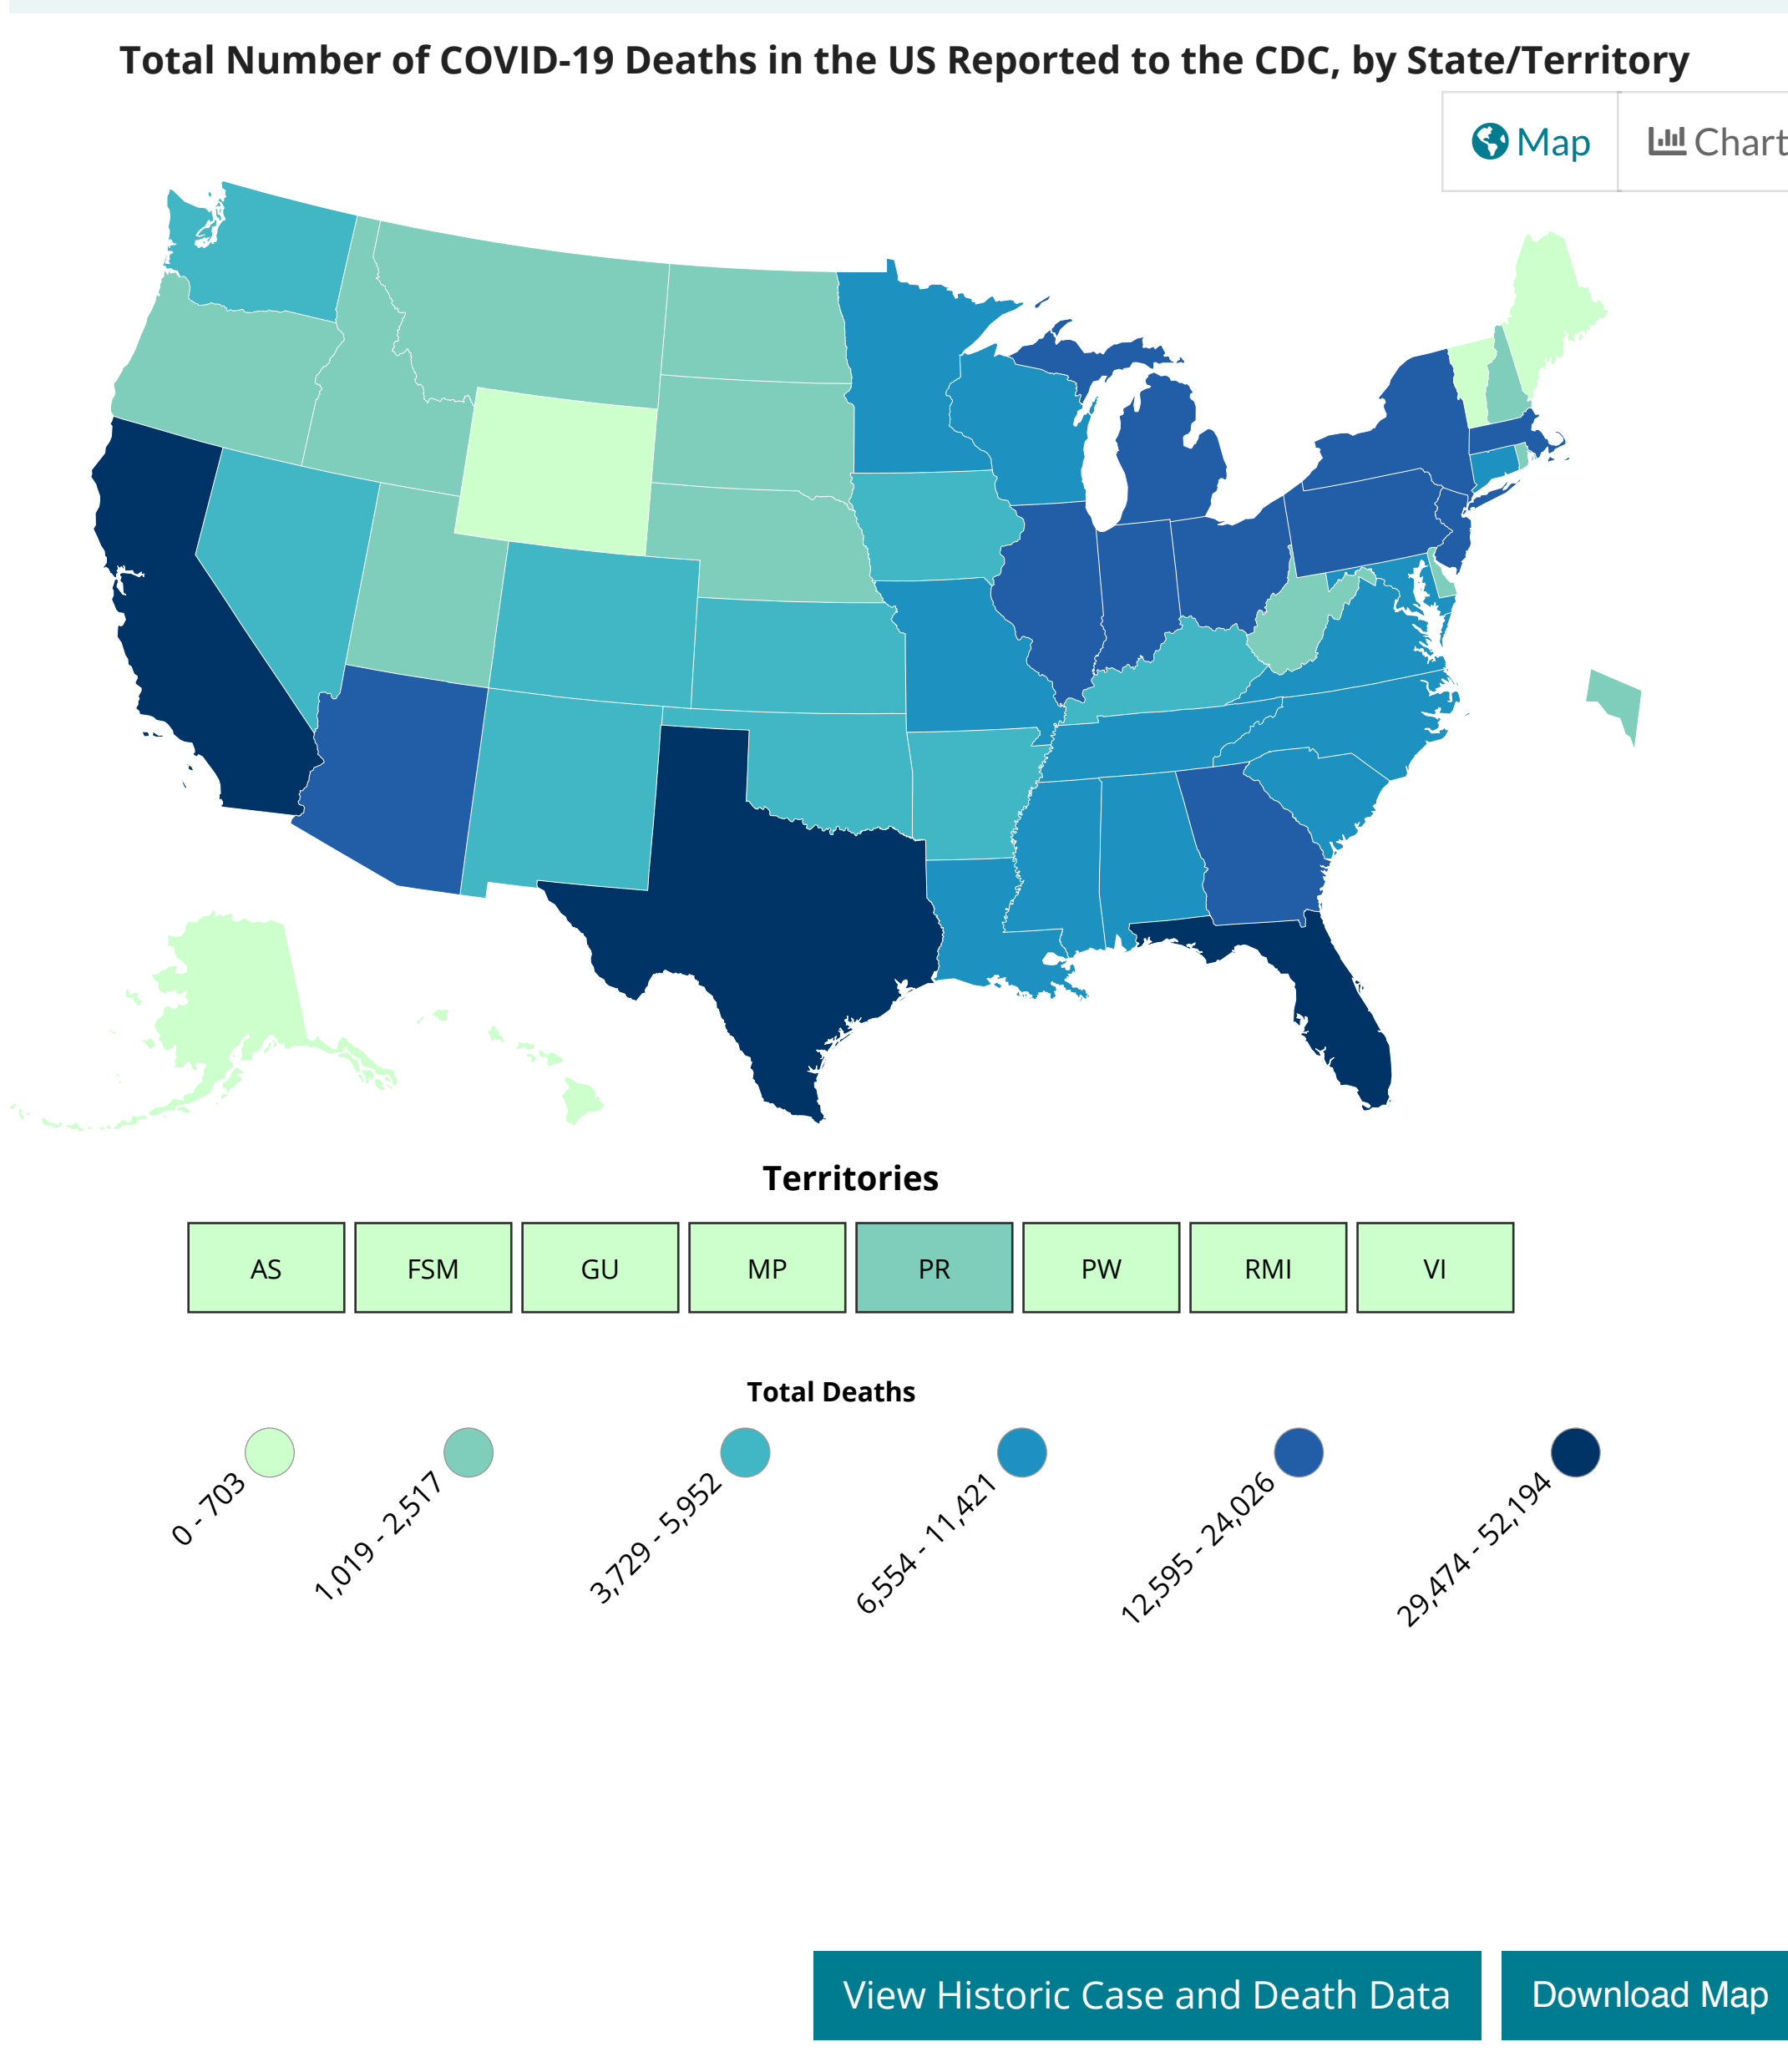

Maps, charts, and data provided by the CDC, updated daily by 8 pm ET†

TOTAL CASES 28,456,860 +50,935 New Cases	DEATHS IN LAST 7 DAYS 14,065	TOTAL DEATHS 513,122 +1,283 New Deaths
--	---	--

CDC | Updated: Mar 2 2021 12:26PM

View: Cases Deaths
Time period: Last 7 Days Since Jan 21, 2020
Metric: Count Rate per 100,000

This shows the total number of deaths since the pandemic started.

Data Table for Total Deaths by State/Territory

CDC | Updated: Mar 2 2021 12:26PM

State/Territory	Total Deaths	Confirmed	Probable
California	52,194	N/A	N/A
Texas	42,995	N/A	N/A
Florida	30,999	N/A	N/A
New York City*	29,474	24,427	5,047
Pennsylvania	24,026	N/A	N/A
New Jersey	23,273	20,942	2,331
Illinois	22,759	20,536	2,223
New York*	18,031	N/A	N/A
Georgia	17,376	15,148	2,228
Ohio	17,346	14,752	2,594
Michigan	16,519	15,534	985
Massachusetts	16,030	15,822	208
Arizona	15,979	14,100	1,879
Indiana	12,595	12,162	433
Tennessee	11,421	9,181	2,240
North Carolina	11,254	9,959	1,295
Alabama	9,931	7,789	2,142
Louisiana	9,628	8,941	687
Virginia	8,943	7,674	1,269
South Carolina	8,567	N/A	N/A
Missouri	7,932	N/A	N/A
Maryland	7,905	7,723	182
Connecticut	7,651	6,280	1,371
Wisconsin	7,014	6,412	602
Mississippi	6,724	4,698	2,026
Minnesota	6,554	6,215	339
Colorado	5,952	5,218	734
Iowa	5,472	N/A	N/A
Arkansas	5,250	N/A	N/A
Washington	4,969	N/A	N/A
Nevada	4,957	N/A	N/A
Kansas	4,744	N/A	N/A
Kentucky	4,652	4,224	428
Oklahoma	4,544	3,983	561
New Mexico	3,729	N/A	N/A
Rhode Island	2,517	N/A	N/A
West Virginia	2,300	N/A	N/A
Oregon	2,212	2,197	15
Nebraska	2,084	N/A	N/A
Puerto Rico	2,040	1,736	304
Utah	1,940	1,884	56
South Dakota	1,888	1,531	357
Idaho	1,867	1,641	226
North Dakota	1,447	N/A	N/A
Delaware	1,422	1,286	136
Montana	1,357	1,357	0
New Hampshire	1,170	N/A	N/A
District of Columbia	1,019	N/A	N/A
Maine	703	680	23
Wyoming	671	671	0
Hawaii	436	N/A	N/A
Alaska	297	N/A	N/A
Vermont	205	N/A	N/A
Guam	131	N/A	N/A
Virgin Islands	25	N/A	N/A
Northern Mariana Islands	2	2	0
American Samoa	0	N/A	N/A
Federated States of Micronesia	0	N/A	N/A
Palau	0	N/A	N/A
Republic of Marshall Islands	0	N/A	N/A

Wondering what all the data mean?
 CDC's new [COVID Data Tracker Weekly Review](#) helps you stay up-to-date on the pandemic with weekly visualizations, analysis, and interpretations of key data and trends.

†Data will update as soon as they are reviewed and verified, oftentimes before 8 pm ET. However, daily updates might be delayed due to delays in reported data.

On 4 February 2021, a state reported 1,507 new deaths. CDC is working with the state to assess the time period from which these data cover. This may temporarily impact death counts, rates and averages.

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an [an updated interim COVID-19 position statement and case definition](#) issued by the Council of State and Territorial Epidemiologists on August 5, 2020. However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at [CDC's COVID-19 FAQ webpage](#).

Total cases are based on aggregate counts of COVID-19 cases reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020, with the exception of persons repatriated to the United States from Wuhan, China, and Japan. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. Counts for NYC and New York State are shown separately; data for New York State show total cases and deaths for the state excluding data for NYC. COVID-19 case and death data that are not available to CDC are denoted by N/A. For aggregate state level data, CDC calculates the number of new cases or deaths each day by calculating the difference in cumulative counts reported by the state from the day before. Historical data are not typically updated unless requested by the state. Therefore, the number of historical cases and deaths presented on CDC's website reflect the date the data was reported to CDC and not necessarily the date the case or death was recorded in the state.

The map can be modified to show cases and deaths per 100,000 people in the last 7 days, total new cases and deaths in the last 7 days, total cases and deaths since January 21, 2020, and rates for cases (cases/100,000 people) and deaths (deaths/100,000). The average daily rate per 100,000 people in the last 7 days is calculated as the 7-day moving average of new cases or deaths (current day + 6 preceding days divided by 7) per 100,000 people using the US Census Bureau Population Estimates Program (<https://www.census.gov/data/datasets/time-series/demo/popest/2010s-counties-total.html>). The 7-day cumulative rate is calculated as (current day + 6 preceding days) per 100,000 people using the US Census Bureau Population Estimates Program (<https://www.census.gov/data/datasets/time-series/demo/popest/2010s-counties-total.html>). Rates per 100,000 are calculated as the total cases or deaths per 100,000 people using the US Census Bureau Population Estimates Program (<https://www.census.gov/data/datasets/time-series/demo/popest/2010s-counties-total.html>).

*2018 population estimates are still used for American Samoa, Federated States of Micronesia, Guam, New York City, Northern Mariana Islands, Palau, Republic of Marshall Islands and United States Virgin Islands.

CDC's overall COVID-19 case and death numbers are validated through a confirmation process with each jurisdiction. COVID-19 case and death numbers reported on other websites may differ from what is posted on the CDC COVID Data Tracker due to the timing of reporting and COVID Data Tracker updates, which may differ by up to 24 hours. CDC COVID-19 counts from previous dates may be continually revised as more records are received and processed. Not all jurisdictions report counts daily; some counts are reported in batches and may increase COVID-19 case and death counts at different intervals and appear as spikes. The process used for finding and confirming COVID-19 cases and deaths displayed by other sites may differ.

On 18 December, Texas reported 171,505 historical counts of probable cases with dates between 1 November and 18 December. This raised the total number of new cases in both Texas and the U.S. during this time period and correspondingly affected the 7-day rolling average of new cases.
