

Terminal Tissue Titers

ZIKV titer in brain, seminal vesicles, testes, and epididymides collected on day 32 post-inoculation for PRVABC59-inoculated mice (n = 5), day 28 post-inoculation for FSS13025- and P6-740-inoculated mice (n = 5 each) and on day 34 post-inoculation for MR766- (n = 2) and DakardD41524- (n = 4) inoculated mice. Dashed line represents the limit of detection.
