COVID-19 Vaccine

Quick Reference Guide for Healthcare Professionals

		Pfizer	Moderna	Janssen	
VACCINE ADMINISTRATION	Route	Intramuscular (IM) injection	Intramuscular (IM) injection	Intramuscular (IM) injection	
	Site	Deltoid	Deltoid	Deltoid	
	Thawing Frozen Vaccine	Between: 2°C and 8°C (36°F and 46°F) or Room temperature up to 25°C (77°F) Do NOT refreeze thawed vaccine.	Between: 2°C and 8°C (36°F and 46°F) or 8°C to 25°C (46°F to 77°F) Do NOT refreeze thawed vaccine.	N/A	
	Mixing Vaccine	Mix vaccine with 1.8 mL of 0.9% sodium chloride (preservative-free, normal saline)	Do NOT mix with any diluent	Do NOT mix with any diluent	
	Contraindications/ Precautions	Contraindications Severe allergic reaction (e.g., anaphylaxis) after a previous dose or to a component of the COVID-19 vaccine Immediate allergic reaction† of any severity to a previous dose or known (diagnosed) allergy to a component of the vaccine Note: Persons who have a contraindication to an mRNA COVID-19 vaccine (Moderna or Pfizer-BioNTech) may be able to receive the Janssen COVID-19 vaccine (see footnote).* Persons who have a contraindication to Janssen COVID-19 vaccine may be able to receive an mRNA COVID-19 vaccine (see footnote).* Precautions History of an immediate allergic reaction† to any other vaccine or injectable therapy (i.e., intramuscular, intravenous, or subcutaneous vaccines or therapies) This includes people with a reaction to a vaccine or injectable therapy that contains multiple components, one of which is a vaccine component, but for whom it is unknown which component elicited the immediate allergic reaction. People with a contraindication to mRNA COVID-19 vaccines have a precaution to Janssen COVID-19 Vaccine, and vice versa. (see footnote).* Moderate to severe acute illness See Interim Clinical Considerations for Use of mRNA COVID-19 Vaccines Currently Authorized in the United States www.cdc.gov/vaccines/covid-19/info-by-product/clinical-considerations.html			
	Post-Vaccination Observation	30 minutes: Persons with a history of an immediate allergic reaction of any severity to any other vaccine or injectable therapy or a history of anaphylaxis (from any cause) 15 minutes: All other persons			
	Most common adverse events	Injection site: pain, swelling, redness Systemic: fatigue, headache, muscle pain, chills, fever, joint pain	Injection site: pain, swelling, redness Systemic: fatigue, headache, muscle pain, chills, fever, nausea, joint pain	Injection site: pain, redness, swelling Systemic: fatigue, headache, muscle pain, nausea, fever	

[†]For the purpose of this guidance, an immediate allergic reaction is defined as any hypersensitivity-related signs or symptoms, such as urticaria, angioedema, respiratory distress (e.g., wheezing, stridor), or anaphylaxis that occur within 4 hours following exposure to a vaccine or medication.

[±]Consider consultation with an allergist-immunologist to help determine if the patient can safely receive vaccination. Healthcare providers and health departments may also request a consultation from the Clinical Immunization Safety Assessment COVID vax Project https://www.cdc.gov/vaccinesafety/ensuringsafety/monitoring/cisa/index.html. Vaccination of these individuals should only be done in an appropriate setting under the supervision of a healthcare provider experienced in the management of severe allergic reactions.

03/26/2021 CS321629-U **2**

[•] People with a contraindication to mRNA COVID-19 vaccines (including due to a known PEG allergy) have a precaution to Janssen COVID-19 vaccination. People who have previously received an mRNA COVID-19 vaccine dose but have a contraindication to a second dose should wait at least 28 days to receive Janssen COVID-19 vaccine.

[•] People with a contraindication to Janssen COVID-19 vaccine (including due to a known polysorbate allergy) have a precaution to mRNA COVID-19 vaccination.
