Demographic Characteristics of People Receiving COVID-19 Vaccinations in the United States

Overall US COVID-19 Vaccine Distribution and Administration; Maps, charts, and data provided by CDC, updated daily by 8 pm ET[†]

The Centers for Disease Control and Prevention (CDC) is working with states to provide more information on the demographic characteristics of vaccinated people.

These demographic data only represent the geographic areas that contributed data and might differ by populations prioritized within each state or jurisdiction's vaccination phase. Every geographic area has a different racial and ethnic composition, and not all are in the same vaccination phase. These data are thus not generalizable to the entire US population.

Percentages displayed in the charts below represent the percent of people vaccinated for whom the demographic variable of interest is known.

About these data ?

CDC | Updated: Apr 7 2021 1:35PM

Race/Ethnicity of People with at least One Dose Administered:

Data from 109,995,734 people with at least one dose administered. Race/Ethnicity was available for 60,856,408 (55.3%) people with at least one dose administered.

Race/Ethnicity of People Fully Vaccinated:

Data from 64,422,618 people fully vaccinated. Race/Ethnicity was available for 37,019,786 (57.5%) people fully vaccinated.

Age Groups of People with at least One Dose Administered:

Data from 109,995,734 people with at least one dose administered. Age was available for 101,478,013 (92%) people with at least one dose administered.

Age Groups of People Fully Vaccinated:

Data from 64,422,618 people fully vaccinated. Age was available for 59,507,850 (92%) people fully vaccinated.

Sex of People with at least One Dose Administered:

Data from 109,995,734 people with at least one dose administered. Sex was available for 100,257,350 (91.1%) people with at least one dose administered.

Sex of People Fully Vaccinated:

Data from 64,422,618 people fully vaccinated. Sex was available for 58,845,330 (91.3%) people fully vaccinated.

Timing: [†]Data will be updated as soon as they are reviewed and verified, often before 8:00 pm ET each day. However, daily updates may take longer if there are any delays in data reporting.

- Data on doses of vaccine administered included data received by CDC as of 6:00 am ET on the day of reporting.
- Vaccination data on the CDC COVID Data Tracker are updated daily (including weekends) between 1:30 pm and 8:00 pm ET.
- Updates will occur the following day when reporting coincides with a federal holiday.

Updates:

- Since **March 29, 2021**, the total number of doses delivered, and total number of doses administered by dialysis centers participating in the Federal Dialysis Center Program are reflected in national totals and in jurisdictional totals.

On April 6, 2021, improvements in reporting vaccine recipient race/ethnicity data to CDC resulted in an increase in the number of people for whom race/ethnicity data are available. These improvements will continue to allow for better race/ethnicity data reporting.
