

# Moderna COVID-19 Vaccine

Temperature Log for Frozen Vaccine Storage (Fahrenheit) Days 1-15

Store Moderna COVID-19 vaccine between -58°F and 5°F. Using a digital data logger (DDL), check and record the temperature daily using one of the options below. Save this record for 3 years, unless your state/local jurisdiction requires a longer time period. See CDC's Vaccine Storage and Handling Toolkit, COVID-19 Addendum, for additional information.

### Option 1: Minimum/Maximum (Min/Max) Temperatures (preferred)

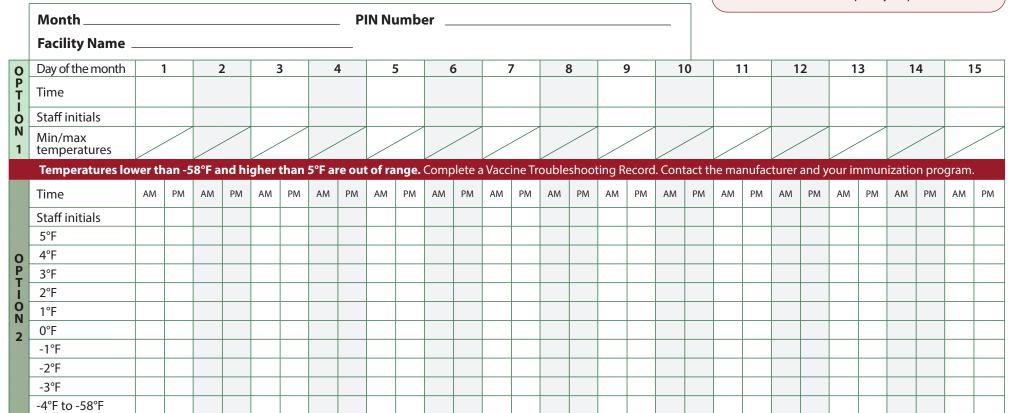

- Most DDLs display minimum and maximum temperatures. Check and record the min/max temperatures at the start of each workday.
- Document these temperatures in the min/max temperature row under the appropriate date.

#### **Option 2: Current Temperature**

- If the DDL does not display min/max temperatures, check and record the current temperature at the start and end of the workday.
- Document these temperatures by writing an "X" in the row that corresponds to the freezer temperature under the appropriate day of the month.
- 3. Review the continuous DDL temperature data daily.

- 1. Do **NOT** discard the vaccine.
- 2. Label the vaccine "Do Not Use."
- $3. \ \ Complete the Vaccine Troubleshooting \, Record.$
- 4. Contact the manufacturer to determine under what conditions (frozen or refrigerated) to store the vaccine as quickly as possible.

For additional information, see the vaccine manufacturer's product information at https://www.modernatx.com/covid19vaccine-eua/
