COVID-19 Vaccinations in the United States

Overall US COVID-19 Vaccine | Deliveries and Administration; Maps, charts, and data provided by CDC, updates daily by 8 pm ET

Represents all vaccine partners including jurisdictional partner clinics, retail pharmacies, long-term care facilities, dialysis centers, Federal Emergency Management Agency and Health Resources and Services Administration partner sites, and federal entity facilities.

Total Vaccine Doses		People Vaccinated	
		At Least One Dose	Fully Vaccinated
Delivered	312,508,205		
Administered	243,463,471		
Learn more about the distribution of vaccines.			
Total		146,239,208	103,422,555
% of Total Population		44%	31.2%
Population ≥ 18 Years of Age		144,151,014	102,752,929
% of Population ≥ 18 Years of Age		55.8%	39.8%
Population ≥ 65 Years of Age		45,179,907	37,911,908
% of Population ≥ 65 Years of Age		82.6%	69.3%

About these data

CDC | Data as of: May 1, 2021 6:00am ET. Posted: Saturday, May 1, 2021 6:45 PM ET

 Delivered

Metric:
 Count
 Rate per 100,000

Population:
 Total Population
 Population ≥ 18 Years of Age
 Population ≥ 65 Years of Age

This shows the number of doses administered within the state or territory for every 100,000 people of the total population. It does not reflect the residency of the person receiving the vaccine, but where they received it.

Total Doses Administered Reported to the CDC by State/Territory and for Select Federal Entities per 100,000 of the Total Population

Territories: GU, AS, RP, FM, MP, MH, VI

Federal Entities: BoP, DoD, IHS, VHA

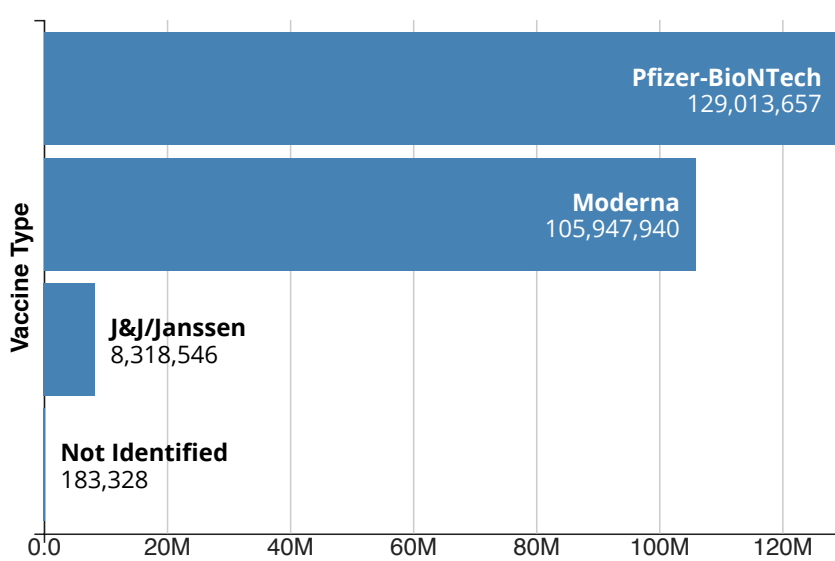

* Data for Federal Entities are presented here and are also incorporated into the respective jurisdictional totals

Want an overview of the channels being used to ensure all Americans have access to COVID-19 vaccine? Visit the [COVID-19 Vaccine Channel Portfolio by Jurisdiction](#) page.

Looking for Long-Term Care Facility vaccination data? See the [latest data](#) for the Federal Pharmacy Partnership for Long-Term Care (LTC) Program.

Want to know more about trends in COVID-19 US vaccinations? See the [latest trends](#) in the number of COVID-19 vaccinations given in the United States.

Browser: The content on this page is not accessible using Internet Explorer. Please use Google Chrome, Microsoft Edge, Mozilla Firefox, or Apple Safari to access this page.

Timing: Data will be updated after review and verification, usually before 8:00 pm ET. Note: Daily updates might be delayed due to delays in reporting.

- Data on doses of vaccine distributed and administered include data received by CDC as of 6:00 am ET on the day of reporting.
- Vaccination data on CDC's COVID Data Tracker are updated daily between 1:30 pm and 8:00 pm ET.
- Updates will occur the following day when reporting coincides with a federal holiday.

Updates:

- For reporting on [Reporting COVID-19 Vaccinations in the United States](#)
- View the data definitions on [Reporting COVID-19 Vaccinations in the United States](#)
- View the data on CDC COVID Data Tracker. **CDC counts people as being "fully vaccinated"** if they received two doses on different days (regardless of time interval) of the two-dose mRNA series or received one dose of a single-dose vaccine.
- CDC determined that the number of people receiving at least one dose and the number of people who are fully vaccinated based on information that state, territorial, tribal, and local public health agencies and federal entities reported to CDC on dose number, dose manufacturer, administration date, recipient ID, and date of submission. Because the method used to determine dose numbers needs to be applied across multiple jurisdictions (states, territories, tribes, or local entities) with different reporting practices, **CDC's dose number estimates might differ from those reported by jurisdictions and federal entities. People receiving doses are attributed to the jurisdiction in which the person resides.**
- When the vaccine manufacturer is not reported, the recipient is considered fully vaccinated with two doses.

CDC has capped the percent of population coverage metrics at 99.9%. These metrics could be greater than 99.9% for multiple reasons, including census denominator data not including all individuals that currently reside in the county (e.g., part time residents) or potential data reporting errors.
