Metric:
 Count
 Rate per 100,000

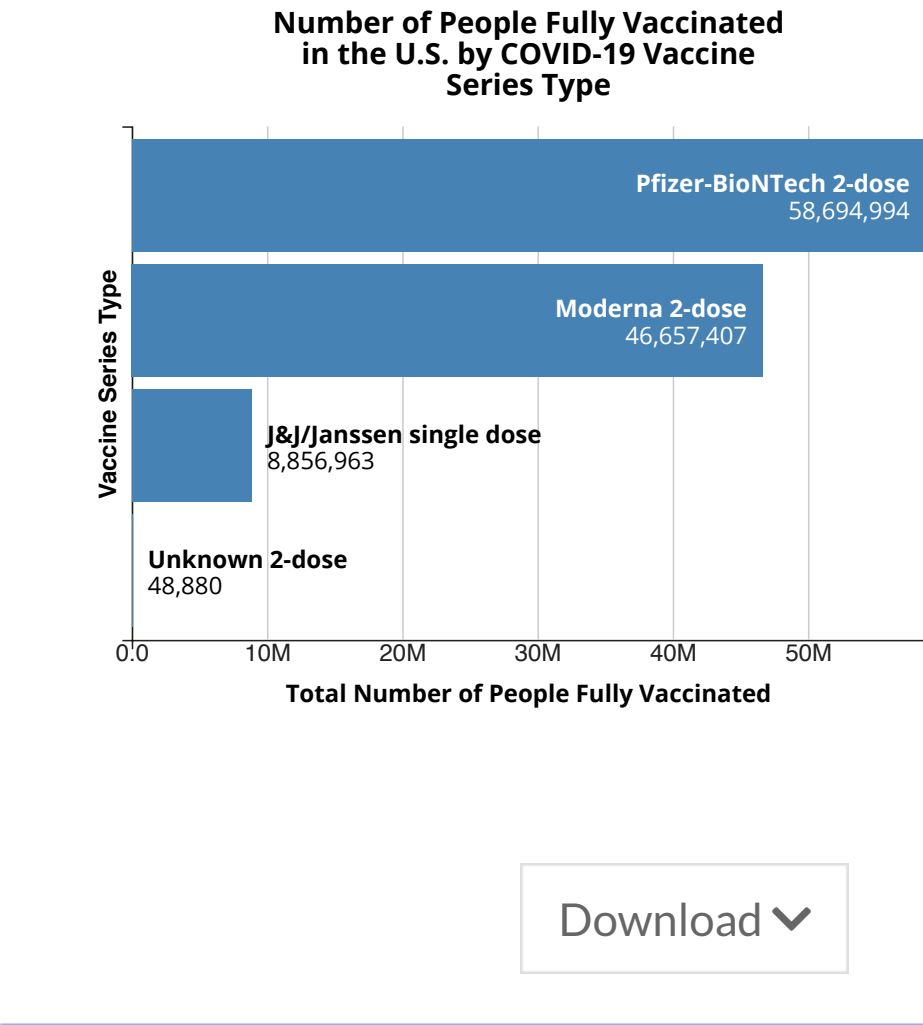

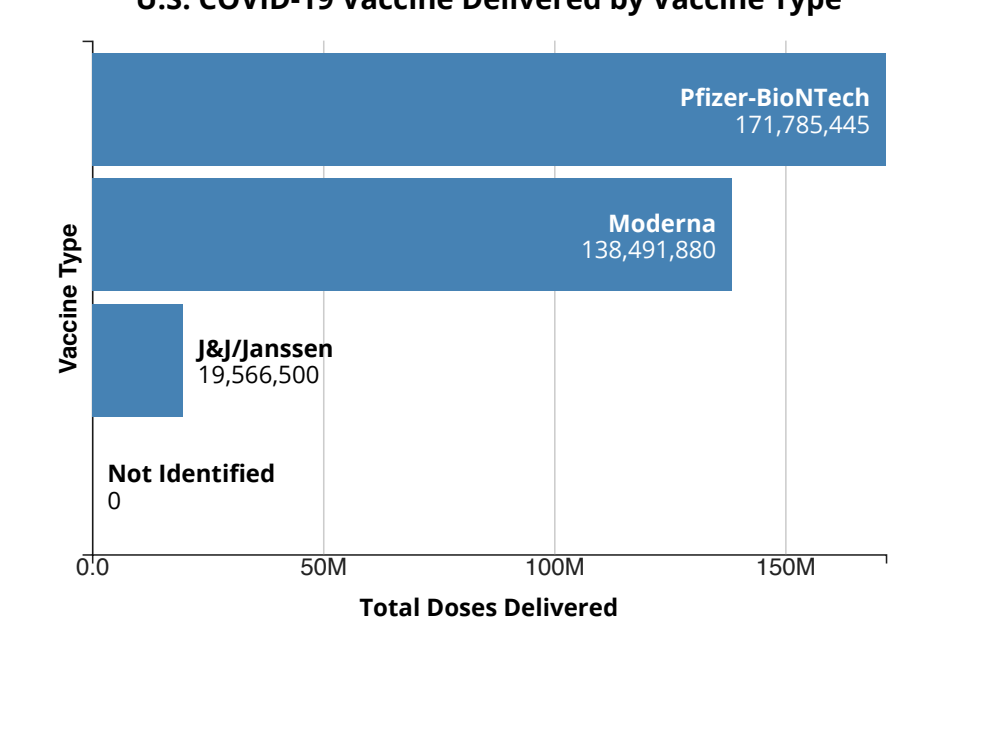

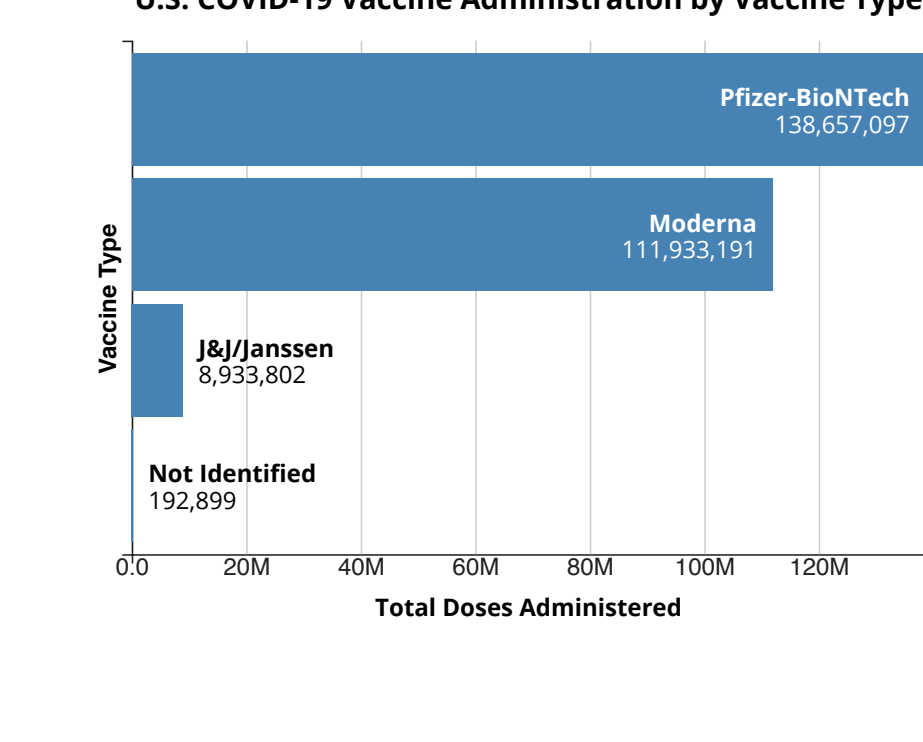

Population:
 Total Population
 Population ≥ 18 Years of Age
 Population ≥ 65 Years of Age

This shows the number of doses administered within the state or territory for every 100,000 people of the total population. It does not reflect the residency of the person receiving the vaccine, but where they received it.

Total Doses Administered Reported to the CDC by State/Territory and for Select Federal Entities per 100,000 of the Total Population

* Data for Federal Entities are presented here and are also incorporated into the respective jurisdictional totals

Want an overview of the channels being used to ensure all Americans have access to COVID-19 vaccine?
 Visit the [COVID-19 Vaccine Channel Portfolio by Jurisdiction](#) page.

Looking for Long-Term Care Facility vaccination data?
 See the [latest data](#) for the Federal Pharmacy Partnership for Long-Term Care (LTC) Program.

Want to know more about trends in COVID-19 US vaccinations?
 See the [latest trends](#) in the number of COVID-19 vaccinations given in the United States.

Browser: The content on this page is not accessible using Internet Explorer. Please use Google Chrome, Microsoft Edge, Mozilla Firefox, or Apple Safari to access this page.

Timing: Data will be updated after review and verification, usually before 8:00 pm ET. Note: Daily updates might be delayed due to delays in reporting.

- Data on doses of vaccine distributed and administered include data received by CDC as of 6:00 am ET on the day of reporting.
- Vaccination data on CDC's COVID Data Tracker are updated daily between 1:30 pm and 8:00 pm ET.
- Updates will occur the following day when reporting coincides with a federal holiday.

Updates:

- View the data definitions on [Reporting COVID-19 Vaccinations in the United States](#)
- For reporting on CDC (National Data Tracker), CDC two-dose mRNA as being "fully vaccinated" if they received two doses on different days (regardless of time interval) of the two-dose mRNA series or received one dose of a single-dose vaccine.
- CDC determined the number of people receiving at least one dose and the number of people who are fully vaccinated based on information that state, territorial, tribal, and local public health agencies and federal entities reported to CDC on dose number, dose manufacturer, administration date, recipient ID, and date of submission. Because the method used to determine dose numbers needs to be applied across multiple jurisdictions (states, territories, tribes, or local entities) with different reporting practices, CDC's dose number estimates might differ from those reported by jurisdictions and federal entities. People receiving doses are attributed to the jurisdiction in which the person resides.
- When the vaccine manufacturer is not reported, the recipient is considered fully vaccinated with two doses.

CDC has capped the number of population coverage metrics at 99.9%. These metrics could be greater than 99.9% for multiple reasons, including census denominator data not including all individuals that currently reside in the county (e.g., part time residents) or potential data reporting errors.

On May 7, 2021, the New Hampshire "total doses administered" value posted to Tracker was lower than that reported on the two prior days (May 5 and 6, 2021). This downward correction is accurate and is due to New Hampshire and CDC collaboratively correcting data transmission errors. Updates will be provided as available.
