

# SUPPLEMENTARY FIGURE. Proportion of all COVID-19 tests originating from each surveillance source\* — South Sudan, April 6, 2020–February 21, 2021

\*Alert testing consists of rapid response teams (RRTs) testing persons with COVID-19-compatible symptoms who call the COVID-19 alert hotline. Contact tracing tests those with a known exposure to a confirmed positive case. Points of Entry testing is for individuals arriving across land border crossing. Screening tests preoutbound travelers. Sentinel site surveillance is conducted at health facilities and tests persons who seek care for any reason and are experiencing COVID-19-compatible symptoms.
