updates daily by 8 pm ET[†]

The Centers for Disease Control and Prevention (CDC) is working with states to provide more information on the demographic characteristics of vaccinated people.

differ by populations prioritized within each state or jurisdiction's vaccination phase. Every geographic area has a different racial and ethnic composition, and not all are in the same vaccination phase. These data are thus not generalizable to the entire US population.

Percentages displayed in the charts below represent the percent of people vaccinated for whom the demographic variable of interest is known.

• Data on doses of vaccine administered included data received by CDC as of 6:00 am ET on the day of reporting. 8:00 pm ET.

• Vaccination data on the CDC COVID Data Tracker are updated daily (including weekends) between 1:30 pm and • Updates will occur the following day when reporting coincides with a federal holiday.

View and Download COVID-19 Case Surveillance Public Use Data

Timing: †Data will be updated as soon as they are reviewed and verified, often before 8:00 pm ET each day.

- **Updates:** On April 6, 2021, improvements in reporting vaccine recipient race/ethnicity data to CDC resulted in an increase in the number of people for whom race/ethnicity data are available. These improvements will continue to allow
- for better race/ethnicity data reporting. View data definitions on About COVID-19 Vaccine Delivery and Administration Data

However, daily updates may take longer if there are any delays in data reporting.
