Demographic Trends of COVID-19 cases and deaths in the US reported to CDC

Maps, charts, and data provided by CDC, updates Tues-Sun by 8 pm ET[†]

CDC is working with states to provide more information on race/ethnicity for reported cases. The percent of reported cases that include race/ethnicity data is increasing.

These data only represent the geographic areas that contributed data on race/ethnicity. Every geographic area has a different racial and ethnic composition. These data are not generalizable to the entire U.S. population.

If cases were distributed equally across racial and ethnic populations, one would expect to see more cases in those populations that are more highly represented in geographic areas that contributed data.

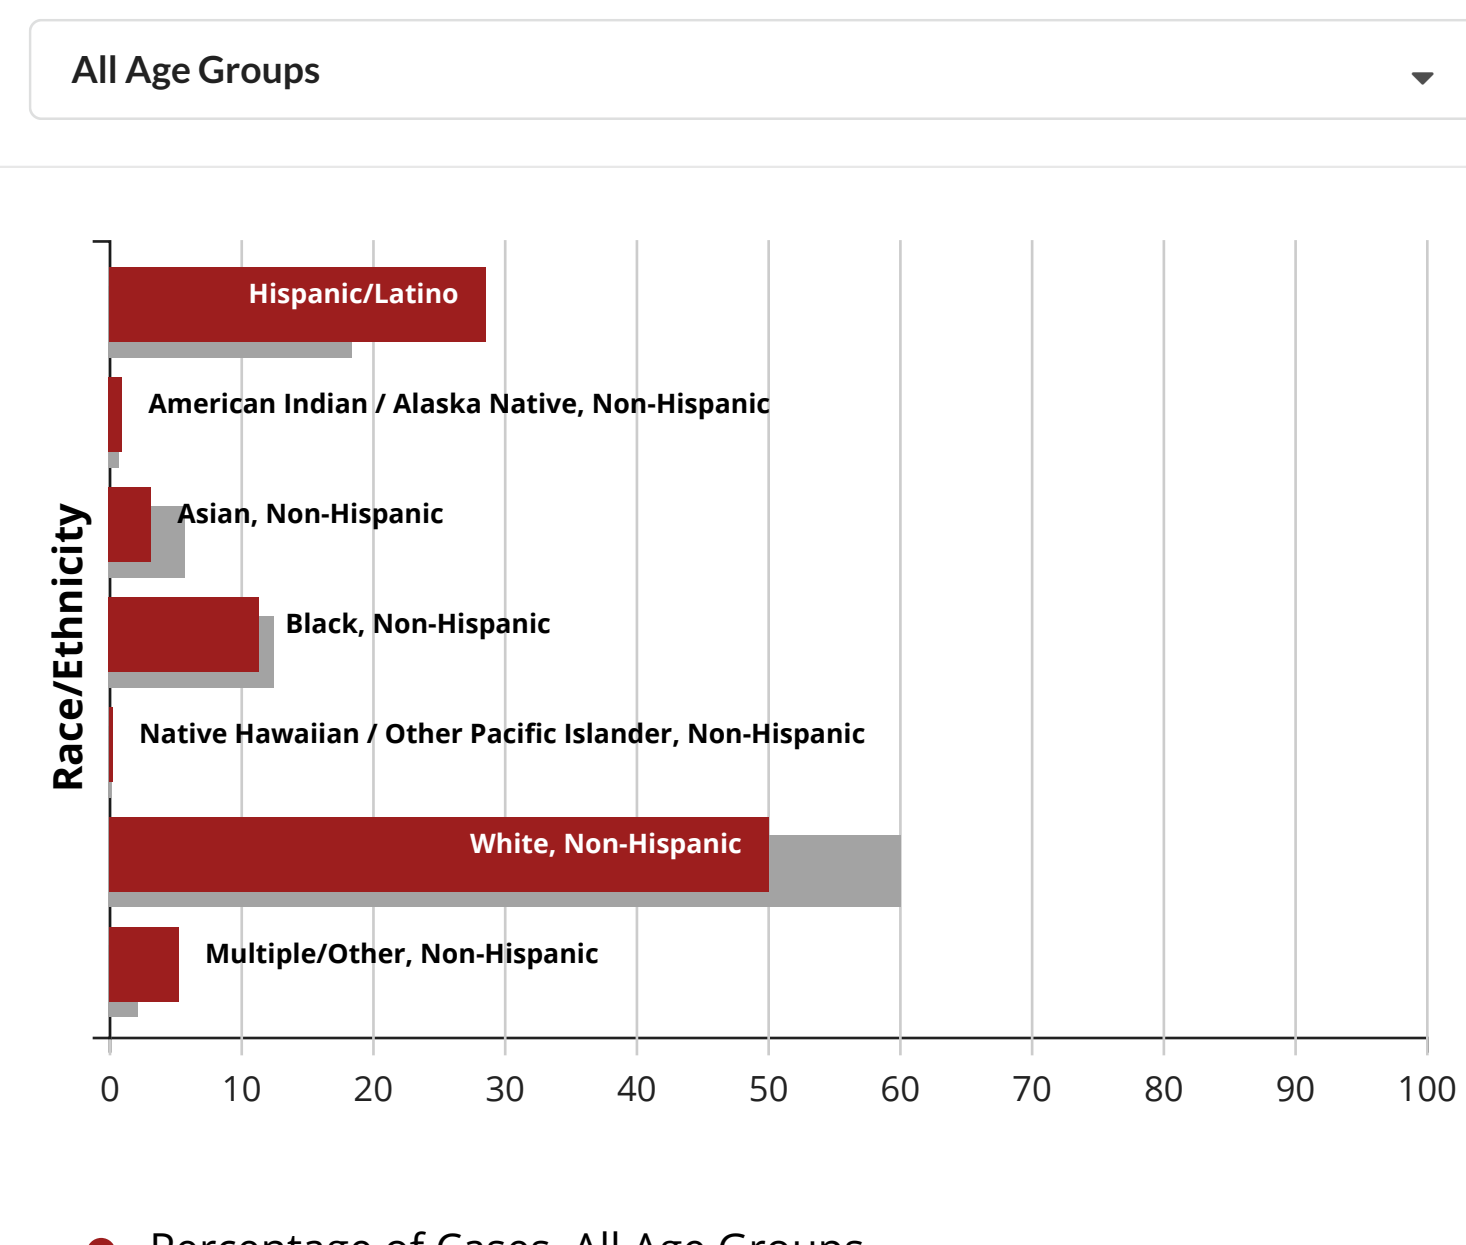

Percentages displayed in the charts below represent the percent of cases or deaths for which the demographic variable of interest is known.

CDC | Data as of: Wednesday, July 21, 2021 12:53 PM ET. Posted: Wednesday, July 21, 2021 2:05 PM ET

Cases by Race/Ethnicity:

Download

Data from 27,673,023 cases. Race/Ethnicity was available for 17,548,959 (63%) cases.

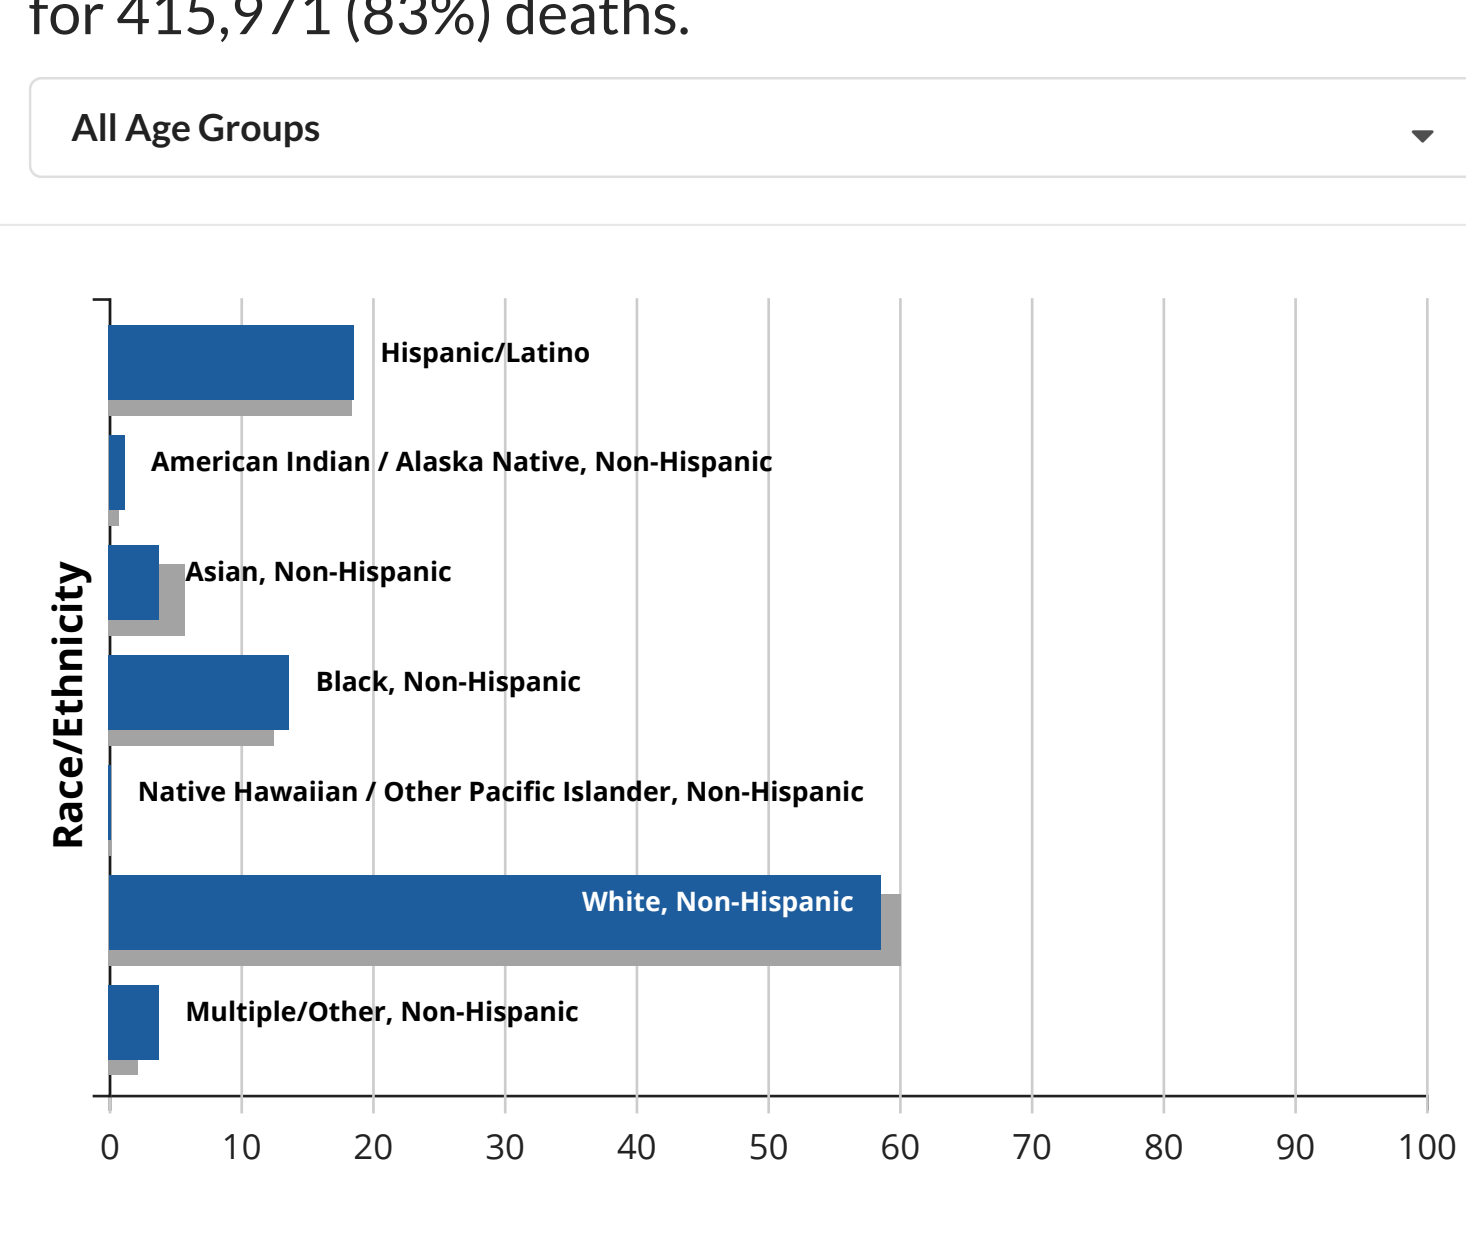

Show Percentage of the US Population that is in this demographic category

Deaths by Race/Ethnicity:

Download

Data from 498,713 deaths. Race/Ethnicity was available for 415,971 (83%) deaths.

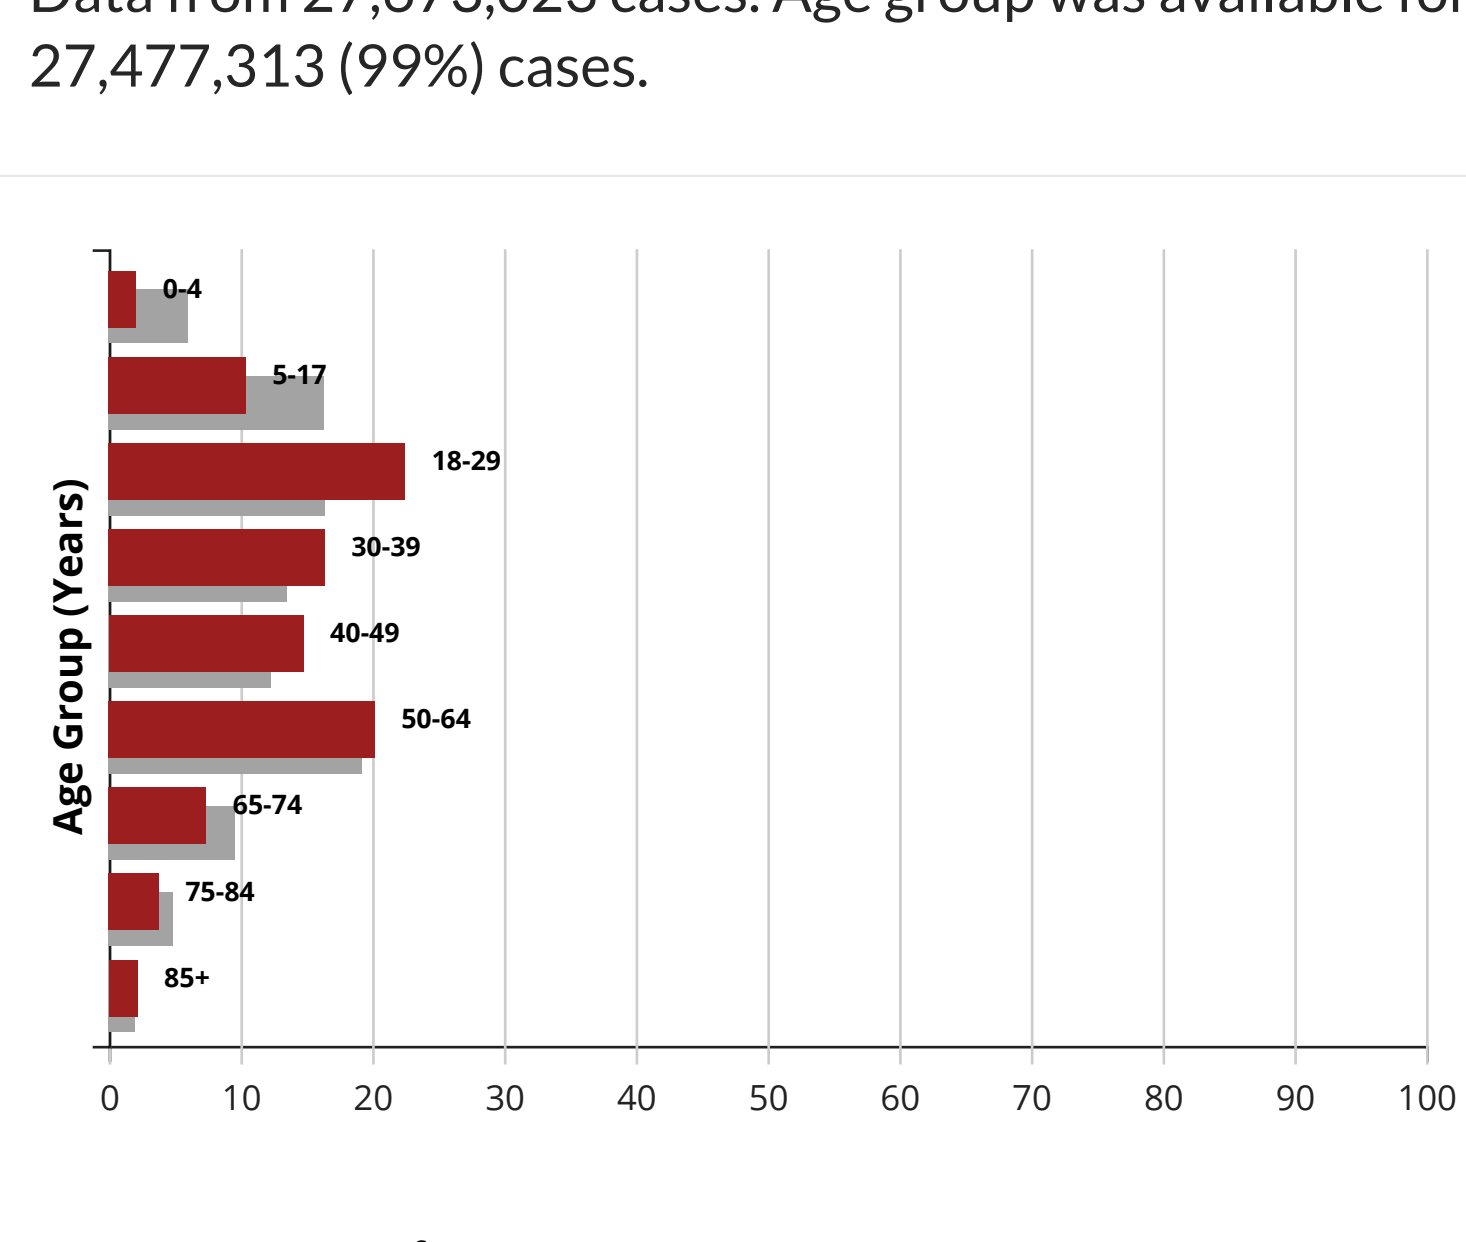

Show Percentage of the US Population that is in this demographic category

Cases by Age Group:

Download

Data from 27,673,023 cases. Age group was available for 27,477,313 (99%) cases.

Show Percentage of the US Population that is in this demographic category

Deaths by Age Group:

Download

Data from 498,713 deaths. Age group was available for 498,674 (99%) deaths.

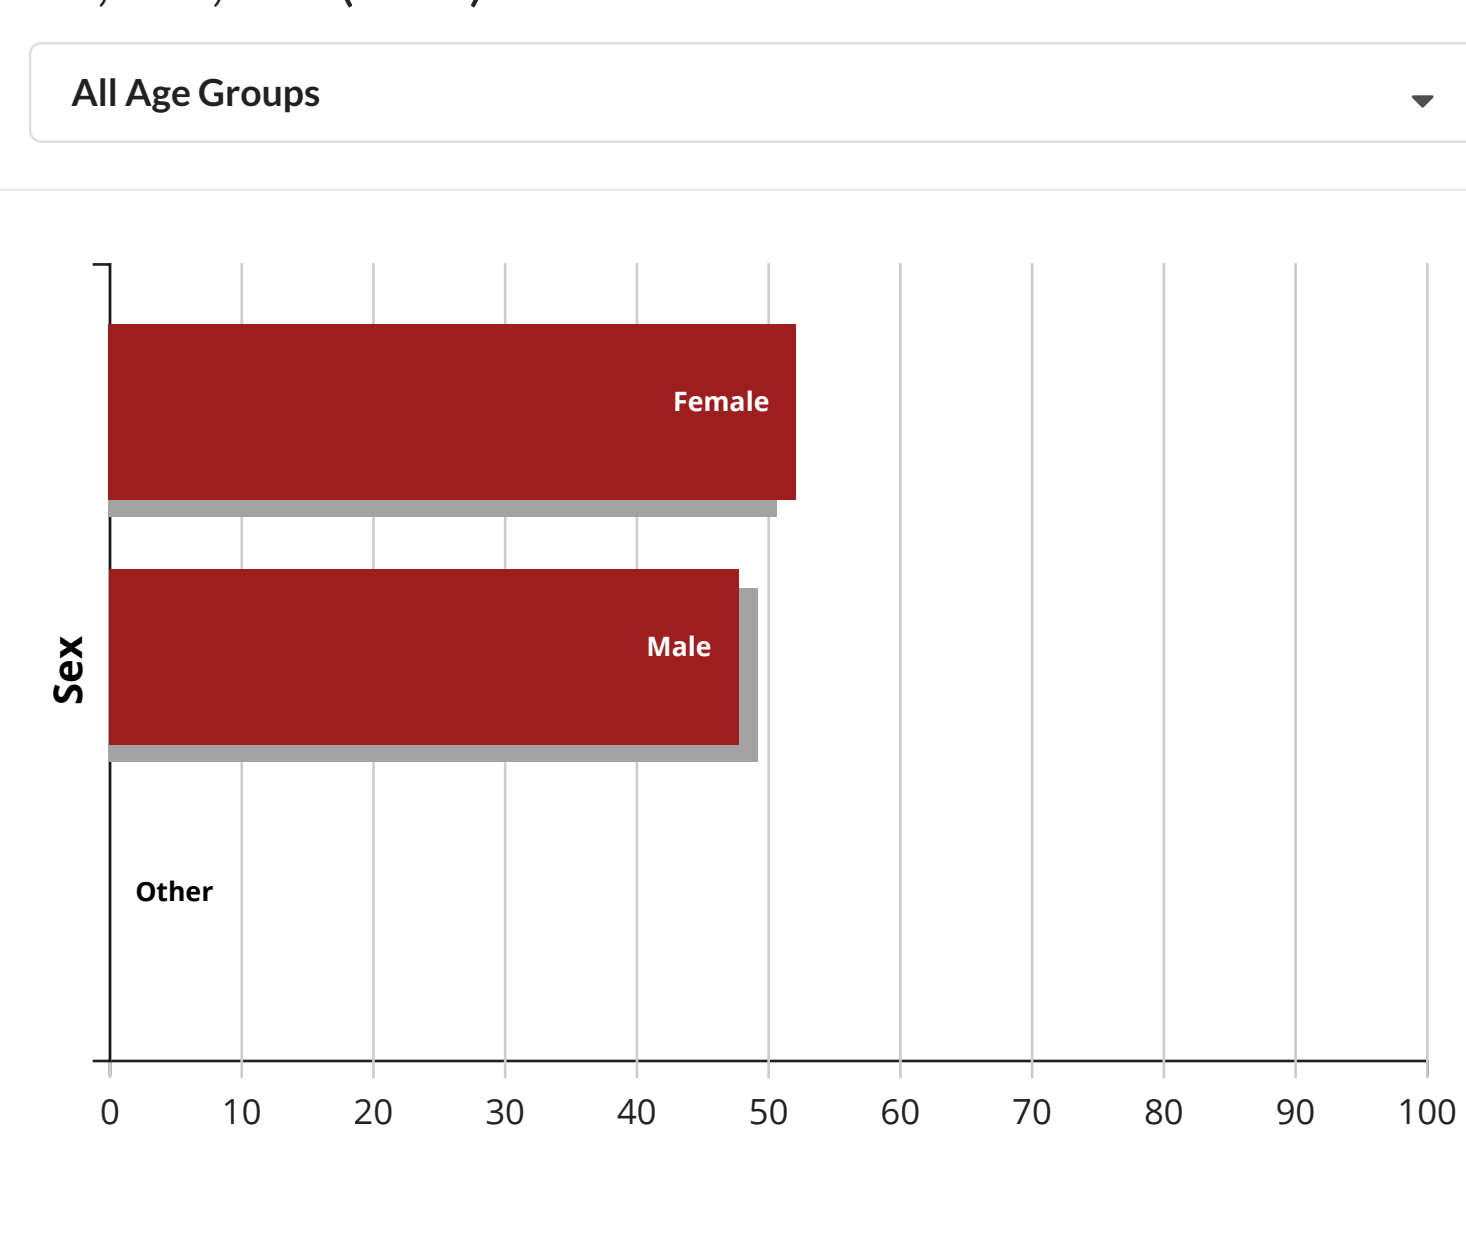

Show Percentage of the US Population that is in this demographic category

Cases by Sex:

Download

Data from 27,673,023 cases. Sex was available for 27,366,282 (98%) cases.

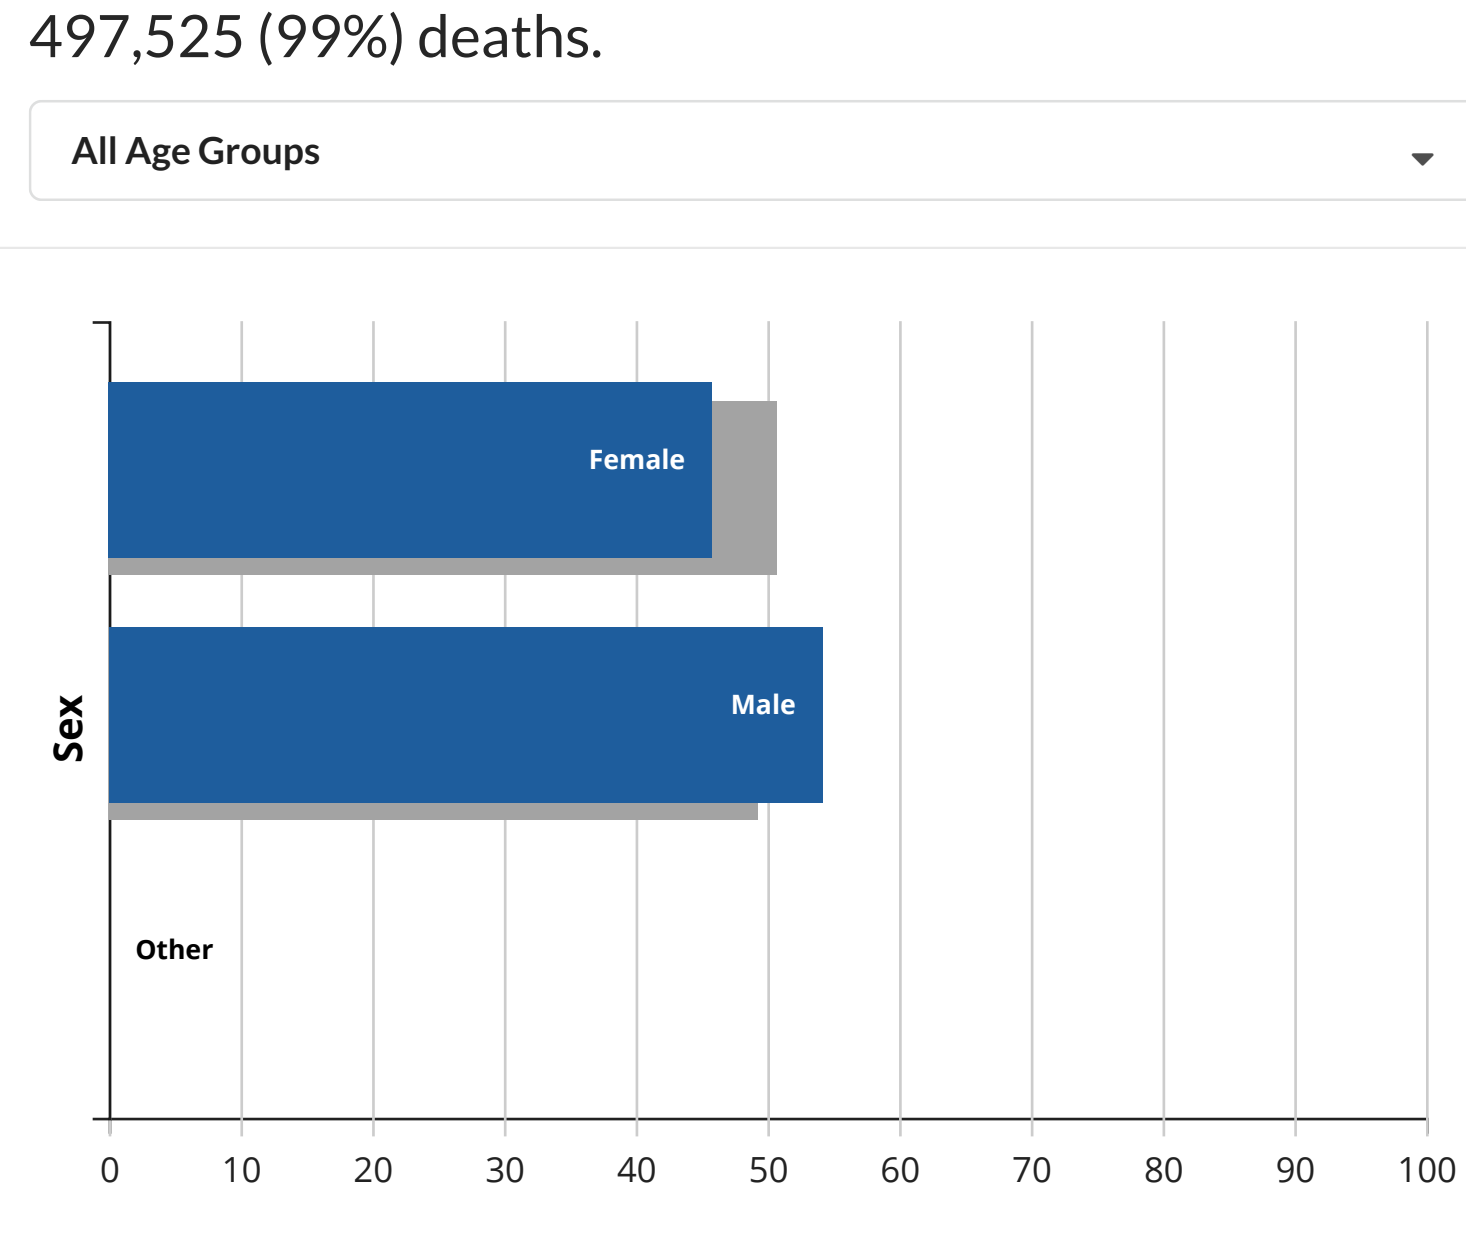

Show Percentage of the US Population that is in this demographic category

Deaths by Sex:

Download

Data from 498,713 deaths. Sex was available for 497,525 (99%) deaths.

Show Percentage of the US Population that is in this demographic category

Footnotes

[†]Data will update Tuesday - Sunday as soon as they are reviewed and verified, oftentimes before 8 pm ET. However, daily (Tues-Sun) updates might be delayed due to delays in reported data.

Data Sources, References & Notes: The case classifications for COVID-19, a nationally notifiable disease, are described in an [updated interim COVID-19 position statement and case definition](#) issued by the Council of State and Territorial Epidemiologists on August 5, 2020. . However, there is some variation in how jurisdictions implement these case classifications. More information on how CDC collects COVID-19 case surveillance data can be found at [CDC's COVID-19 FAQ webpage](#). Demographic data for COVID-19 cases and deaths is based on a subset of individuals where case-level data are reported by state and territorial jurisdictions to the Centers for Disease Control and Prevention (CDC) since January 21, 2020. Demographic data have varying degrees of missing data and are not generalizable to the entire population of individuals with COVID-19. All displayed counts include confirmed COVID-19 cases and deaths as reported by U.S. states, U.S. territories, New York City (NYC), and the District of Columbia from the previous day. Counts for certain jurisdictions also include probable COVID-19 cases and deaths. The process used for finding and confirming COVID-19 cases displayed by other sites may differ. On May 29, 2021, data on deaths among those ages 0-4 years were adjusted after the identification of a data discrepancy, resulting in a new count of 144. Counts from surveillance data are provisional and subject to change.

Do you need to take extra precautions to reduce your risk of contracting COVID-19? Find more [information and resources](#) for those at increased risk for COVID-19
