[What's this?](#)

*There is about a 2-4 week delay in the data for a jurisdiction to confirm a case of SARS-CoV pregnant woman and report it to CDC.

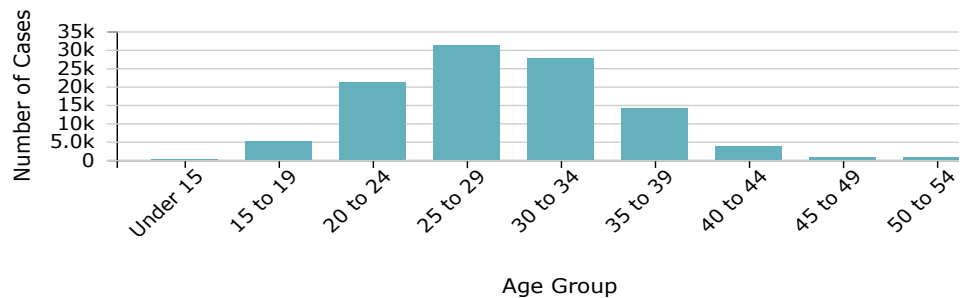

**Date of diagnosis is derived from the earliest date of either 1) when the case report was received by CDC from a jurisdictional health department or 2) the earliest available date relative to the illness or specimen collection.

Pregnant women with COVID-19 by age, United States, January 22, 2020 - August 2, 2021

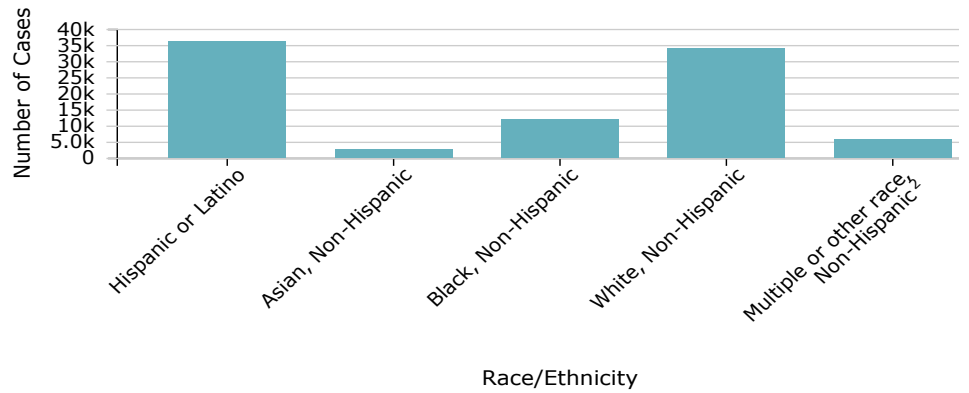

Data were collected from 104,165 women, and age was available for 104,165 (100%) women.

[Download \(CSV\)](#)

Pregnant women with COVID-19 by race/ethnicity, United States, January 22, 2020 - August 2, 2021

Data were collected from 104,165 women, but race/ethnicity was only available for 90,390 (86%) women.

[Download](#)

Pregnant Women with COVID-19 who were hospitalized, United States, January 22, 2020 - August 2, 2021

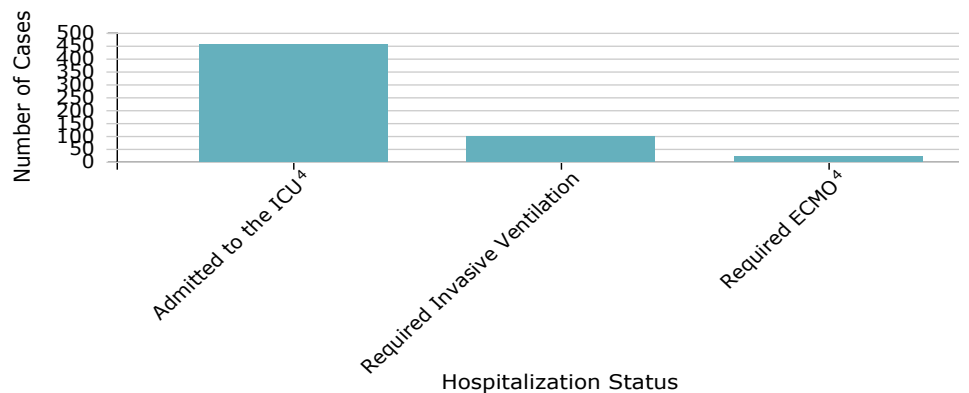

Data were collected from 104,165 women, but hospitalization data were only available for 8 (79.9%).

HOSPITALIZED CASES³

17,801

Pregnant women with COVID-19 admitted to the ICU, who required invasive ventilation, or who required ECMO, United States, January 22, 2020 - August 2, 2021

Data were collected from 104,165 women, but ICU admission data were only available for 1 (13.6%) women, invasive ventilation data were only available for 9,750 (9.4%) women, and ECMO data were only available for 10,331 (9.9%).

¹Cases with age <9 years and >54 years are excluded. Cases with unknown age are included.

²Other race includes non-Hispanic American Indian or Alaska Native or non-Hispanic Native Hawaiian or Other Pacific Islander

³Data were not available to distinguish hospitalization for COVID-19-related indications, such as worsening respiratory status, from hospital admission for pregnancy-related indications, such as delivery.

⁴Abbreviation: ICU, intensive care unit; ECMO, extracorporeal membrane oxygenation, an advanced life support technique used for patients with life-threatening heart and/or lung problems.

Footnotes

This webpage is updated weekly. The cases reported include only confirmed cases with laboratory evidence of COVID-19 infection.

Not all jurisdictions report cases of COVID-19 to CDC. This includes 36 states, District of Columbia, Guam, New York City, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Case counts for these jurisdictions are not included in the weekly reporting.

Case counts do not include all pregnant women with COVID-19 in the U.S., and must be interpreted with caution. The completeness of the pregnancy variable continues to improve each week. Increases in the total number of cases reported on other websites may differ from what is posted on CDC's website because CDC case numbers are validated through a confirmation process with each jurisdiction. Differences between case counts for finding and confirming cases reported by other sites may differ. Case counts may fluctuate from week to week due to data quality and cleaning processes.

Since October 2020, CDC has excluded reports of cases of COVID-19 among pregnant women who are younger than 9 and older than 54 in the weekly reporting. Based on review of data quality, cases reported as pregnant with ages younger than 9 or older than 54 are less likely to be true pregnancies, and more likely to be data errors. Cases with unknown age are still included.

For more information on how CDC collects COVID-19 surveillance data, see [FAQ COVID-19 Data and Surveillance](#)

For surveillance data on birth and infant outcomes from the Surveillance for Emerging Threats to Mothers and Babies Network (SET-NET) see [COVID-19 during Pregnancy: Birth and Infant Outcomes](#)
