## Data on COVID-19 during Pregnancy: Severity of Maternal Illness

Monitoring the impact of COVID-19 during pregnancy can protect pregnant women and their babies; maps, charts, and data provided by CDC

Looking for data on birth and infant outcomes among pregnant women with COVID-19? Visit CDC's Birth and Infant Outcomes data page for information on delivery type, preterm birth, and infant test results.

Pregnant women<sup>1</sup> with COVID-19, United States, January 22, 2020 - August 16, 2021

### Cases of COVID-19 among Pregnant Women by Week of Diagnosis\*

Data were collected from 107,532 women and date of diagnosis\*\* was available for 107,532 (100%) women.

\*There is about a 2-4 week delay in the data for a jurisdiction to confirm a case of SARS-CoV-2 in a pregnant woman and report it to CDC.

\*\*Date of diagnosis is derived from the earliest date of either 1) when the case report was received by CDC from a jurisdictional health department or 2) the earliest available date related to the illness or specimen collection.

[Download Chart](#)

Pregnant women with COVID-19 by age, United States, January 22, 2020 - August 16, 2021

Data were collected from 107,532 women, and age was available for 107,532 (100%) women.

Pregnant women with COVID-19 by race/ethnicity, United States, January 22, 2020 - August 16, 2021

Data were collected from 107,532 women, but race/ethnicity was only available for 93,480 (86.9%) women.

Pregnant Women with COVID-19 who were hospitalized, United States, January 22, 2020 - August 16, 2021

Data were collected from 107,532 women, but hospitalization data were only available for 85,869 (79.9%).

Pregnant women with COVID-19 admitted to the ICU, who required invasive ventilation, or who required ECMO, United States, January 22, 2020 - August 16, 2021

Data were collected from 107,532 women, but ICU admission data were only available for 14,541 (13.5%) women, invasive ventilation data were only available for 10,003 (9.3%) women, and ECMO data were only available for 10,569 (9.8%).

<sup>1</sup>Cases with age <9 years and >54 years are excluded. Cases with unknown age are included.

<sup>2</sup>Other race includes non-Hispanic American Indian or Alaska Native or non-Hispanic Native Hawaiian or Other Pacific Islander

<sup>3</sup>Data were not available to distinguish hospitalization for COVID-19-related indications, such as worsening respiratory status, from hospital admission for pregnancy-related indications, such as delivery.

<sup>4</sup>Abbreviation: ICU, intensive care unit; ECMO, extracorporeal membrane oxygenation, an advanced life support technique used for patients with life-threatening heart and/or lung problems.

### Footnotes

This webpage is updated weekly. The cases reported include only confirmed cases with laboratory evidence of SARS-CoV-2 infection.

About the Data:

There are currently 56 U.S.-affiliated jurisdictions reporting cases of COVID-19 to CDC. This includes 50 states, District of Columbia, Guam, New York City, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Only about a third of case report forms include information on pregnancy status. Therefore, these numbers likely do not include all pregnant women with COVID-19 in the U.S. and these must be interpreted with caution.

The completeness of the pregnancy variable continues to improve each week. Increases in the total number of cases of COVID-19 among pregnant women are largely due to the updating of pregnancy status among already reported cases. Case numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall case numbers are validated through a confirmation process with each jurisdiction.

Differences between reporting jurisdictions and CDC's website may occur due to the timing of reporting and website updates. The process used for finding and confirming cases reported by other sites may differ. Case counts may fluctuate from week to week due to data quality and cleaning processes.

Since October 2020, CDC has excluded reports of cases of COVID-19 among pregnant women who are younger than age 9 and older than age 54 in the weekly reporting. Based on review of data quality, cases reported as pregnant with ages younger than 9 or older than 54 are less likely to be true pregnancies, and more likely to be data errors. Cases with unknown age are still included.

For more information on how CDC collects COVID-19 surveillance data, see [FAQ COVID-19 Data and Surveillance](#)
