Demographic Characteristics of People Receiving COVID-19 Vaccinations in the United States

Overall US COVID-19 Vaccine Distribution and Administration; Maps, charts, and data provided by CDC, updates daily by 8 pm ET¹

The Centers for Disease Control and Prevention (CDC) is working with states to provide more information on the demographic characteristics of vaccinated people.

These demographic data only represent the geographic areas that contributed data and might differ by populations prioritized within each state or jurisdiction's vaccination phase. Every geographic area has a different racial and ethnic composition, and not all are in the same vaccination phase. These data are thus not generalizable to the entire US population.

Percentages displayed in the charts below represent the percent of people vaccinated for whom the demographic variable of interest is known.

About these data [How Do I Find a COVID-19 Vaccine?](#)
CDC | Data as of: August 25, 2021 6:00am ET. Posted: Wednesday, August 25, 2021 3:14 PM ET

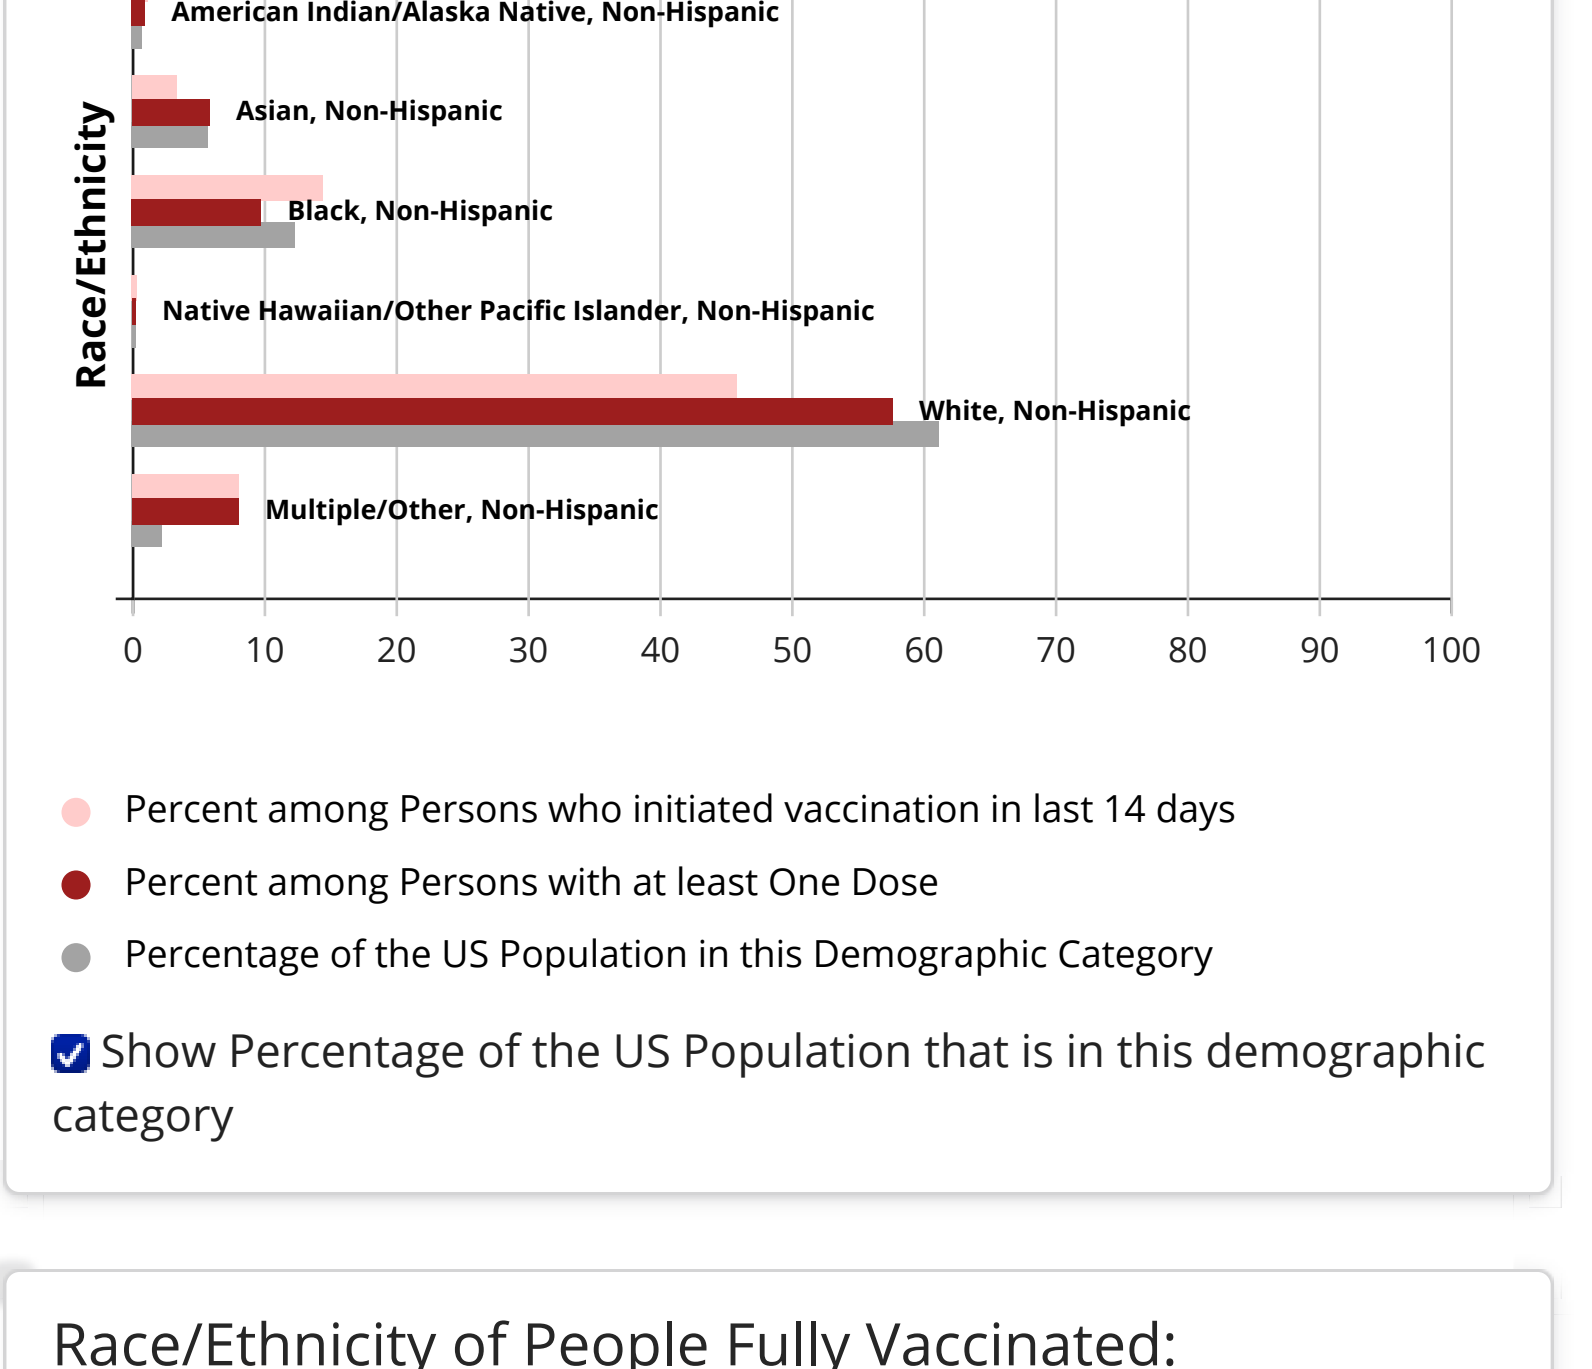

In the figures below, the dark red bars/dark blue bars represent the percentage of all vaccinated people who fall into each demographic group, and the gray bars represent the percentage of all people in the U.S. population who fall into each demographic group. If all groups got vaccinated according to their share of the population, the dark red/dark blue bars would be the same length as the gray bars.

- Instances where the red bar is shorter than the gray bar indicate that the number of people in that group who received at least one shot is lower than would be expected based on the number of people in that group in the U.S. population.
- Instances where the dark blue bar is shorter than the gray bar indicate that the number of fully vaccinated people in that group is lower than would be expected based on the number of people in that group in the U.S. population.

Race/Ethnicity of People with at least One Dose Administered:

Download

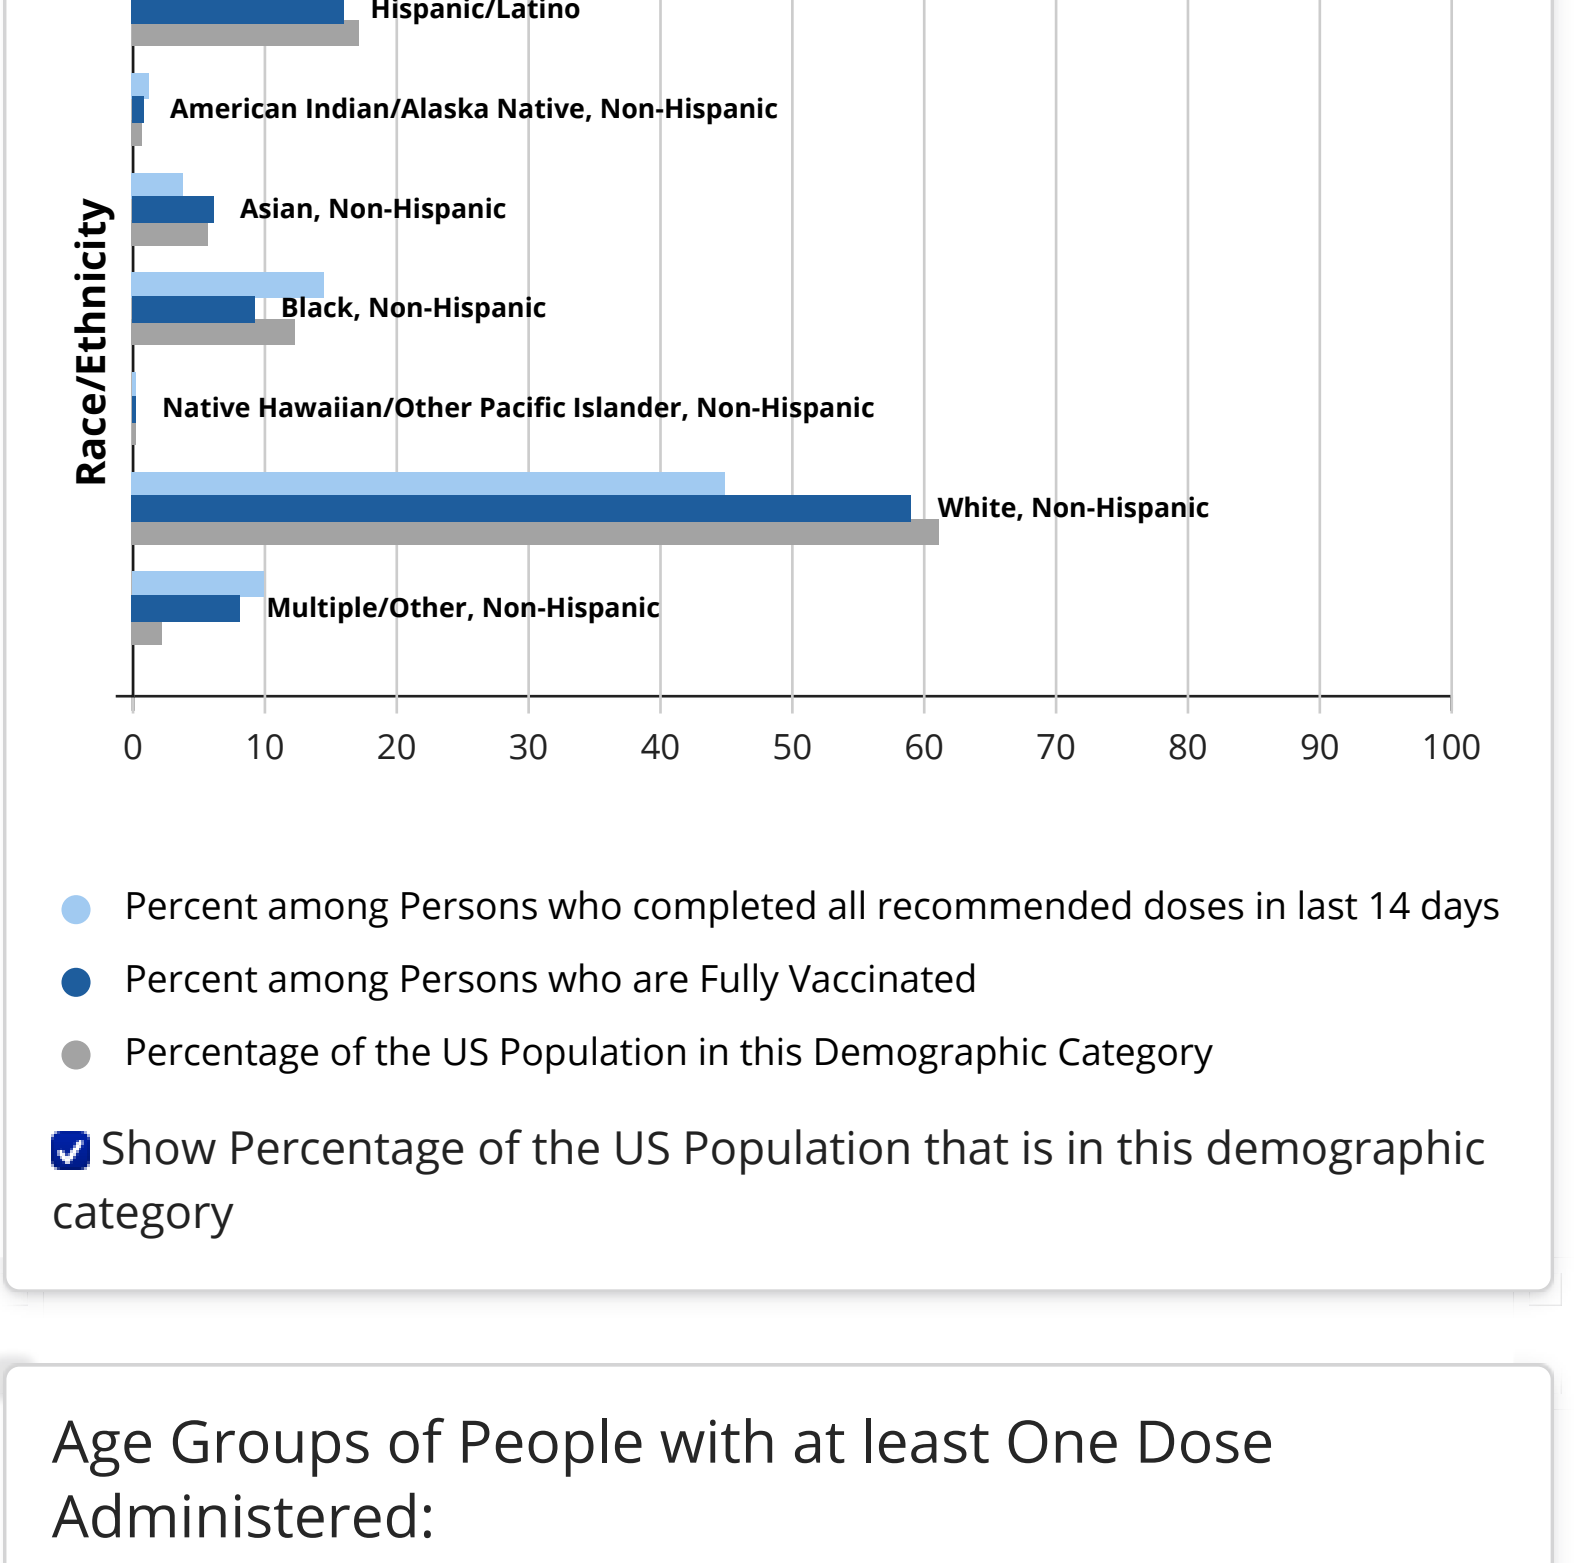

Data from 202,500,853 people with at least one dose administered. Race/Ethnicity was available for 118,342,265 (58.4%) people with at least one dose administered.

Race/Ethnicity of People Fully Vaccinated:

Download

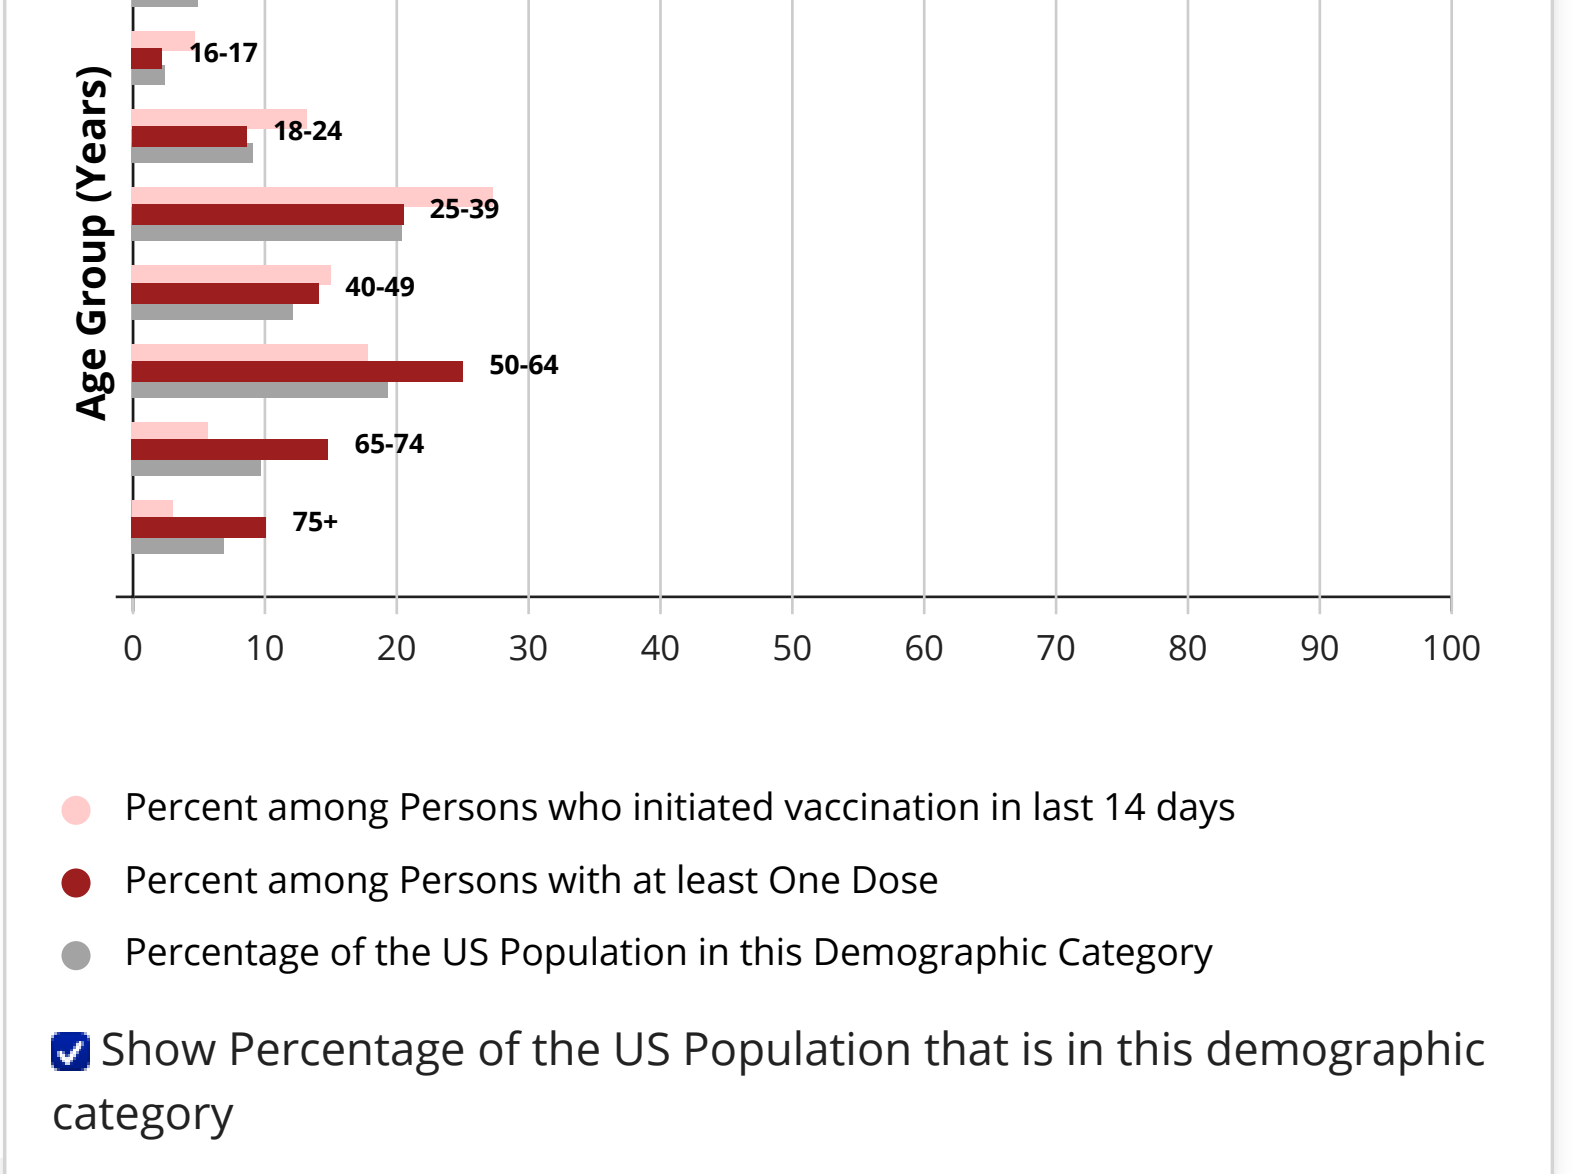

Data from 171,773,370 people fully vaccinated. Race/Ethnicity was available for 108,720,101 (63.3%) people fully vaccinated.

Age Groups of People with at least One Dose Administered:

Download

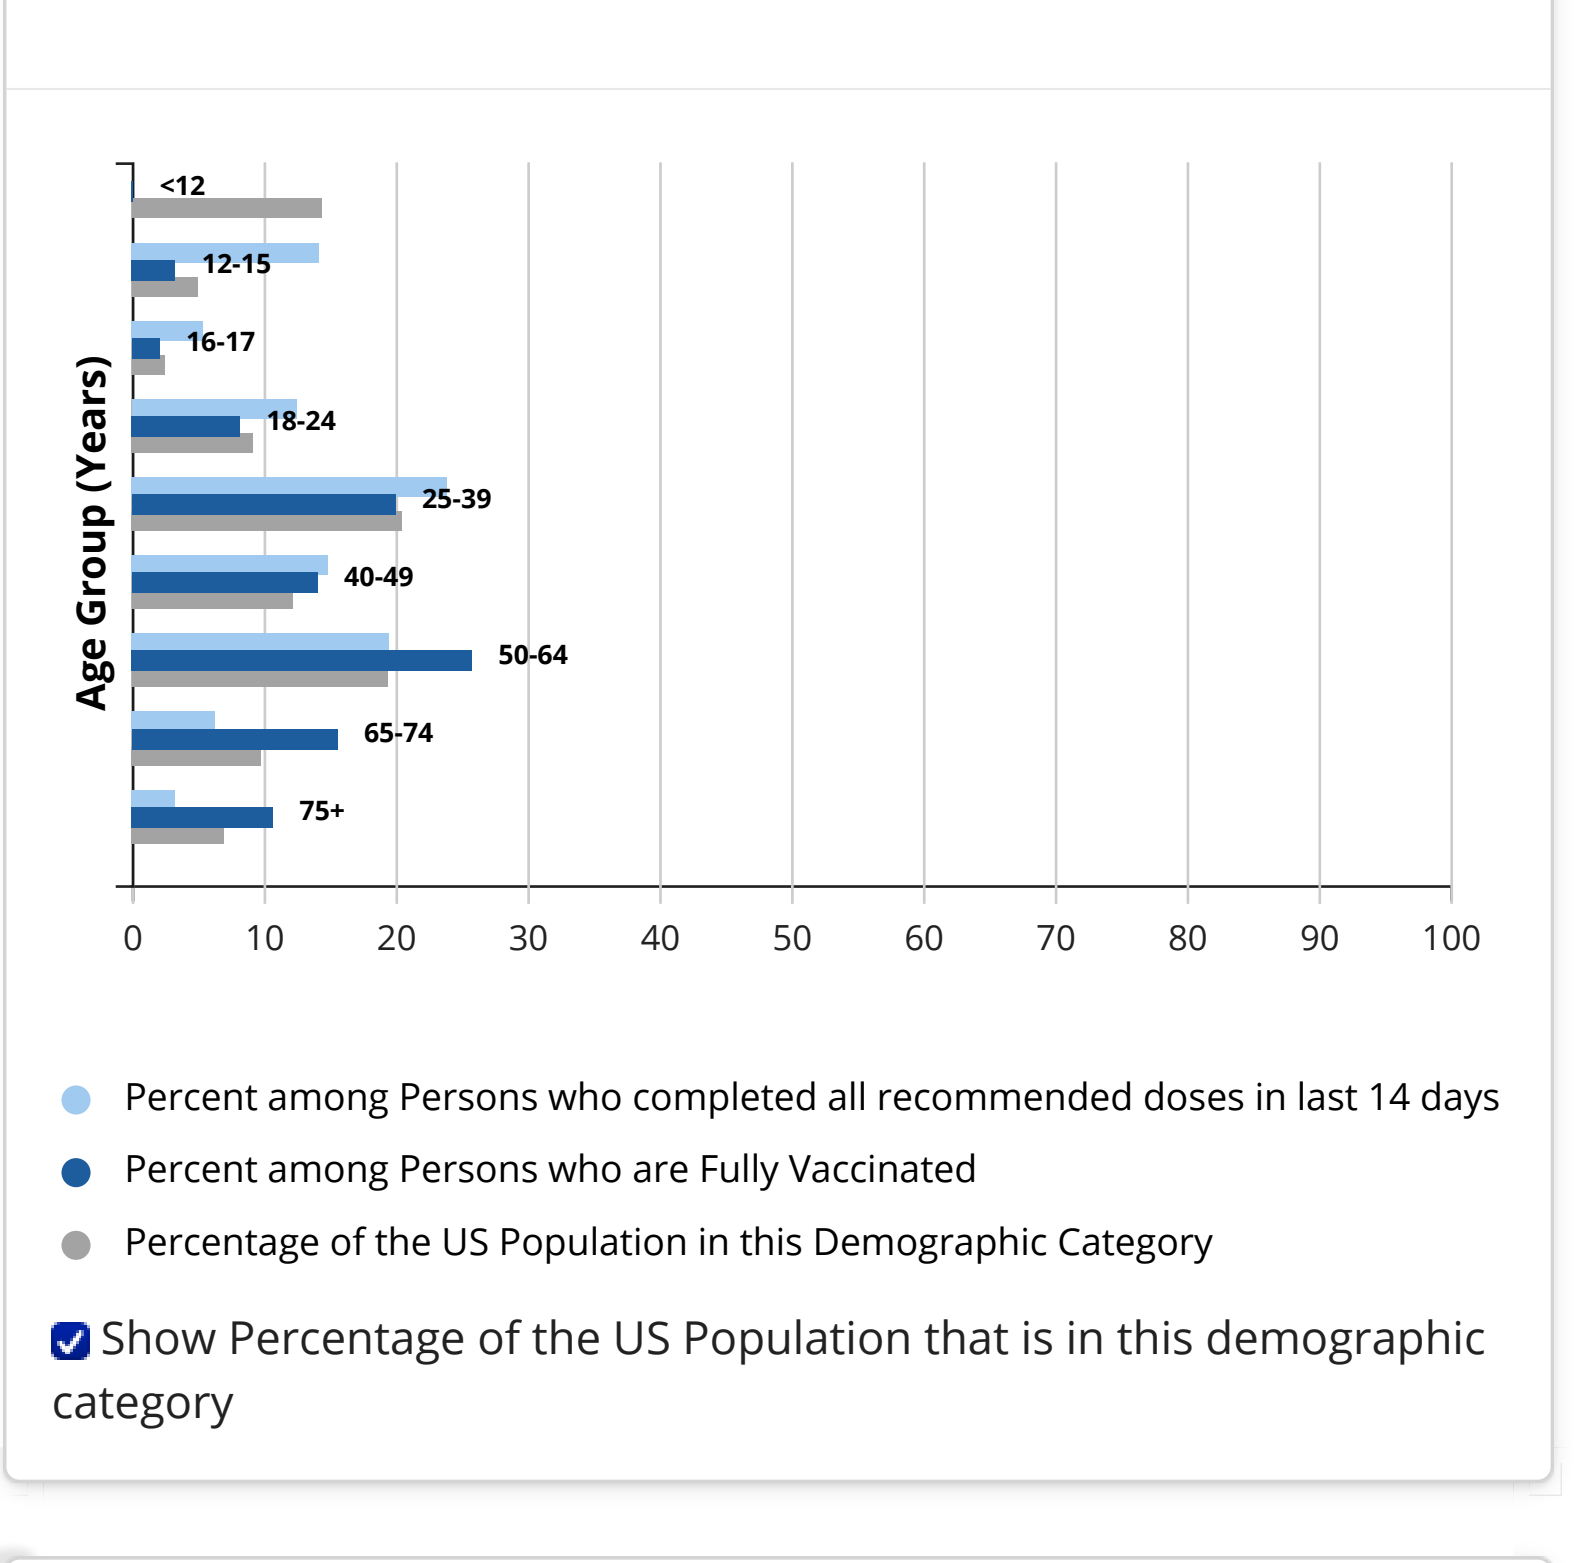

Data from 202,500,853 people with at least one dose administered. Age was available for 186,161,723 (91%) people with at least one dose administered.

Age Groups of People Fully Vaccinated:

Download

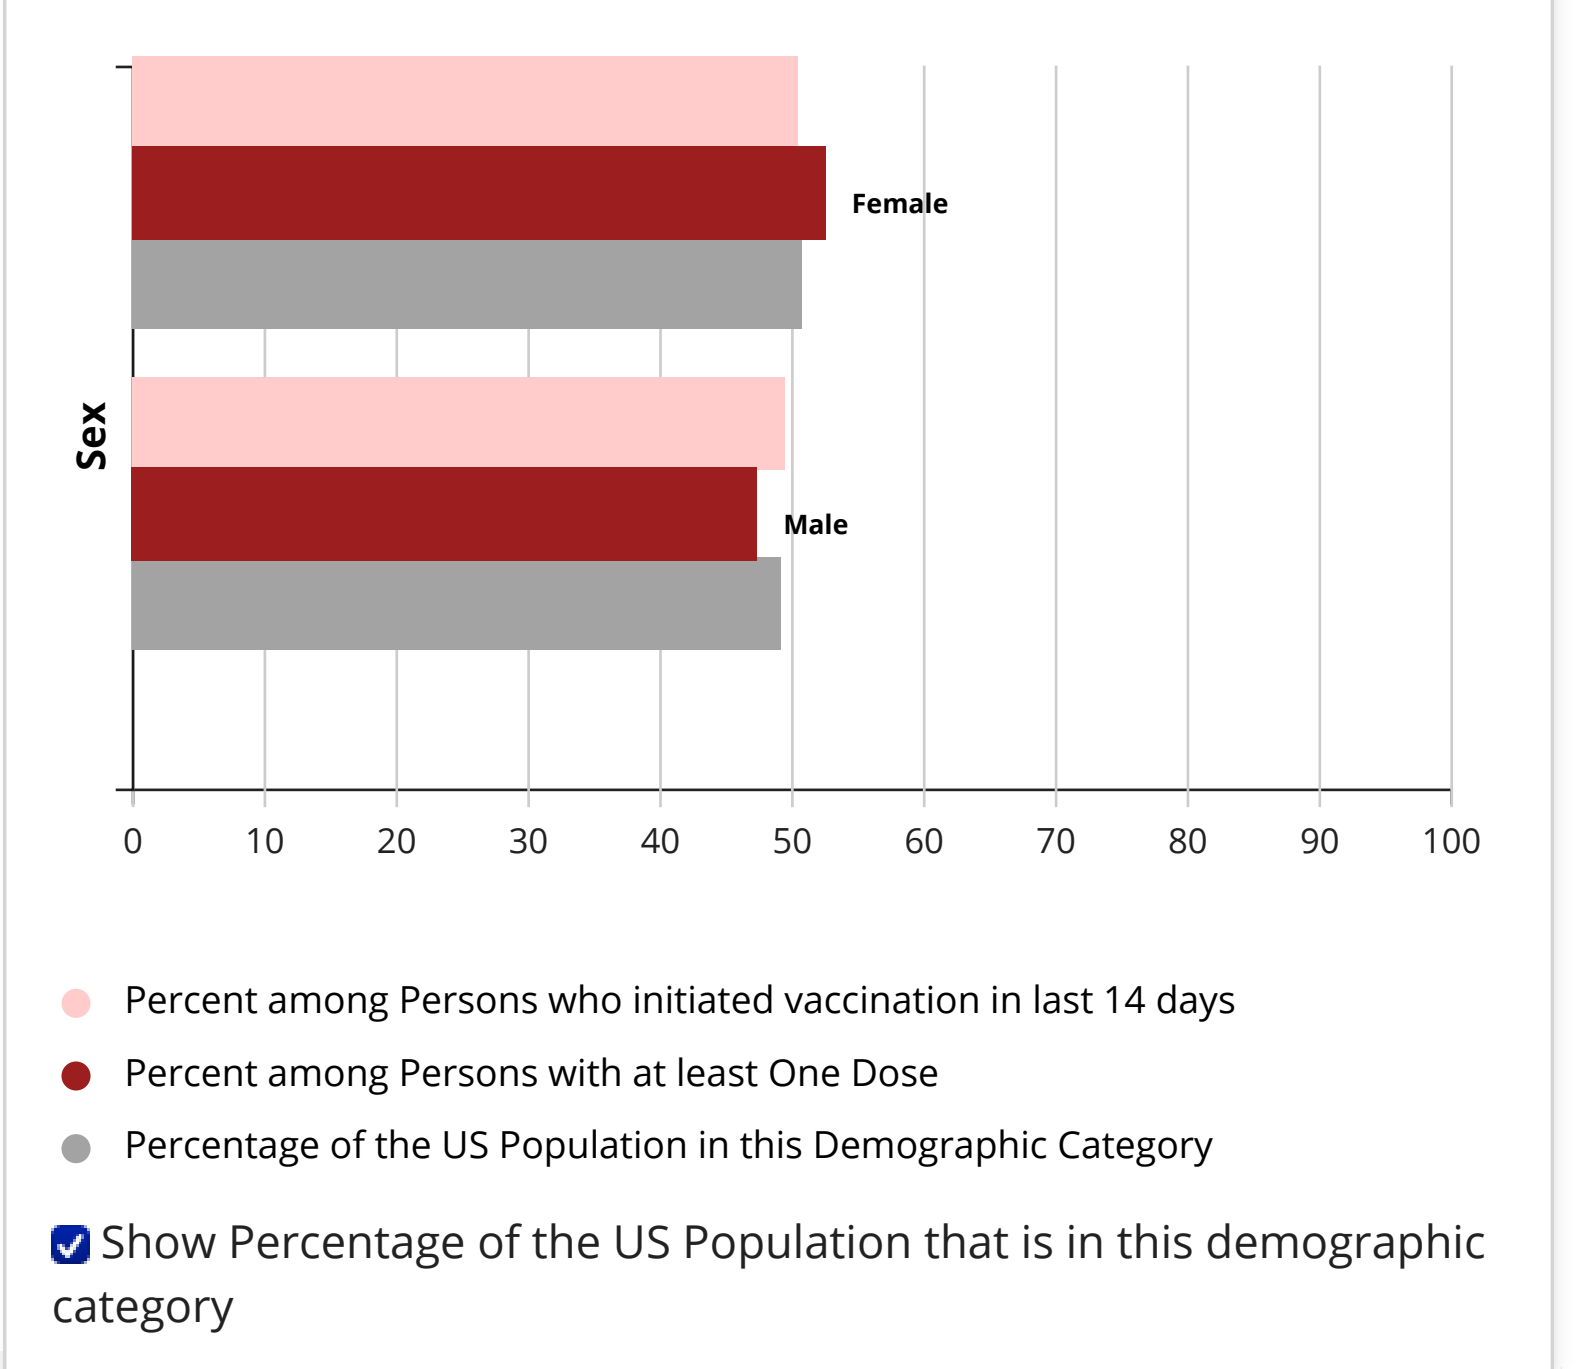

Data from 171,773,370 people fully vaccinated. Age was available for 158,265,205 (92%) people fully vaccinated.

Sex of People with at least One Dose Administered:

Download

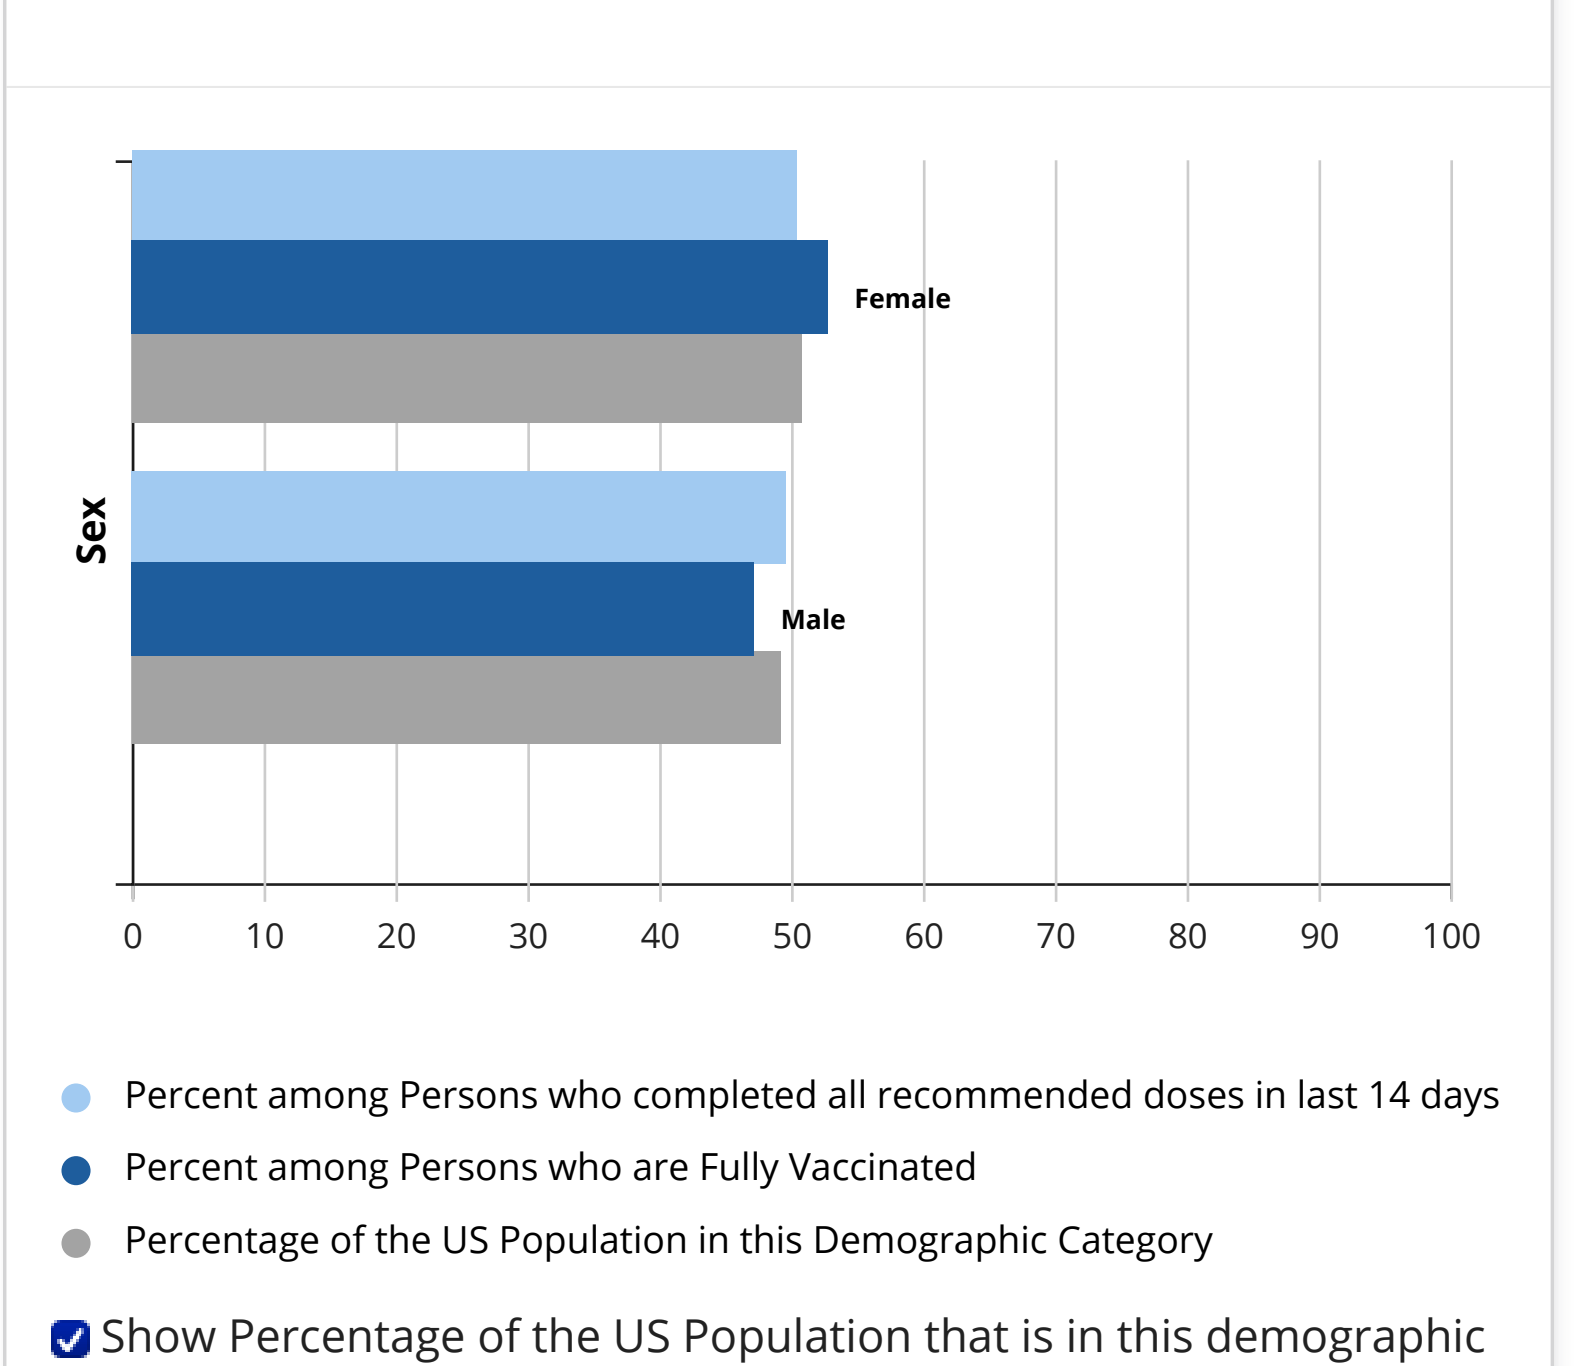

Data from 202,500,853 people with at least one dose administered. Sex was available for 184,301,560 (91%) people with at least one dose administered.

Sex of People Fully Vaccinated:

Download

Data from 171,773,370 people fully vaccinated. Sex was available for 156,923,756 (91.4%) people fully vaccinated.

Footnotes

- Timing:** ¹Data will be updated as soon as they are reviewed and verified, often before 8:00 pm ET each day. However, daily updates may take longer if there are any delays in data reporting.
- Data on doses of vaccine administered included data received by CDC as of 6:00 am ET on the day of reporting.
 - Vaccination data on the CDC COVID Data Tracker are updated daily (including weekends) between 1:30 pm and 8:00 pm ET.
 - Updates will occur the following day when reporting coincides with a federal holiday.

Updates:
- Beginning August 9, 2021, submitting entities will have the ability to update or delete previously submitted records using new functionality available in CDC's Data Clearinghouse. Use of this new functionality may result in fluctuations across metrics on the CDC COVID Data Tracker as historical data are updated or deleted. The functionality will also allow for more accurate reporting and improved data quality.
