

## Supplemental Information

**SUPPLEMENTAL TABLE 4** Results of Multiple Logistic Regression (Imputed Model) Indicating Age of EI Enrollment as an Independent Predictor of K-Readiness

Predictor	Adjusted OR	95% CI
Early EI entry, before the age of 6 mo	1.97	1.16–3.37
Late EI late, at or after the age of 6 mo	Reference	—
Disability diagnosis while in EI	0.24	0.13–0.46
No disability diagnosis	Reference	—
Mother education level		
Some college or higher	1.99	1.18–3.37
Unknown educational level	0.79	0.33–1.90
No college	Reference	—
Private insurance	2.76	1.56–4.89
Public or self-pay insurance	Reference	—
Bilateral hearing loss	0.44	0.25–0.77
Unilateral hearing loss	Reference	—

—, not applicable.
