Pregnant women with COVID-19 by age, United States, Jan

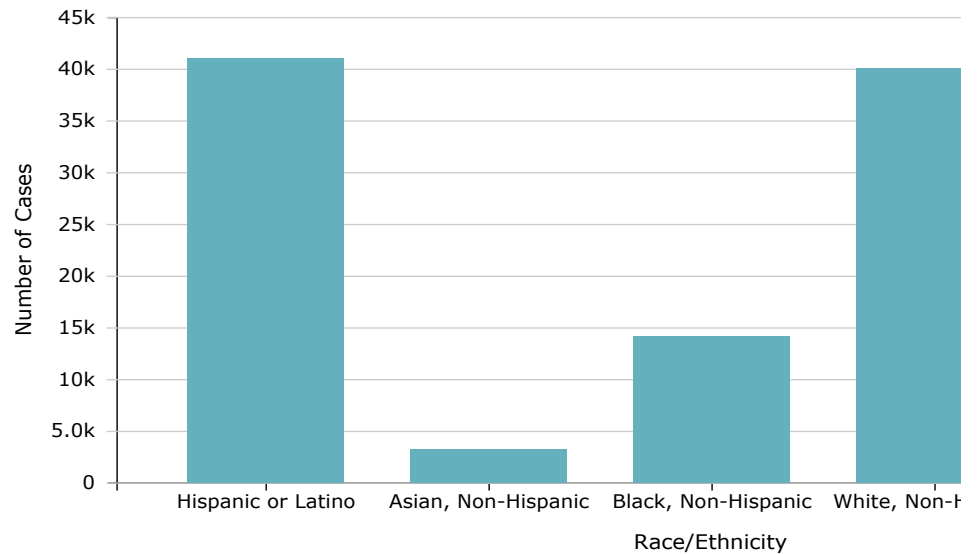

September 13, 2021

Data were collected from 120,459 women, and age was available for 120,459 (100%) women

Pregnant women with COVID-19 by race/ethnicity, United States, January 22, 2020 - September 13, 2021

Data were collected from 120,459 women, but race/ethnicity was only available for 105,309

Pregnant Women with COVID-19 who were hospitalized, United States, January 22, 2020 - September 13, 2021

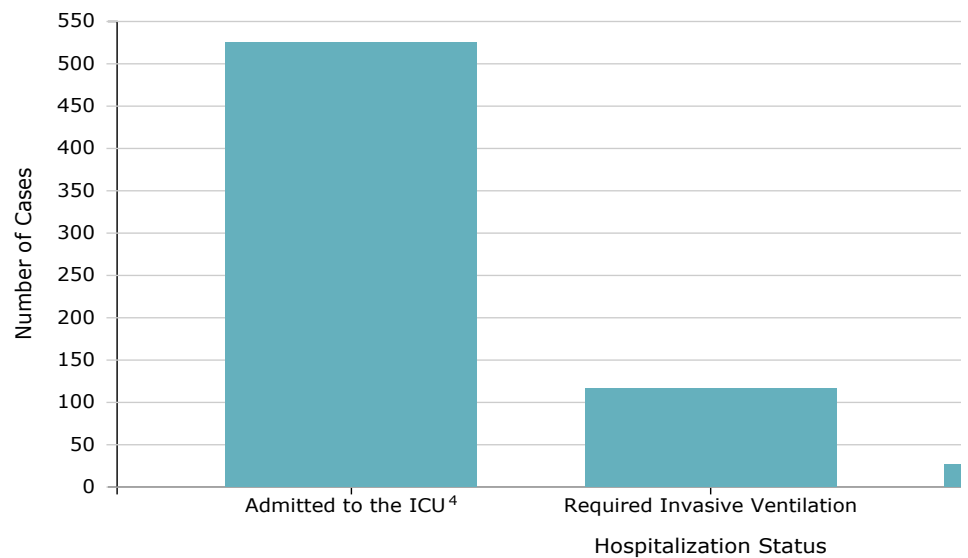

Data were collected from 120,459 women, but hospitalization data were only available for 9

HOSPITALIZED CASES³

21,387

Pregnant women with COVID-19 admitted to the ICU, who required mechanical ventilation, or who required ECMO, United States, January 22, 2020 - September 13, 2021

Data were collected from 120,459 women, but ICU admission data were only available for 10,818 (9%) women, and ECMO data were only available for 10,818 (9%) women.

¹ Cases with age <9 years and >54 years are excluded. Cases with unknown age are included.

² Other race includes non-Hispanic American Indian or Alaska Native or non-Hispanic Native Hawaiian or Other Pacific Islander

³ Data were not available to distinguish hospitalization for COVID-19-related indications, such as worsening respiratory status, from other indications, such as delivery.

⁴ Abbreviation: ICU, intensive care unit; ECMO, extracorporeal membrane oxygenation, an advanced life support technique used for severe respiratory problems.

Data Table for COVID-19 during Pregnancy

This page is updated weekly. The cases reported include only confirmed cases with laboratory evidence of COVID-19.

New York City, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Only about a third of case information on pregnancy status. Therefore, these numbers likely do not include all pregnant women with COVID-19.

of cases of COVID-19 among pregnant women are largely due to the updating of pregnancy status among all cases reported on other websites may differ from what is posted on CDC's website because CDC's overall counts may fluctuate from week to week due to data quality and cleaning processes.

the timing of reporting and website updates. The process used for finding and confirming cases reported by other sources may fluctuate from week to week due to data quality and cleaning processes.

Since October 2020, CDC has excluded reports of cases of COVID-19 among pregnant women who are younger than age 14 in the weekly reporting. Based on review of data quality, cases reported as pregnant with ages younger than age 14 are less likely to be true pregnancies, and more likely to be data errors. Cases with unknown age are still included.
