Healthcare Facilities in Production for COVID-19 Electronic Case Reporting

Updated Sept. 17, 2021 [Print](#)

[PNG - 511 KB]

Footnote: Electronic case reporting (eCR) is the automated, real-time exchange of case report information between electronic health records and public health agencies. In partnership with the Association of Public Health Laboratories (APHL) and the Council of State and Territorial Epidemiologists (CSTE), CDC is rapidly onboarding healthcare facilities to eCR during the COVID-19 pandemic. As of September 17, 2021, more than 9,400 facilities are actively sending COVID-19 electronic initial case reports to public health using eCR. Reports that meet the reporting criteria for multiple jurisdictions are sent to each jurisdiction at the same time.

Footnote: In production: Healthcare facility is actively sending electronic case reports to public health agencies.
