

SUPPLEMENTARY TABLE 2. COVID-19 vaccination attitudes, perceptions, recommendations, experiences, and difficulty among adults aged ≥18 years, by disability* and COVID-19 vaccination† status — National Immunization Survey Adult COVID Module, United States, May 30–June 26, 2021

Vaccination Status/Response	% [§] (95% CI)		Prevalence ratio [¶] (95% CI)	
	With a disability*	Without a disability	Unadjusted	Age-adjusted
Total				
Very/moderately concerned about getting COVID-19	38.4 (35.8–41.1)	29.5 (28.7–30.3)	1.30 (1.21–1.40)**	1.28 (1.19–1.39)**
Thinks a COVID-19 vaccine is completely/very safe	57.9 (55.0–60.7)	61.1 (60.2–62.1)	0.94 (0.89–0.99)**	0.82 (0.78–0.87)**
Thinks a COVID-19 vaccine is very/somewhat important for protection	81.0 (78.7–83.2)	77.5 (76.7–78.3)	1.04 (1.01–1.08)**	0.98 (0.94–1.02)
Many/almost all friends/family have received a COVID-19 vaccine	61.8 (59.0–64.5)	65.7 (64.8–66.6)	0.94 (0.89–0.98)**	0.85 (0.81–0.90)**
Health care provider recommended the COVID-19 vaccine	44.9 (42.2–47.6)	34.8 (34.0–35.7)	1.29 (1.21–1.38)**	1.20 (1.12–1.28)**
Would be/was somewhat or very difficult to get the vaccine	20.7 (18.4–23.1)	15.9 (15.2–16.5)	1.30 (1.15–1.47)**	1.19 (1.05–1.36)**
Getting an appointment online made/makes it difficult to get the vaccine	16.5 (14.6–18.6)	17.3 (16.6–17.9)	0.96 (0.84–1.09)	0.81 (0.71–0.93)**
Not knowing where to get vaccinated made/makes it difficult to get the vaccine	10.0 (8.5–11.9)	9.1 (8.6–9.7)	1.10 (0.92–1.31)	1.02 (0.84–1.23)
Getting to vaccination sites made/makes it difficult to get the vaccine	11.3 (9.5–13.4)	6.0 (5.6–6.5)	1.87 (1.55–2.26)**	1.88 (1.53–2.29)**
Vaccination sites not being open at convenient times made/makes it difficult to get the vaccine	9.8 (8.3–11.7)	6.6 (6.1–7.0)	1.50 (1.25–1.81)**	1.57 (1.30–1.90)**
Vaccinated				
Very/moderately concerned about getting COVID-19	40.1 (37.0–43.2)	33.8 (32.8–34.7)	1.19 (1.09–1.29)**	1.21 (1.11–1.31)**
Thinks a COVID-19 vaccine is completely/very safe	73.4 (70.3–76.2)	80.6 (79.8–81.4)	0.91 (0.87–0.95)**	0.87 (0.83–0.91)**
Thinks a COVID-19 vaccine is very/somewhat important for protection	94.3 (92.6–95.5)	96.1 (95.7–96.5)	0.98 (0.97–1.00)**	0.97 (0.95–0.99)**
Many/almost all friends/family have received a COVID-19 vaccine	73.3 (70.4–76.1)	84.0 (83.3–84.8)	0.87 (0.84–0.91)**	0.85 (0.82–0.89)**
Health care provider recommended the COVID-19 vaccine	51.3 (48.1–54.5)	41.1 (40.1–42.1)	1.25 (1.17–1.34)**	1.21 (1.13–1.30)**
Would be/was somewhat or very difficult to get the vaccine	17.3 (15.1–19.7)	18.8 (18.0–19.6)	0.92 (0.80–1.06)	0.84 (0.72–0.97)**
Getting an appointment online made/makes it difficult to get the vaccine	19.2 (16.9–21.8)	24.0 (23.2–24.9)	0.80 (0.70–0.91)**	0.74 (0.64–0.85)**
Not knowing where to get vaccinated made/makes it difficult to get the vaccine	9.3 (7.8–11.2)	10.7 (10.1–11.4)	0.87 (0.72–1.05)	0.81 (0.66–0.99)**
Getting to vaccination sites made/makes it difficult to get the vaccine	8.0 (6.4–9.9)	6.5 (6.0–7.0)	1.23 (0.98–1.55)	1.22 (0.96–1.56)
Vaccination sites not being open at convenient times made/makes it difficult to get the vaccine	9.0 (7.3–11.1)	6.1 (5.6–6.6)	1.49 (1.19–1.87)**	1.49 (1.18–1.88)**
Not Vaccinated				
Very/moderately concerned about getting COVID-19	34.9 (30.2–40.0)	21.6 (20.2–23.1)	1.61 (1.38–1.89)**	1.61 (1.37–1.89)**
Thinks a COVID-19 vaccine is completely/very safe	20.0 (15.8–25.1)	19.1 (17.6–20.7)	1.05 (0.82–1.34)	1.10 (0.86–1.41)
Thinks a COVID-19 vaccine is very/somewhat important for protection	53.1 (47.7–58.4)	42.3 (40.6–44.1)	1.25 (1.12–1.40)**	1.29 (1.16–1.44)**
Many/almost all friends/family have received a COVID-19 vaccine	37.8 (32.7–43.1)	31.9 (30.3–33.6)	1.18 (1.02–1.37)**	1.19 (1.03–1.38)**
Health care provider recommended the COVID-19 vaccine	32.3 (27.7–37.2)	23.5 (22.1–25.0)	1.37 (1.17–1.61)**	1.27 (1.08–1.51)**

Would be/was somewhat or very difficult to get the vaccine	27.6 (22.7–33.0)	10.4 (9.4–11.5)	2.65 (2.15–3.28)**	2.69 (2.16–3.34)**
Getting an appointment online made/makes it difficult to get the vaccine	11.0 (8.1–14.8)	4.8 (4.0–5.6)	2.31 (1.64–3.26)**	2.14 (1.48–3.10)**
Not knowing where to get vaccinated made/makes it difficult to get the vaccine	11.5 (8.3–15.7)	6.2 (5.4–7.1)	1.86 (1.31–2.65)**	1.95 (1.36–2.79)**
Getting to vaccination sites made/makes it difficult to get the vaccine	18.1 (13.9–23.2)	5.2 (4.5–6.0)	3.46 (2.58–4.65)**	3.43 (2.53–4.67)**
Vaccination sites not being open at convenient times made/makes it difficult to get the vaccine	11.5 (8.6–15.3)	7.5 (6.6–8.5)	1.54 (1.12–2.12)**	1.69 (1.23–2.33)**

Abbreviations: CI = confidence interval.

* Disability was defined as an affirmative response to the following survey item: “Do you have serious difficulty seeing, hearing, walking, remembering, making decisions, or communicating?” (135 respondents did not know or refused to answer).

† Respondents were considered vaccinated if they reported having received at least one dose of any of the approved COVID-19 vaccines (Pfizer, Moderna, or Johnson & Johnson/Janssen).

§ Weighted percent.

¶ Prevalence ratio of people with a disability compared to people without a disability.

** $p < 0.05$ for prevalence ratio.
