Demographic Trends of COVID-19 cases and deaths in the US reported to CDC

Maps, charts, and data provided by CDC, updates Tues-Sun by 8 pm ET[†]
 CDC is working with states to provide more information on race/ethnicity for reported cases. The percent of reported cases that include race/ethnicity data is increasing.
 These data only represent the geographic areas that contributed data on race/ethnicity. Every geographic area has a different racial and ethnic composition. These data are not generalizable to the entire U.S. population.
 If cases were distributed equally across racial and ethnic populations, one would expect to see more cases in those populations that are more highly represented in geographic areas that contributed data.
 Percentages displayed in the charts below represent the percent of cases or deaths for which the demographic variable of interest is known.

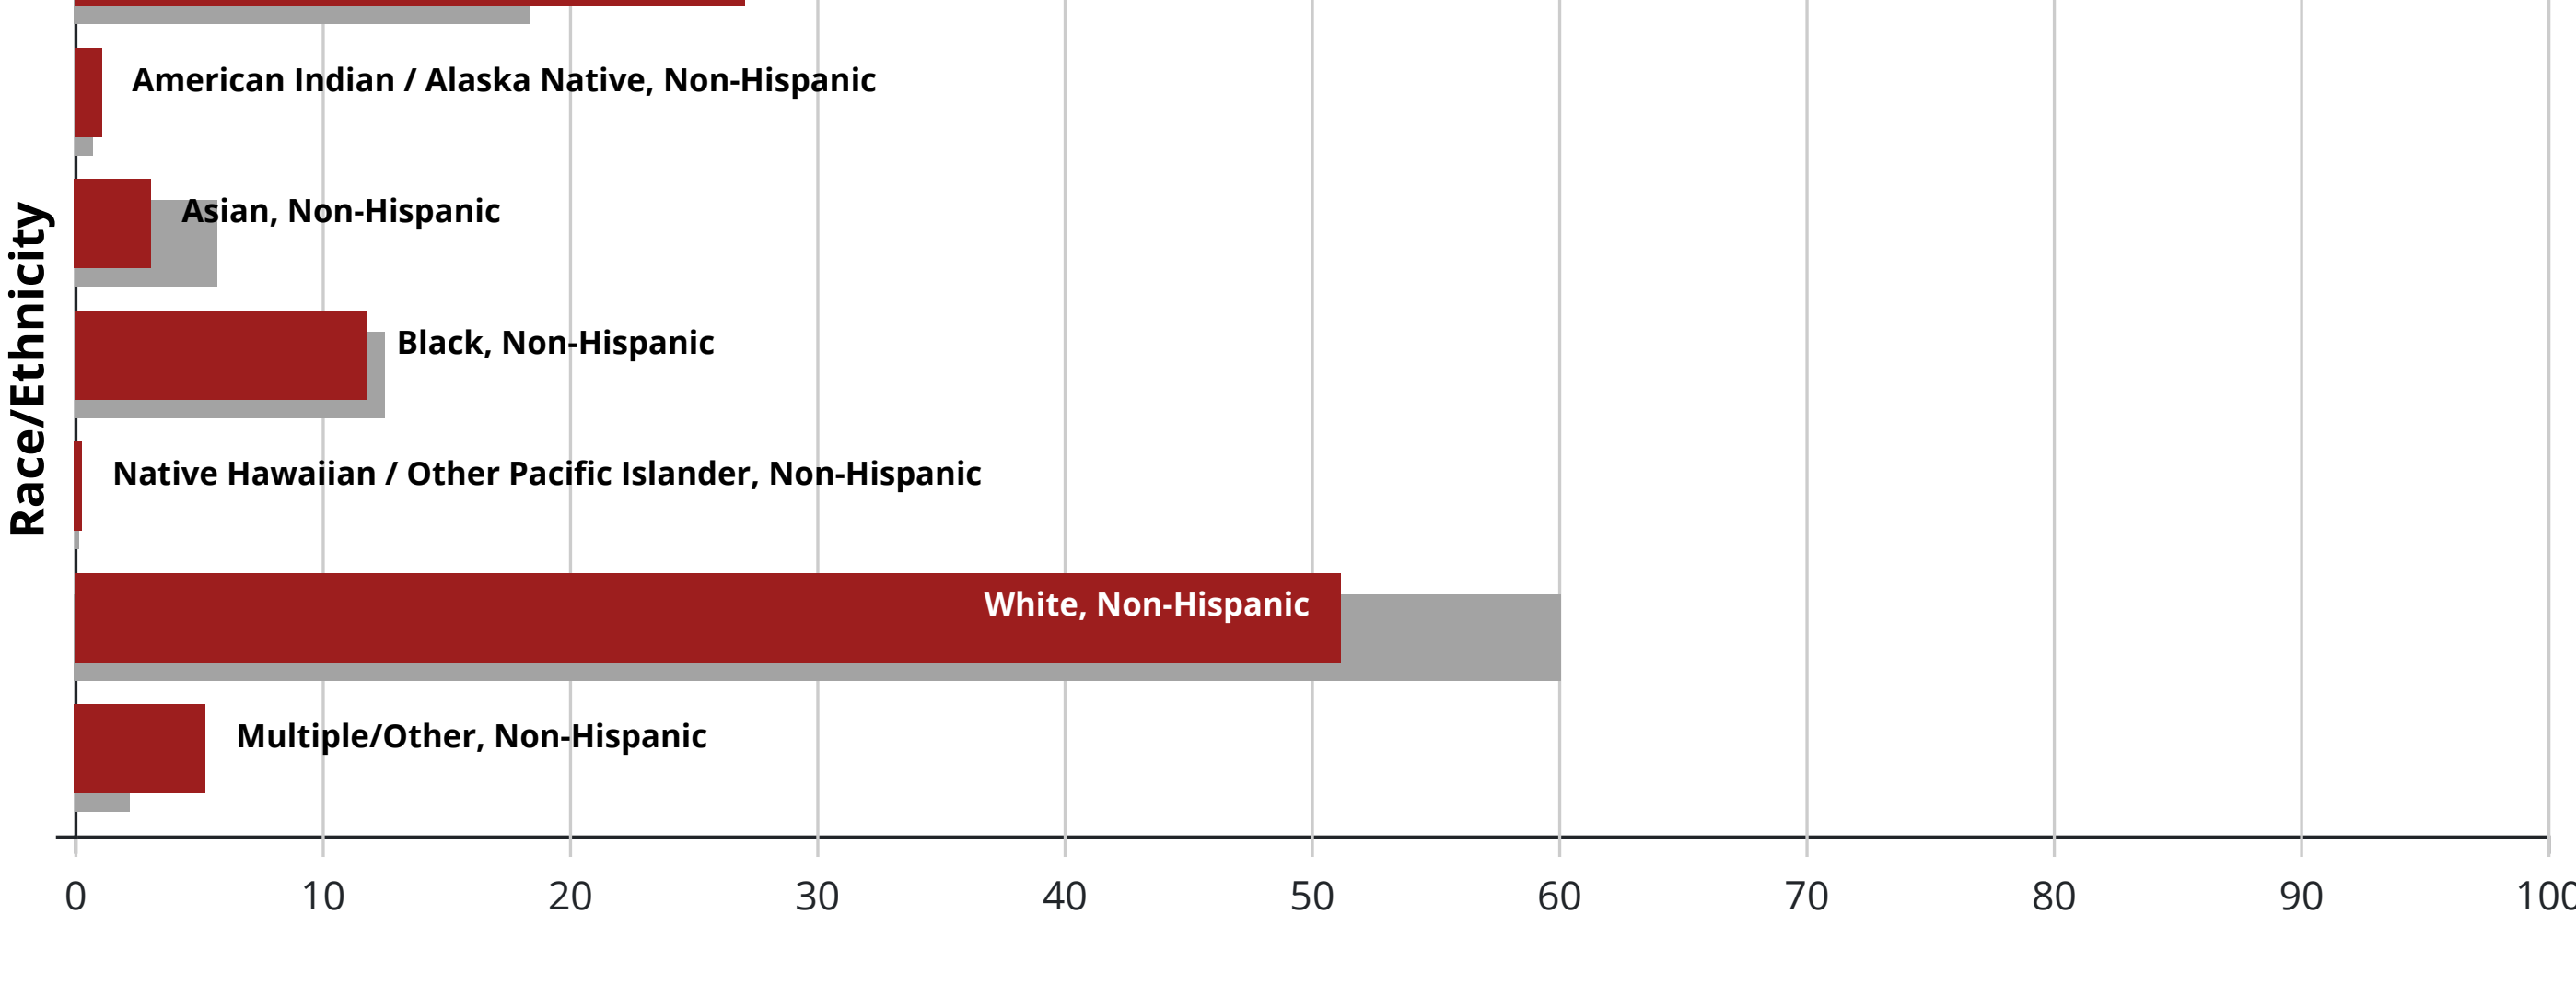

CDC | Data as of: Wednesday, September 22, 2021 2:02 PM ET. Posted: Wednesday, September 22, 2021 4:30 PM ET
