Demographic Characteristics of People Receiving COVID-19 Vaccinations in the United States

Overall US COVID-19 Vaccine Distribution and Administration; Maps, charts, and data provided by CDC, updates daily by 8 pm ET[†]

The Centers for Disease Control and Prevention (CDC) is working with states to provide more information on the demographic characteristics of vaccinated people.

These demographic data only represent the geographic areas that contributed data and might differ by populations prioritized within each state or jurisdiction's vaccination phase. Every geographic area has a different racial and ethnic composition, and not all are in the same vaccination phase. These data are thus not generalizable to the entire US population.

Percentages displayed in the charts below represent the percent of people vaccinated for whom the demographic variable of interest is known.

About these data

[How Do I Find a COVID-19 Vaccine?](#)

[View Footnotes and Download Data](#)

In the figures below, the dark red/blue/purple bars represent the percentage of all vaccinated people who fall into each demographic group, and the gray bars represent the percentage of all people in the U.S. population who fall into each demographic group. If all groups got vaccinated according to their share of the population, the dark red/blue/purple bars would be the same length as the gray bars.

- Instances where the dark red bar is shorter than the gray bar indicate that the number of people in that group who received at least one shot is lower than would be expected based on the number of people in that group in the U.S. population.
- Instances where the dark blue bar is shorter than the gray bar indicate that the number of fully vaccinated people in that group is lower than would be expected based on the number of people in that group in the U.S. population.
- Instances where the dark purple bar is shorter than the gray bar indicate that the number of people with a booster dose in that group is lower than would be expected based on the number of fully vaccinated people in that group in the U.S. population.

Race/Ethnicity

Show:

- At Least One Dose
 Fully Vaccinated
 Booster Dose

Race/Ethnicity of People with at least One Dose Administered:

Download

Data from 231,367,686 people with at least one dose administered. Race/Ethnicity was available for 161,654,159 (69.9%) people with at least one dose administered.

- Show Percentage of the US Population that is in this demographic category

Age Group

Show:

- At Least One Dose
 Fully Vaccinated
 Booster Dose

Age Groups of People with at least One Dose Administered:

Download

Data from 231,367,686 people with at least one dose administered. Age was available for 231,343,815 (100%) people with at least one dose administered.

- Show Percentage of the US Population that is in this demographic category

Sex

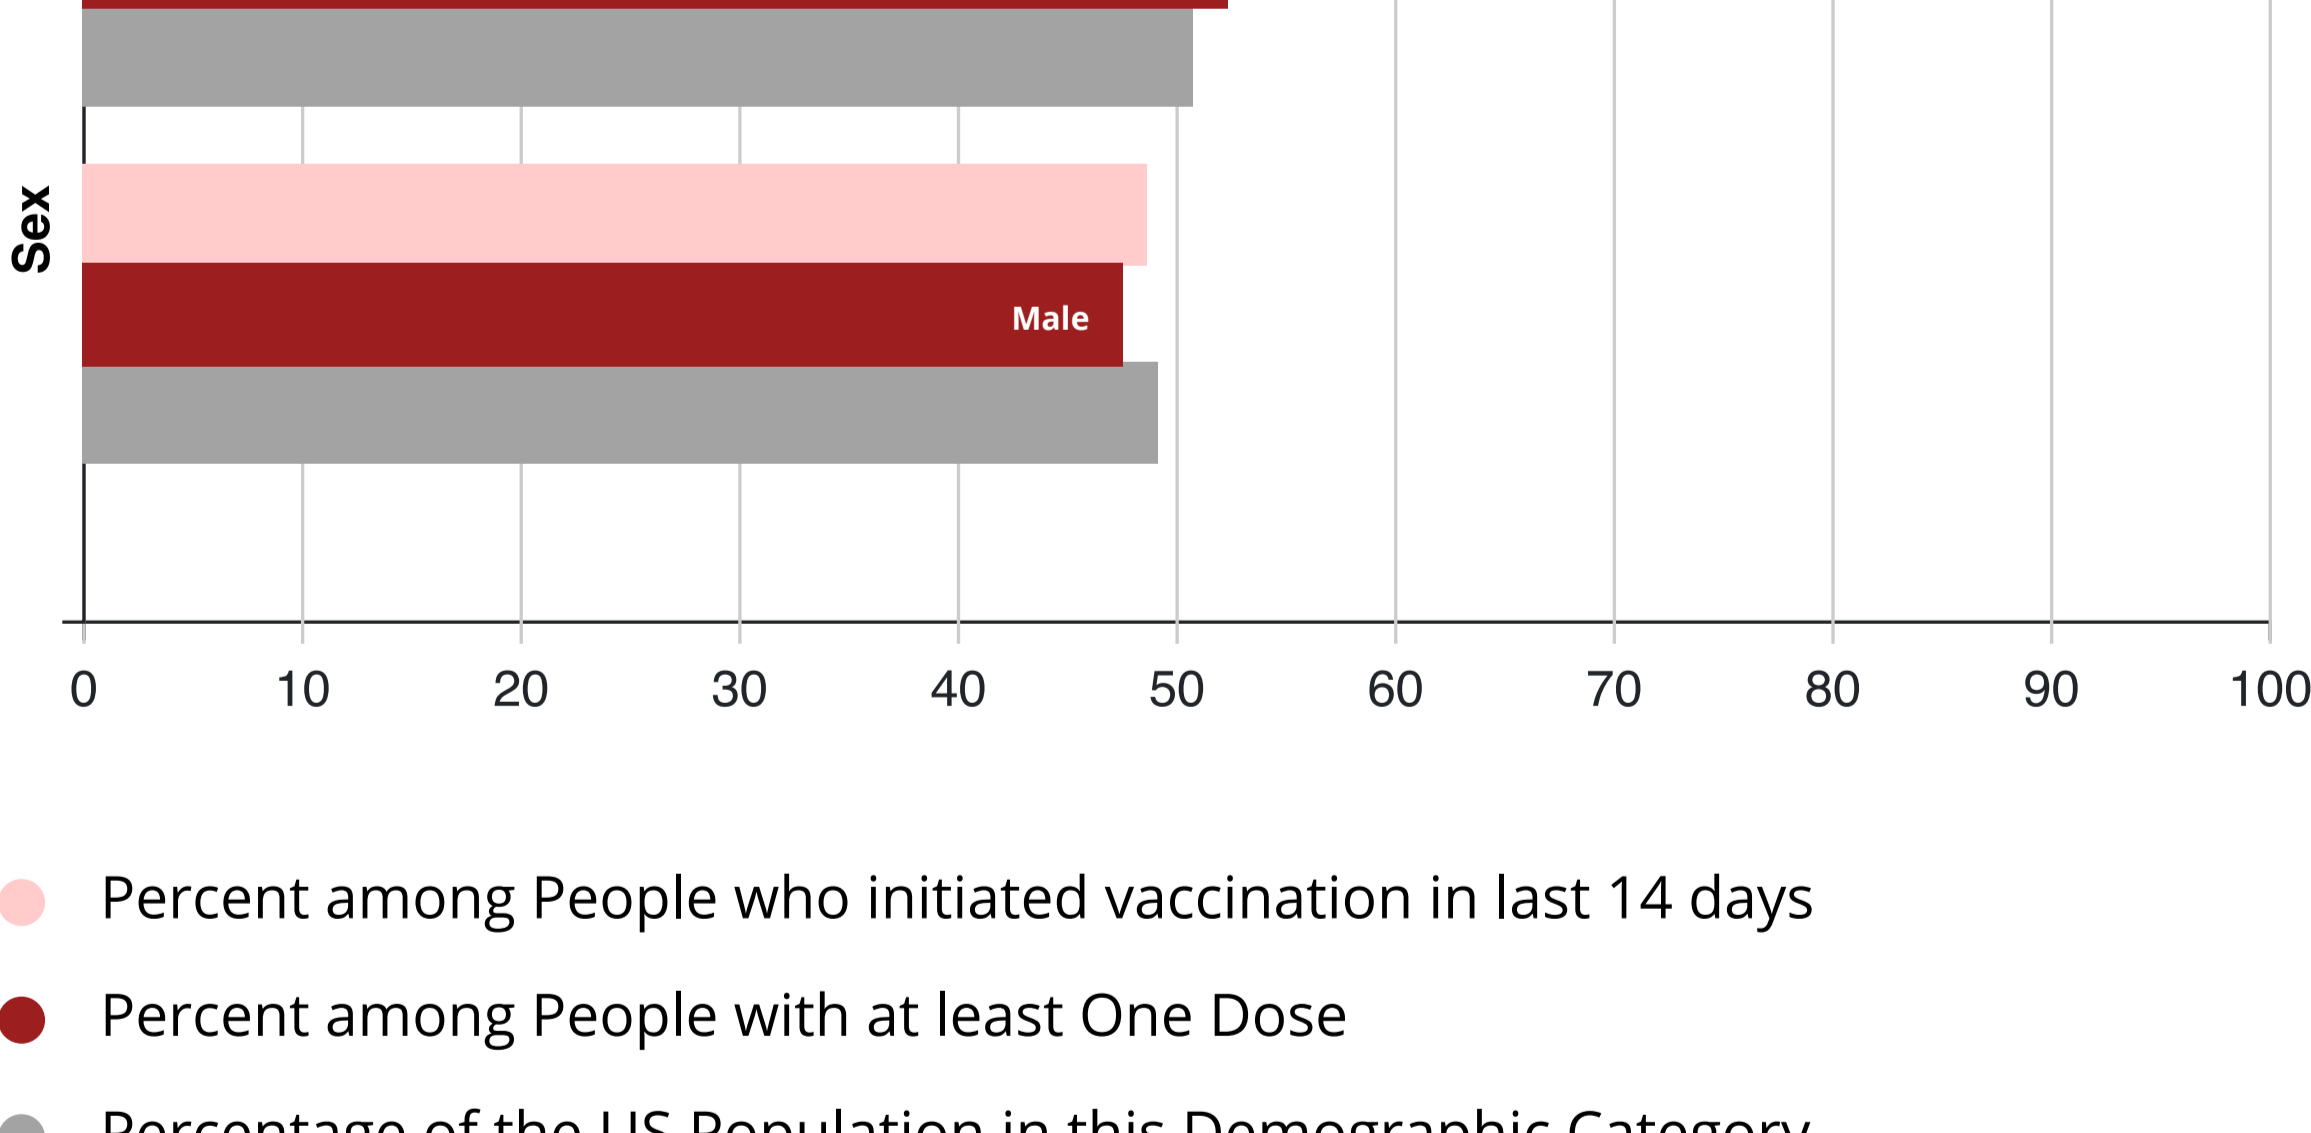

Show:

- At Least One Dose
 Fully Vaccinated
 Booster Dose

Sex of People with at least One Dose Administered:

Download

Data from 231,367,686 people with at least one dose administered. Sex was available for 229,217,911 (99.1%) people with at least one dose administered.

- Show Percentage of the US Population that is in this demographic category
