

What is mPINC?

mPINC is CDC's national survey of Maternity Practices in Infant Nutrition and Care.

What does mPINC measure?

The survey measures care practices and policies that impact newborn feeding, feeding education, staff skills, and discharge support.

Who is included in mPINC surveys?

CDC invites all hospitals with maternity services in the U.S. and territories to participate. In 2020, 16 of 17 eligible hospitals in New Hampshire participated (94%).

State Total Score*

National Total Score*

81

Implementing best practices and policies in maternity care help to improve breastfeeding outcomes. Use your state's mPINC data to bring together partners, identify gaps, celebrate achievements, and prioritize next steps.

Category	National Subscore	New Hampshire Subscore	New Hampshire Hospitals with Ideal Response
Immediate Postpartum Care	83	91	
Newborns remain in uninterrupted skin-to-skin contact for at least 1 hour or until breastfed (vaginal delivery)			75%
Newborns remain in uninterrupted skin-to-skin contact for at least 1 hour or until breastfed (cesarean delivery)			63%
Mother-infant dyads are NOT separated before rooming-in (vaginal delivery)			100%
Newborns are monitored continuously for the first 2 hours after birth			88%
Rooming-In	76	82	New Hampshire Hospitals with Ideal Response
Mother-infant dyads are rooming-in 24 hours/day			94%
Routine newborn exams, procedures, and care occur in the mother's room			19%
Hospital has a protocol requiring frequent observations of high-risk mother-infant dyads			88%
Feeding Practices	82	95	New Hampshire Hospitals with Ideal Response
Few breastfeeding newborns receive infant formula			88%
Hospital does NOT perform routine blood glucose monitoring on newborns not at risk for hypoglycemia			94%
When breastfeeding mothers request infant formula, staff counsel them about possible consequences			81%

Feeding Education & Support	National Subscore	93	New Hampshire Subscore	99	New Hampshire Hospitals with Ideal Response
Mothers whose newborns are fed formula are taught feeding techniques and how to safely prepare/feed formula					94%
Breastfeeding mothers are taught/shown how to recognize/respond to feeding cues, to breastfeed on-demand, and to understand the risks of artificial nipples/pacifiers					94%
Breastfeeding mothers are taught/shown how to position and latch their newborn, assess effective breastfeeding, and hand express milk					88%
Discharge Support	National Subscore	79	New Hampshire Subscore	97	New Hampshire Hospitals with Ideal Response
Discharge criteria for breastfeeding newborns requires direct observation of at least 1 effective feeding at the breast within 8 hours of discharge					100%
Discharge criteria for breastfeeding newborns requires scheduling of the first follow-up with a health care provider					100%
Hospital's discharge support to breastfeeding mothers includes in-person follow-up visits/appointments, personalized phone calls, or formalized, coordinated referrals to lactation providers					100%
Hospital does NOT give mothers any of these items as gifts or free samples: infant formula; feeding bottles/nipples, nipple shields, or pacifiers; coupons, discounts, or educational materials from companies that make/sell infant formula/feeding products					88%
Institutional Management	National Subscore	71	New Hampshire Subscore	77	New Hampshire Hospitals with Ideal Response
Nurses are required to demonstrate competency in assessing breastfeeding (milk transfer & maternal pain), assisting with breastfeeding (positioning & latch), teaching hand expression & safe formula preparation/feeding, and demonstrating safe skin-to-skin practices					94%
Hospital requires nurses to be formally assessed for clinical competency in breastfeeding support/lactation management					56%
Hospital records/tracks exclusive breastfeeding throughout the entire hospitalization					94%
Hospital pays a fair market price for infant formula					56%
Hospital has 100% of written policy elements [§]					38%

*Scores range from 0 to 100, with 100 being the best possible score. The "Total Score" is an average of the subscores for the 6 subdomains.

[§]See the scoring algorithm for specific items at www.cdc.gov/breastfeeding/data/mpinc/scoring.htm

NOTE: The mPINC survey was redesigned in 2018. Results from the 2020 mPINC survey cannot be compared with results from 2007-2015 mPINC surveys.
