# School Testing for COVID-19

Updated Jan. 24, 2022

It's critical that K-12 schools implement safety measures to keep schools open and students and staff healthy and safe from COVID-19. One key measure is regular COVID-19 testing in schools.

When used with vaccination, physical distancing, and properly wearing a mask, regular COVID-19 testing in schools can:

- Help reduce community spread of COVID-19, keeping schools open and students in classrooms, and protecting students and staff.
- Serve as an early warning to help schools identify COVID-19 cases early and stop an outbreak before it starts.
- Provide access to COVID-19 tests for families who may not be able to get them otherwise.
- Increase confidence among students, parents, and school staff around continuing in-person learning and other activities.

CDC urges you to implement COVID-19 testing programs at schools within your district and support and encourage program participation among parents and staff.

## Find tools and resources to start and support school-based testing:

- [CDC's Communication Toolkit for Schools](#): Letters, FAQs, social media posts, posters, and flyers to reach parents and educators
- [ELC Reopening Schools](#): Resources to launch and maintain a school testing program, including details on available funding for your jurisdiction
- [Open and Safe Schools](#) [↗](#): Toolkit to support state and public health leaders and school leaders in starting or continuing testing programs (from the Shah Family Foundation)
- [Rockefeller Foundation's K-12 Playbook](#) [↗](#): Detailed, step-by-step guidance to design and start or continue testing programs in schools

## Communication Toolkit for Schools

This toolkit includes materials that school administrators can use to help promote regular COVID-19 testing programs and encourage participation among parents, students, and school staff. Many of these materials are customizable and can be adapted according to the school's needs.
