

Content on this page was developed during the 2009-2010 H1N1 pandemic and *has not been updated*.

- The H1N1 virus that caused that pandemic is now a regular human flu virus and continues to circulate seasonally worldwide.
- The English language content on this website is being archived for *historic and reference purposes only*.
- For current, updated information on seasonal flu, including information about H1N1, see the [CDC Seasonal Flu website](http://www.cdc.gov/flu/) (<http://www.cdc.gov/flu/>).
