[Technical Notes](#)

In response to the COVID-19 pandemic, NCHS is releasing provisional death data from the National Vital Statistics System (NVSS) on a [daily](#) and [weekly](#) basis. These data come directly from death certificates filed at the state and local level, and feature counts of COVID-19-related deaths by age, gender, race and Hispanic origin, place of death, and include information on other health conditions and comorbidities involved in these deaths. Estimates on excess deaths – the number of deaths exceeding the normal average total of deaths in recent years – are also included. The statistical summary below is updated weekly (usually on Wednesday), and includes links to corresponding data tables on the NCHS COVID-19 data page.

## Weekly Summary on COVID-19 Deaths

NOTE: Due to delayed reporting of death certificates, this count is incomplete and less than counts from other sources besides NCHS. The result is a lag in the count totals of a few weeks, and as more data are received, these totals will likely equal or exceed counts reported by other sources through the same week.

## Deaths Attributed to COVID-19 on Death Certificates

Data as of 2/9/2022	Total	2022	2021	2020
Deaths through week ending 2/5/2022	<b>898,710</b>			
In at least 90% of these deaths, COVID-19 was listed as the underlying cause of death. For the remaining deaths, COVID-19 was listed as a contributing cause of death.

## Weekly Highs and Lows of COVID-19 Deaths

Data as of 2/9/2022

Most Current (Incomplete) Weekly  
Total, week ending 2/5/2022

Highest Weekly Number of Deaths,  
week ending 1/9/2021

Lowest Weekly Number of Deaths,  
week ending 7/3/2021

**3,898**

**25,992**

**1,542**

Note: Lowest weekly number is selected based on weeks after the initial first wave peak (4/1/2020) and not within the last 5 weeks. Data for the most recent 5 weeks are typically less than 90% complete, with lower levels of completeness in more recent weeks.

## Place of Death

Data as of 2/9/2022

Total

2022

2021

2020

Hospital or Other Inpatient Health-Care Setting

Nursing Home or Long-Term Care Facilities

**68.4% (614,593 deaths)**

**14.7% (132,283 deaths)**

Microsoft Power BI

## Death by Age Group

Data as of 2/9/2022

Total

2022

2021

2020

65-and-over age group

45-64 age group

Under 45 age group

**74.3% (668,049 deaths)**

**21.4% (192,683  
deaths)**

**4.2% (37,967 deaths)**

Microsoft Power BI

## Percentage of COVID-19 Deaths by Race & Hispanic Origin

Data as of 2/9/2022

Total

2022

2021

2020

Non-Hispanic White

Hispanic

Non-Hispanic Black

**64% (575,183 deaths)**

**17% (147,925 deaths)**

**14% (129,039 deaths)**

Non-Hispanic Asian

NH American Indian/Alaskan Native

NH Native Hawaiian/Pacific Islanders

**3% (28,722 deaths)**

**1% (9,955 deaths)**

**0.2% (1,943 deaths)**

NOTE: This is the distribution of all COVID-19 deaths according to race and Hispanic origin. The non-Hispanic white population accounts for the majority of deaths overall which is reflected in this percentage distribution. When compared to their own race and Hispanic sub-population, COVID-19 deaths disproportionately affect Hispanic, non-Hispanic black, and non-Hispanic American Indian/Alaskan Native populations. Please see the [Health Disparities page](#) for more information.

Microsoft Power BI

## Most Frequently Listed Comorbidities with COVID-19 Deaths

Data as of 2/6/2022

Total

2022

2021

2020

Influenza & Pneumonia	Hypertension	Diabetes
<b>49.1% (436,659 deaths)</b>	<b>18.4% (163,563 deaths)</b>	<b>15.2% (134,965 deaths)</b>
Alzheimer disease and other Dementias	Sepsis	
<b>10.7% (95,393 deaths)</b>	<b>9.8% (87,215 deaths)</b>	

NOTE: There were co-morbidities or other conditions listed on the death certificate for as many as 95% of all COVID-19 deaths ([Table 3, Weekly](#)). The other 5% of death certificates in which COVID-19 was the only condition listed was likely related to a lack of detail listed about other conditions present at the time of death.

Microsoft Power BI

## Total Excess Deaths

Total Excess Deaths from  
2/1/2020 to 1/29/2022

**1,023,916**

This number reflects the total estimated number of excess deaths occurring since February 1, 2020.

Refer to "[Number of Excess Deaths](#)" dashboard listed under "Options."
