

COVID-19

COVID-19 by County

Updated Mar. 10, 2022

Know Your COVID-19 Community Level

COVID-19 Community Levels are a new tool to help communities decide what prevention steps to take based on the latest data. Levels can be low, medium, or high and are determined by looking at hospital beds being used, hospital admissions, and the total number of new COVID-19 cases in an area. Take precautions to protect yourself and others from COVID-19 based on the COVID-19 Community Level in your area.

COVID-19 County Check

Find community levels and prevention steps by county.

Select a Location (all fields required)

What Prevention Steps Should You Take Based on Your COVID-19 Community Level?

Low	Medium	High
- Stay up to date with COVID-19 vaccines Get tested if you have symptoms	- If you are at high risk for severe illness, talk to your healthcare provider about whether you need to wear a mask and take other precautions - Stay up to date with COVID-19 vaccines Get tested if you have symptoms	- Wear a mask indoors in public - Stay up to date with COVID-19 vaccines Get tested if you have symptoms - Additional precautions may be needed for people at high risk for severe illness
People may choose to mask at any time. People with symptoms, a positive test, or exposure to someone with COVID-19 should wear a mask. Masks are required on public transportation and may be required in other places by local or state authorities.		

If you are immunocompromised or high risk for severe disease, learn more about [how to protect yourself](#).

U.S. COVID-19 Community Levels by County Map

About These Data

COVID-19 Community Levels were calculated on March 10, 2022

- New COVID-19 cases per 100,000 population (7-day total) are calculated using data from March 3-March 9, 2022

- New COVID-19 admissions per 100,000 population (7-day total) are calculated using data from March 2-March 8, 2022
- Percent of inpatient beds occupied by COVID-19 patients (7-day average) is calculated using data from March 2-March 8, 2022
- To view and download this week and previous weeks data visit [United States COVID-19 Community Levels by County as Originally Posted | Data | Centers for Disease Control and Prevention \(cdc.gov\)](#)

Data for America Samoa, Guam, Commonwealth of the Northern Mariana Islands, and United States Virgin Islands are available in the downloadable CSV file.

Data Table

* Hosp Adm per 100k = New COVID-19 hospital admissions per 100,000 population (7-day total)
** Hosp Beds Occupied = Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)
*** HSA Number = Health Service Area Number
**** HSA Name = Health Service Area Name
