

SUPPLEMENTARY FIGURE. COVID-19 vaccination ( $\geq 1$  dose) coverage estimates\* among adults aged  $\geq 18$  years, by race/ethnicity† and selected geographic and sociodemographic characteristics, National Immunization Survey Adult COVID Module, United States, December 2020–November 2021

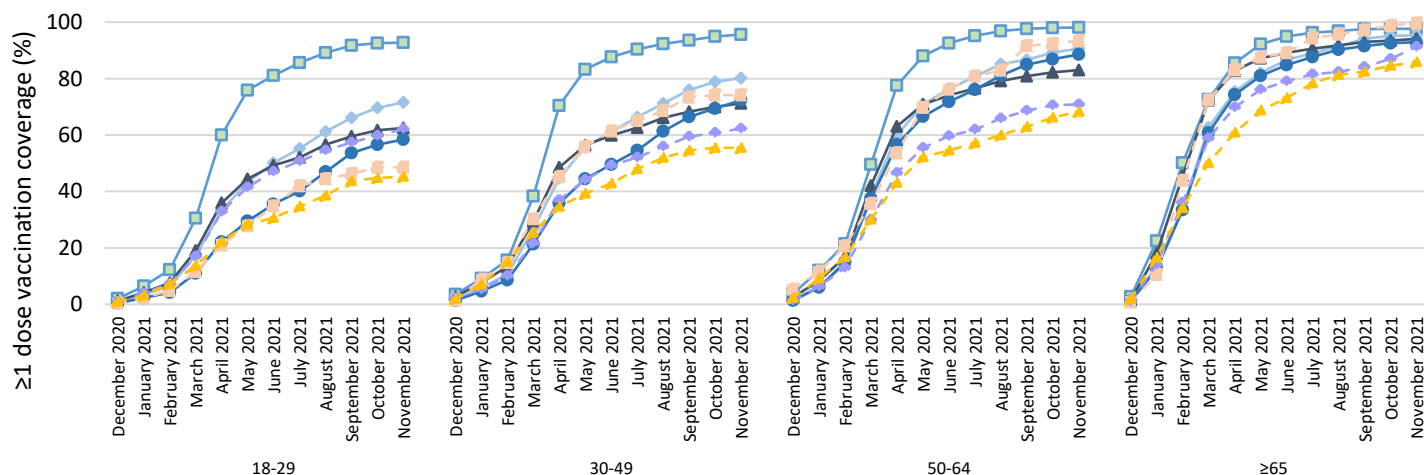

(A) U.S. Census Region

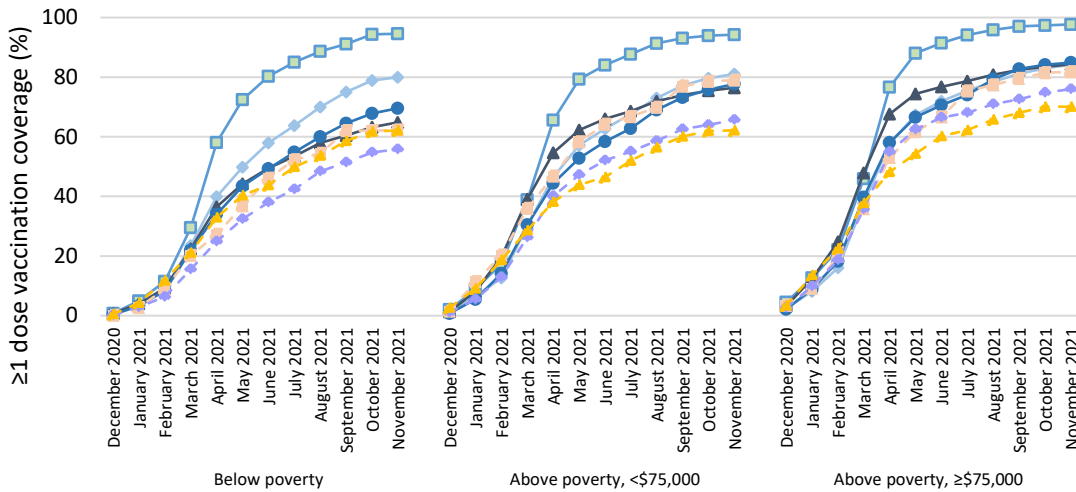

(B) Urbanicity

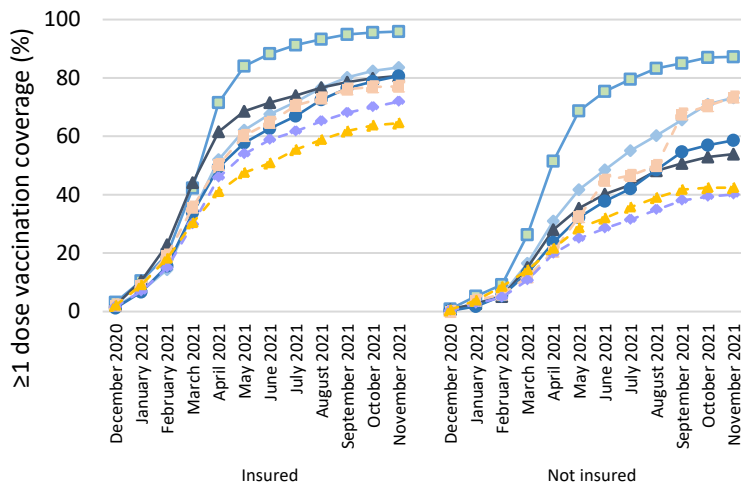

(C) Age Group (years)

#### (D) Annual Household Income

#### (E) Health Insurance

Abbreviations: AI/AN = American Indian or Alaska Native; MSA = metropolitan statistical area; NH/OPI = Native Hawaiian or other Pacific Islander.

\* Kaplan-Meier survival analysis was used to estimate vaccination coverage based on the month and year of first dose receipt; estimates reflect the cumulative percent vaccinated as of the end of each month.

† Persons were categorized into mutually exclusive categories of race and ethnicity; persons not reporting they were Hispanic were categorized by their reported race(s).
