Updated June 10, 2022

As of **12:01AM ET on June 12, 2022**, CDC will no longer require air passengers traveling from a foreign country to the United States to show a negative COVID-19 viral test or documentation of recovery from COVID-19 before they board their flight. For more information, see [Rescission: Requirement for Negative Pre-Departure COVID-19 Test Result or Documentation of Recovery from COVID-19 for all Airline or Other Aircraft Passengers Arriving into the United States from Any Foreign Country](#).

As a result of a court order, effective immediately and as of April 18, 2022, CDC's January 29, 2021 [Order](#) requiring masks on public transportation conveyances and at transportation hubs is no longer in effect. Therefore, CDC will not enforce the Order. CDC continues to recommend that people wear masks in indoor public transportation settings at this time.

Traveling Internationally?

All air passengers, regardless of vaccination status, must show a negative COVID-19 test taken **no more than 1 day** before travel to the United States.

Find a COVID-19 vaccine or booster: Search [vaccines.gov](https://www.vaccines.gov), text your ZIP code to 438829, or call 1-800-232-0233 to find locations near you.

Do NOT travel if...

- You have [COVID-19 symptoms](#), even if you recovered from COVID-19 within the past 90 days or are up to date with your COVID-19 vaccines.
- You [tested positive](#) for COVID-19.
 - Do not travel until a full 10 days after your symptoms started or the date your positive test was taken if you had no [symptoms](#).
- You are waiting for results of a COVID-19 test.
 - If your test comes back positive while you are at your destination, you will need to [isolate](#) and postpone your return until it's safe for you to travel. Your travel companions may need to [quarantine](#).
- You had close contact with a person with COVID-19 and **are recommended** to [quarantine](#).
 - Do not travel until a full 5 days after your last close contact with the person with COVID-19. It is best to avoid travel for a full 10 days after your last exposure.
 - If you must travel during days 6 through 10 after your last exposure:
 - [Get tested](#) at least 5 days after your last close contact. Make sure your test result is negative and you remain without [symptoms](#) before traveling. If you don't get tested, avoid travel until a full 10 days after your last close contact with a person with COVID-19.
 - Properly wear a [well-fitting mask](#) when you are around others for the entire duration of travel during days 6 through 10. If you are unable to wear a mask, you should not travel during days 6 through 10.

If you had close contact with a person with COVID-19 but are NOT recommended to [quarantine](#)...

- [Get tested](#) at least 5 days after your last close contact. Make sure your test result is negative and you remain without [symptoms](#) before traveling.
 - If you had confirmed COVID-19 within the past 90 days, you do NOT need to get tested, but you should still follow all other recommendations (including getting tested if you develop COVID-19 symptoms).
- If you travel during the 10 days after your last exposure, properly wear a [well-fitting mask](#) when you are around others for the entire duration of travel during the 10 days. If you are unable to wear a mask, you should not travel during the 10 days.

Safe, Easy, Free, and Nearby COVID-19 Vaccination

The federal government is providing the vaccine **free of charge** to all people living in the U.S., regardless of their immigration or health insurance status.
