

# COVID Data Tracker

Maps, charts, and data provided by CDC, updates daily by 8 pm ET

[COVID-19 Home](#)

CDC recommends use of [COVID-19 Community Levels](#) to determine the impact of COVID-19 on communities and take action. [Community Transmission Levels](#) are provided for healthcare facility use only.

**United States** At a Glance  
**Cases Total** 86,512,787  
**Deaths Total** 1,010,089  
**Current Hosp. Admission Trends** 25,212  
**33.6% of People 5+ with First Booster**

[Vaccination Distribution & Coverage](#)

Beginning June 13, 2022, instead of daily, jurisdictions and other partners will report vaccine administration and delivery data to CDC weekly on Wednesdays by 4 AM ET. As a result, instead of daily, the following COVID Data Tracker tabs will be refreshed weekly on Thursday by 8:00 PM ET: [Vaccinations in the United States](#), [Vaccinations by County](#), [Vaccination Trends](#), [Vaccination Demographics](#), [Vaccination Demographic Trends](#), [Vaccination Equity](#), [Vaccinations and Case Trends](#), [Vaccinations and Other Outcomes](#).

## Demographic Characteristics of People Receiving COVID-19 Vaccinations in the United States

Maps, charts, and data provided by CDC, updates weekly on Thursday by 8pm ET

[The percent of the population coverage metrics are capped at 95%. Learn how CDC estimates vaccination coverage.](#)

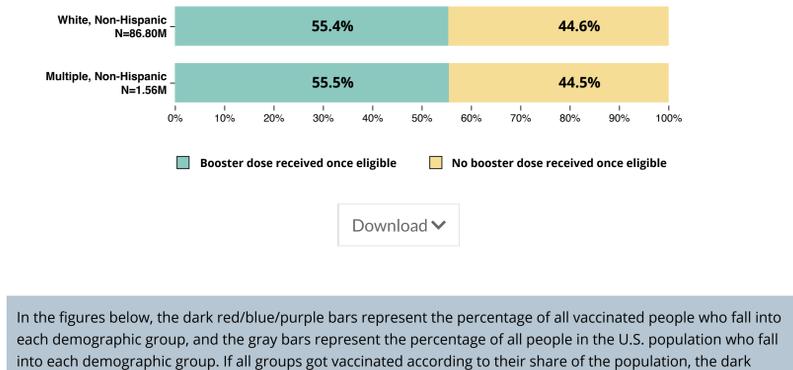

### First Booster Dose Eligibility\* and Receipt by Race/Ethnicity

Show:  
 Population ≥ 12 Years of Age  
 Population ≥ 18 Years of Age  
 Population ≥ 65 Years of Age

 CDC | Data as of: June 22, 2022 4:00am ET. Posted: June 23, 2022

### Percentages of Population Eligible for a First Booster Dose\* with and without\*\* a Booster, by Race/Ethnicity

Data from 190.00M people ages 12 years and older who are eligible for a booster dose\*. Race/ethnicity was available for 146.03M (76.9%) people ages 12 years and older who are eligible for a booster dose.

[Download](#)

In the figures below, the dark red/blue/purple bars represent the percentage of all vaccinated people who fall into each demographic group, and the gray bars represent the percentage of all people in the U.S. population who fall into each demographic group. If all groups got vaccinated according to their share of the population, the dark red/blue/purple bars would be the same length as the gray bars.

- Instances where the dark red bar is shorter than the gray bar indicate that the number of people in that group who received at least one shot is lower than would be expected based on the number of people in that group in the U.S. population.
- Instances where the dark blue bar is shorter than the gray bar indicate that the number of fully vaccinated people in that group is lower than would be expected based on the number of people in that group in the U.S. population.
- Instances where the dark purple bar is shorter than the gray bar indicate that the number of people with a booster dose in that group is lower than would be expected based on the number of fully vaccinated people in that group in the U.S. population.

### Race/Ethnicity

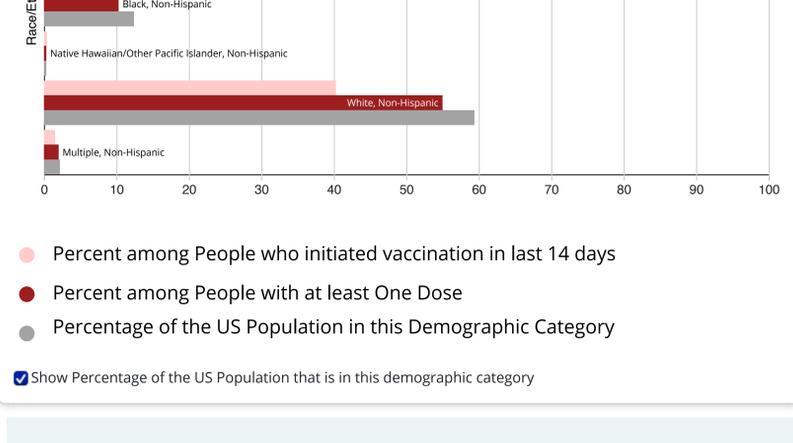

Show:  
 At Least One Dose  
 Fully Vaccinated  
 First Booster Dose

#### Footnotes

**Timing:**<sup>1</sup> Data will be updated after review and verification, usually before 8:00 pm ET. Note: Weekly updates might be delayed due to delays in reporting.

- Data on doses of vaccine distributed and administered include data received by CDC as of 4:00 am ET on Wednesdays.
- Vaccination data on CDC's COVID Data Tracker are updated weekly on Thursdays between 1:30 pm and 8:00 pm ET.
- Updates will occur the following day when Thursday reporting coincides with a federal holiday.

Visit the [COVID-19 Vaccination Data in the United States](#) pages for more information about COVID-19 vaccination data, including data definitions.

\* The count and percentage of people who are [eligible for a first booster dose](#) (at least 5 months since their completed Pfizer-BioNTech or Moderna primary series or at least 2 months since their completed Janssen (Johnson & Johnson) single-dose vaccine). **Booster eligibility counts and percentages exclude vaccine administrations reported by Texas (all records) and by Idaho (records for persons ages under 18 years only) because data on the primary series cannot be linked to data on booster doses in the aggregate data submitted by these entities. Administrations reported by Idaho for persons ages 18 and older are included. Criteria for booster eligibility may change over time; data will be updated to align with the current recommendations.**

\*\*People who are eligible for a first booster dose and have or have not received a booster or an additional dose.

The Centers for Disease Control and Prevention (CDC) is working with states to provide more information on the demographic characteristics of vaccinated people.

These demographic data only represent the geographic areas that contributed data and might differ by populations prioritized within each state or jurisdiction's vaccination phase. Every geographic area has a different racial and ethnic composition, and not all are in the same vaccination phase. These data are thus not generalizable to the entire US population.

Percentages displayed in the charts represent the percent of people vaccinated for whom the demographic variable of interest is known.

All reported numbers may change over time as historical data are reported to CDC.

#### First Booster Dose Eligibility:

- Criteria for first booster dose eligibility may change over time; data will be updated to align with the current recommendations.
- CDC counts people as being "eligible to get a first booster dose" if it has been at least 5 months since their completed Pfizer-BioNTech or Moderna primary series or at least 2 months since their completed Janssen (Johnson & Johnson) single-dose vaccine.
  - Beginning **December 9, 2021**, adolescents ages 16 and 17 years were authorized and recommended to get a Pfizer-BioNTech booster dose at least 6 months after completing the Pfizer-BioNTech primary series.
  - Beginning **January 4, 2022**, people ages 16 years and older who have completed the Pfizer-BioNTech primary series can get a Pfizer-BioNTech booster dose at least 5 months after completing the primary series.
  - Beginning **January 5, 2022**, adolescents ages 12-15 years who have completed the Pfizer-BioNTech primary series can get a Pfizer-BioNTech booster dose at least 5 months after completing the primary series.
  - Beginning **January 7, 2022**, adults ages 18 years and older who have completed the Moderna primary series can get an mRNA booster dose (Pfizer-BioNTech or Moderna) at least 5 months after completing the primary series.
- The first booster dose eligibility metric excludes fully vaccinated people who received an "Other" primary series vaccine type.
