

Decoding the MAHC

The Model Aquatic Health Code

The MAHC is a free resource, based on science and best practices, to help state and local health professionals make swimming and other water activities healthier and safer.

Trips people in the U.S. make to pools and other swimming areas each year

People who swim can enjoy

Increased physical & mental health

Lower risk for chronic diseases, joint & muscle pain, death

Increased quality of life & decreased disability in older age

The Problem

But some places we swim aren't clean or safe.

1 in 8

Pools closed immediately on routine inspection for critical health and safety problems

Pool Closed

Problems can lead to

Drowning

A leading cause of unintentional injury-related death for children ages 1-14

Outbreaks

During 2000-2014 almost 500 outbreaks were linked to pools, hot tubs/spas, and water playgrounds

Emergency Department Visits

Between 3,000 - 5,000 people visit the ER each year for an injury from a pool chemical — almost half of visits are among kids

The Process

7 years

12 technical committees

140 people

Input and consensus of public health, aquatics, academia

2 rounds of public comment

4,407 comments

Received from partners, industry public health, and interested public

almost ¾ of comments accepted

14 Topic Areas:

Preface, user guide, glossary

Contamination burden

Disinfection & water quality

Facility design & construction

Facility maintenance & operation

Hygiene facilities

Lifeguarding & bather supervision

Monitoring & testing

Operator training

Regulatory

Risk management & safety

Ventilation & air quality

Fecal/vomit/blood contamination response

Recirculation systems & filtration

The Product

Guidelines—based on science and best practices—on how to optimally design, construct, operate, and maintain public pools and other aquatic facilities

68% of local health departments inspect public swimming pools and facilities.

The MAHC is NOT a federal law. It's model CDC guidance that states and local communities can voluntarily adopt to minimize drowning, illness, and injury linked to public pools, hot tubs, and water playgrounds.

Use the MAHC

To update existing codes for public swimming pools, hot tubs/spas, and water playgrounds.

To incorporate guidelines based on science and best practices

However you want: use, change, incorporate the entire MAHC or pieces of it

The Public Health Impact

the MAHC can help:

Prevent drowning, illness, and injury

Raise minimum standards and reduce inspection violations

Keep pools open for more summer and year-round fun

Help make swimming healthier and safer.
