

COVID-19 Vaccines for Children and Teens

Updated July 21, 2022

About Vaccination for Children and Teens

CDC recommends [COVID-19 vaccines](#) for everyone 6 months and older and boosters for everyone 5 years and older, if eligible. Use [CDC’s COVID-19 booster tool](#) to learn if and when your child or teen can get boosters to stay up to date with their COVID-19 vaccines.

- Vaccine Safety in Children and Teens

COVID-19 Vaccine Dosage Is Based on Age on the Day of Vaccination, Not on Size or Weight

Children get a smaller dose of COVID-19 vaccine than teens and adults that is the right amount for their age group.

COVID-19 primary series vaccination for children and teens

Child’s Age	Pfizer-BioNTech	Moderna	J&J/Janssen
6 months – 4 years old	3-dose primary series	2-dose primary series	Not authorized

Children and Teens Who Are Moderately or Severely Immunocompromised

Children and teens ages 5 through 17 years who are [moderately or severely immunocompromised](#) will need a third dose to complete their primary series, as well as boosters if eligible. Children and teens with a weakened immune system should get:

- 1 booster if they are ages 5 through 11 years
- 2 boosters if they are ages 12 years and older
