Disseminated Gonococcal Infection Case Reporting

CDC has received increasing reports of disseminated gonococcal infection (DGI), an uncommon, but severe, complication of untreated gonorrhea. CDC has created the DGI Case Report Form and REDCap Survey, which state and local health departments may use to collect the critical data elements we need to better understand and characterize DGI cases nationally. Follow the instructions below to voluntarily share existing and available epidemiological and clinical DGI case information with CDC. The submission of all data elements is not required. Keep a record of the REDCap ID with your local case ID so you can modify the form if any additions or changes are needed.

DGI Case Report Form (Version 1 March 2020) Instructions

Note: This form is for your records. To share information on a DGI case, the information in this form should be entered into the REDCap Survey or the completed form may be sent securely to CDC. The REDCap form includes skip patterns so some questions on the form may not be applicable to every case.

Information Needed to Compete Form

- Medical record reviews
- Provider interviews

- Partner service investigations
- Information from various staff (e.g., surveillance, DIS)

DGI Case Classification Definitions Used in Form

- **Confirmed**: Isolation of *Neisseria gonorrhoeae* from a **disseminated site** of infection (e.g., skin, synovial fluid, blood, or cerebrospinal fluid [CSF]) by culture
- **Probable**: Clinical manifestations of DGI AND isolation or detection of *N. gonorrhoeae* from a **mucosal site** by culture or nucleic acid amplification test (NAAT)
- **Suspect**: In the absence of a more likely diagnosis, **clinical suspicion** of DGI without isolation or detection of *N. gonorrhoeae* from any anatomic site

REDCap Survey Instructions

The information in the DGI Case Report Form should be entered into a REDCap survey behind the SAMS firewall. There are two ways to upload information in REDCap.

1. Request Direct Access to the REDCap Survey

If someone at your agency has access to SAMS they can request access to the REDCap tool by emailing <u>Alison Ridpath</u> or <u>Laura Quilter</u>. REDCap will assign a unique ID to each case entered. Please keep a record of the REDCap ID with the corresponding case report form. Each page of the DGI Case Report Form has a box to record the REDCap ID.

2. Secure Form Transfer with Assigned REDCap Case ID

If no one at your agency has SAMS access, please contact <u>Alison Ridpath</u> or <u>Laura Quilter</u> to discuss a secure way to transfer the completed DGI Case Report Form and to receive a REDCap case ID for your record.

If you have any questions, please feel free to reach out to us for assistance.

Sincerely,

Alison Ridpath MD, MPH
