

# Active Investigations of Multistate Foodborne Outbreaks

*Last updated August 10, 2022 (updated every Wednesday)*

CDC typically coordinates between 17 and 36 investigations of foodborne illnesses involving multiple states each week. The table below shows the number of active CDC investigations for *Listeria monocytogenes*, *Salmonella*, and Shiga toxin-producing *E. coli*. It also includes links to any current CDC outbreak notices.

Germ	Number of Active Investigations	CDC Outbreak Notices
<a href="#">Listeria</a>	5	<ul style="list-style-type: none"><li>Food Safety Alert: <a href="#">Ice Cream</a></li></ul>
<a href="#">Salmonella</a>	18	<ul style="list-style-type: none"><li>No current outbreak notices</li></ul>
<a href="#">E. coli</a>	4	<ul style="list-style-type: none"><li>No current outbreak notices</li></ul>

CDC works closely with our federal regulatory partners, FDA and USDA-FSIS, on foodborne outbreak investigations. For more information about how they work to identify and remove contaminated food from the market, visit their website:
