# WHAT TO EXPECT WHEN GETTING TESTED

| COVID-19 |

Most COVID-19 tests use nasal swabs to gather samples.

You can get your test results as quickly as 15 minutes or up to a few days, depending on the type of test.

Testing locations may be crowded. While you are waiting to get your test and results, wear a mask and stay at least 6 feet apart from others.

Your Results

If you test NEGATIVE for COVID-19, the virus was not detected.

- You are likely not infected.

- For more information about the types of COVID-19 tests and why you might have tested negative, go to www.cdc.gov/covidtesting.

If you test POSITIVE

- If isolating alone, you must isolate for at least 10 days.

- If isolating with family , you all must isolate for at least 17 days.

- For more information on quarantine and isolation, go to cdc.gov/coronavirus/2019-ncov/your-health/quarantine-isolation.html.
